Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report

Approved By:

James Dever

Prepared By:

Andreja Misir

Report Highlights:

This report provides information on the export certificates required by the Government of Croatia for processed food, agricultural food products, live animals (cattle, pets, etc), products for animal consumption, and feed. All sections of this annual report were updated in October 2011. It should be noted that due to Croatia's rapid harmonization of food legislation with EU legislation, information in this report should be double checked for obsolescence with the USDA office in Croatia

Section I. List of All Export Certificates Required By Government (Matrix) :

Disclaimer: This report was prepared by the Office of Agricultural Affairs of the USDA/FAS (in Zagreb, Croatia) for U.S. exporters of domestic food and agricultural products. While every possible care has been taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Model certificates may not be available for products that have never before been exported to Croatia or the EU. In general, health certificates are required for all imported products of animal origin and phytosanitary certificates are needed for all plant products that could introduce pests.

Croatian/EU import certification for plants and plant products, unlike for veterinary products, has only one model certificate in accordance with international regulations laid out by the International Plant Protection Convention of the Food and Agriculture Organization of the United Nations (see www.ippc.int/IPP/En/default.htm). Phytosanitary certificates are issued by APHIS inspectors, who attest to specific requirements of Croatian/EU legislation by

making additional declarations in the relevant boxes.

Section IV. Government Certificate's Legal Entry Requirements

All certificates listed in this report, i.e. certificates that must accompany a product at the time of entry, must be originals.

A certificate can be applied to multiple shipments only if the goods in the shipment come from the same batch.

For the listed certificates, Croatia does not accept a Supplier's or Manufacturer's Export Declaration as proof of compliance.

For the listed certificates, Croatia will accept state-issued export certificates from the United States, if the state-issued certificates are in accordance with Croatian legislation.

Section V. Other Certification/Accreditation Requirements

Regulation on Food for Special Nutritional Purposes (NN 41/2010) requires that food for special nutritional purposes obtain approval from the Ministry of Health and Social Welfare before being placed on the market. For details on the procedure contact the FAS Croatia office (for contact information see appendix II). However, food products for special nutritional purposes can be placed on the market without approval from the Ministry of Health and Social Welfare if a notice is sent to the Ministry about placing a specific product on the market together with an application of that product to the responsible institution in the EU and adequate explanation in Croatian language. Moreover, Regulation on Food Supplements (NN 46/2011) requires that most of food supplements (with some special exceptions) have a notification number from the Ministry of Health and Social Welfare and The Regulation on Food Enriched with Nutrients (NN 148/2008) asks for food enriched with nutrients to have notification number from the Ministry of Health and Social Welfare.

In October 2010, Croatia implemented special import conditions which call for mandatory testing of U.S. almonds imported into Croatia (Regulation on Special Conditions for Import of Specific Food from Third Countries Due to the Risk of Contamination with Aflatoxins NN120/2010, NN63/2011 in compliance with EU1152/2009). USDA and The California almond industry has developed a "Voluntary Aflatoxin Sampling Plan (VASP)" that procedure is considered to provide sufficient assurances which means that almonds shipped under VASP are subject to random controls. Almonds not controlled under VASP continue to be subject to 100% border controls. The Regulation covers almonds in shell or shelled, roasted almonds and mixtures of nuts or dried fruits containing almonds, and foodstuffs containing a significant amount of almonds (at least 20%). This regulation also introduces the use of a Common Entry Document (CED). Importers have to provide prior notification to the competent authorities at the designated port of entry for the goods covered by this regulation.

Providing additional information on the imported product will be viewed favorably by the border inspectors. These documents could be the following: producers' specifications, certificate of origin, certificate of compliance with certain regulations, and others.

Appendix I. Electronic Copy or Outline of Each Export Certificate
