

Required Report: Required - Public Distribution

Date: June 28, 2022

Report Number: TU2022-0028

Report Name: Food and Agricultural Import Regulations and Standards
Export Certificate Report

Country: Turkey

Post: Ankara

Report Category: FAIRS Export Certificate Report

Prepared By: Nergiz Ozbag

Approved By: Christine Mumma

Report Highlights:

This 2022 Food and Agriculture Import Regulations and Standards (FAIRS) Export Certificate Report for Turkey lists the major export certificates and other requirements expected by the Turkish government for food and agricultural products imports to Turkey. This report should be read in coordination with the 2022 FAIRS Annual Country Report for Turkey, which outlines specific requirements for food and agricultural product imports into Turkey and can be accessed on the FAS Global Agricultural Information Network website at: <https://gain.fas.usda.gov/#/search>.

Disclaimer

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Ankara, Turkey, for U.S. exporters of domestic food and agricultural products. While every possible care has been taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. This report does not cover standards or requirements for products from third countries. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. Exporters should also check [FSIS Export Library](#) online and [APHIS iregs](#) website to ensure there is approval for sending products to Turkey. **FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

EXECUTIVE SUMMARY:

The report provides information on export certificates that the Turkish government requires. The Ministry of Agriculture and Forestry (MinAF) is the responsible authority for preparing and implementing policy and legislation related to food and agricultural product safety. Products imported into Turkey must meet existing legislation requirements and must be accompanied by the proper certificates at the port of arrival. MinAF identifies food and agricultural products which must be accompanied by an “original certificate” stating the safety of animal and plant health of the product in question. On July 31, 2021, MinAF ended the temporary Covid-related implementation allowing Phytosanitary Certificates and Veterinary Health Certificates to be e-mailed to the official control body

in Turkey. As of August 1, 2021, original copies of these certificates are required to be sent at the time the product is imported to Turkey.

Some of the products that require plant or veterinary health certificates are listed in the appendixes of this report. MinAF has been requiring new modal veterinary health certificates for dog chews, canned pet food, processed pet food other than canned pet food and derived products from processed manure and guano from bats since April 15, 2022. The exporter should be in close communication with importers in Turkey to find out the latest requirements at the time of export to prevent detainment of cargo.

SECTION I: List of All Export Certificates Required by Turkey (Matrix)

This is the list of certificates required by Turkey for import of food and agriculture products.

Product	Title of Certificate	Attestation Required on Certificate	Purpose	Requesting Ministry
Animals, certain animal products, certain plants (Listed in APPENDIX-II-B, APPENDIX-III-B and APPENDIX-III-C)	Control Certificate	Import license that states whether or not the product is eligible for importation	Import License	Ministry of Agriculture and Forestry (MinAF)
Sheep/Goat Intestines (Cleansed-Untreated)	Veterinary Health Certificate	Animal health attestation, Public health attestation	Animal Health, Public Health	MinAF
Female Breeding Cattle	Veterinary Health Certificate	Health status of animals	Animal Health	MinAF
Domestic Rabbits	Origin Veterinary Health Certificate	Identification and origin of animals, Health status of animals, Health status of the colony of origin, Health Status of the United States	Animal Health	MinAF
Registered Horses for breeding and production	Health Certificate	Health information of animals	Animal Health	MinAF
Ovine and Caprine semen	Health and Origin Certificate	Health information of animal country and zone information of animals and semen	Animal Health, Product Safety	MinAF

Breeding Bull	Origin and Veterinary Health Certificate	Health status of animals Health Status of the United States	Animal Health	MinAF
Domestic Bovine Animals intended for fattening	Veterinary Health Certificate	Health information	Animal Health	MinAF
<i>In vivo</i> derived embryos of domestic animals of the bovine species	Veterinary health certificate	Health information	Animal Health, Product Safety	MinAF
Honey and apiculture products intended for human consumption	Veterinary Health Certificate	Honey is coming from beehives in which the American foulbrood disease does not occur, and honey is fit for human consumption	Animal Health, Public Health	MinAF
Animal by-products intended for manufacture of pet food	Veterinary Health Certificate	Animal by-products that satisfy the animal health requirements specified in the certificate	Animal Health, Product Safety	MinAF
Domestic dogs, cats and ferrets	Veterinary Health and Origin Certificate	Country of origin, country of dispatch, Health information of animals	Animal Health	MinAF
Re-entry of registered horses for racing, competition and cultural events	Health Certificate	For the re-entry of registered horses for racing, competition and cultural events into Turkey after temporary export for a period of less than 30 days, health information of animal	Animal Health	MinAF
Temporary importation of registered racing and competition horses into Turkey	Health Certificate	Health status of animals	Animal Health	MinAF
Animal casings	Animal Health Certificate	Health status of animals which casings are derived from; Approval of	Animal Health, Product Safety	MinAF

		establishments by the competent authority, certificate is for veterinary purposes only and must accompany the consignment until it reaches the Turkish border inspection post		
Treated hides and skins of ungulates	Animal Health Certificate	Health status of animals, Health Status of the exporting country, Safety of product	Animal Health, Product Safety	MinAF
Live ratites (large, flightless birds)	Origin Veterinary Health Certificate	Health information of animal	Animal Health	MinAF
Sheep's untreated wool	Animal Health Certificate	Health status of animals from which sheep's wool was obtained	Animal Health, Product Safety	MinAF
Sheep's treated wool	Animal Health Certificate	Health status of animals from which sheep's wool was obtained	Animal Health, Product Safety	MinAF
Semen of domestic animals of bovine species collected, processed and stored before 12/31/2004	Veterinary Health Certificate	Health information of animal, Origin of the semen	Animal Health and Product Safety	MinAF
Semen of domestic animals of bovine species	Veterinary Health Certificate	Health information of animal Origin of the semen	Animal Health and Product Safety	MinAF
Primates	Animal Health Certificate	Health information of animal	Animal Health	MinAF
Animal casings to Turkey intended for export to the European Community	Animal Health Certificate	Animal Health Attestation	Animal Health	MinAF
Bumble bees (Bombus Spp.) Bred under environmentally controlled conditions	Health Certificate	Health information of animal	Animal Health	MinAF

within recognized establishments				
Queen Bees and Queen Bumble Bees (Apis Mellifera and Bombus Spp.) and their attendants	Health Certificate	Health information of bees and hives	Animal Health	MinAF
Day-old chicks other than of ratites	Veterinary Health Certificate	Animal health attestation, Public Health Additional Guarantees, Additional Health Requirements, Animal transport attestation	Animal Health, Public Health	MinAF
Hatching Eggs of Poultry other than of Ratites	Veterinary Health Certificate	Animal health attestation Animal transport attestation	Animal Health	MinAF
Fresh or chilled hides and skins of ungulates	Veterinary Health Certificate	Health status of animals, Health Status of the exporting country, Safety of product	Animal Health, Product Safety	MinAF
Certain birds other than poultry	Animal Health Certificate	Health information of animal	Animal Health	MinAF
Fresh, chilled, frozen meat (carcass) of domestic bovine animals	Veterinary Health Certificate	Animal Health Attestation, Public Health Attestation	Animal Health, Public health	MinAF
Ova and embryos of the ovine and caprine species (sheep and goats)	Veterinary Health Certificate	Health information of animal	Animal Health	MinAF
Dairy products (derived from milk of cows, ewes, goats and buffaloes for human consumption)	Veterinary Health Certificate	Public health attestation, Animal health attestation	Animal Health, Public health	MinAF
Gelatin for human consumption	Veterinary Health Certificate	Health attestation	Animal Health, Public health	MinAF
Collagen for human consumption	Veterinary Health Certificate	Health attestation	Animal Health,	MinAF

			Public health	
Egg products for human consumption (note: the United States and Turkey have not come into agreement on this protocol)	Veterinary Health Certificate	Animal health attestation, Public health attestation	Animal Health, Public Health	MinAF
Fishery products intended for human consumption	Veterinary Health Certificate	Public health attestation, Animal health attestation for fish, crustaceans of aquaculture origin	Animal Health, Public health	MinAF
Aquaculture animals for farming, relaying, put and take fisheries and open ornamental facilities	Veterinary Health Certificate	Health information, Transport and labelling requirements	Animal Health, Public Health	MinAF
Ornamental aquatic animals intended for closed ornamental facilities	Veterinary Health Certificate	Health information, Transport and labelling requirements	Animal Health	MinAF
Wild carnivores	Animal Health Certificate	Health information of animals	Animal Health	MinAF
Fish oil not intended for human consumption to be used as feed material or for purposes outside the feed chain	Veterinary Health Certificate	Health information of product	Product Safety	MinAF
Processed animal protein not intended for human consumption, including mixtures and products other than pet food containing such protein *(This Certificate is valid from 4/15/2022)	Veterinary Health Certificate	Health information of product	Product Safety	MinAF
Dog chews *(This Certificate is	Veterinary Health Certificate	Health information of product and animals	Product Safety	MinAF

valid from 4/15/2022)		from which the dog chews were produced		
Processed pet food other than canned pet food *(This Certificate is valid from 4/15/2022)	Veterinary Health Certificate	Health information of product and of animals from which the pet food was produced	Product Safety	MinAF
Hay and straw	Health Certificate	Health information of product and animal health status of hay or straw's origin area	Product Safety	MinAF
Canned pet food *(This Certificate is valid from 4/15/2022)	Veterinary Health Certificate	Health information of product and of animals from which the canned food was produced	Product Safety	MinAF
Highly refined chondroitin sulphate, hyaluronic acid, other hydrolyzed cartilage products, chitosan, glucosamine, rennet, isinglass and amino acids intended for human consumption	Veterinary Health Certificate	Public health attestation	Public Health	
Processed Manure, Derived Products from Processed Manure and Guano from Bats *(This certificate is valid from 4/15/2022)	Veterinary Health Certificate	Health information of product and of animals from which the product was produced	Product Safety	MinAF
Plants and plant products	Phytosanitary Certificate	Plant health attestation	Plant Health	MinAF
Plants and plant products	Re-export Phytosanitary Certificate	Plant health attestation	Plant Health	MinAF
Food products of plant origin	Free Sale Certificate/Health Certificate	Product is fit for human consumption, sold freely in the country of origin	Food Safety	MinAF
Materials and articles in contact with foods	Declaration given by producer or exporter	Product is fit for contact with food	Product Safety, Food Safety	MinAF
Alcoholic beverages	Certificate of Age	According to legislation where	Age of product	MinAF

		necessary, aging period of product		
--	--	---------------------------------------	--	--

Section II: Purpose of Specific Export Certificate(s)

Please refer to the Matrix under Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Phytosanitary Certificate:

A **Phytosanitary Certificate** is required for unprocessed agricultural products such as cotton, oilseeds, grains, nuts, wood products, etc. It should be issued by the relevant competent plant protection authority of the producing or exporting country according to the sample certificate provided in APPENDIX-I. In the U.S., Animal and Plant Health Inspection Service (APHIS) is the plant protection competent authority at federal level which is responsible for issuing Phytosanitary Certificate for international trade.

The Certificate may also be issued in accordance with the International Standards for Phytosanitary Measures (ISPM)-12 rules and must be issued in Turkish or English. Special conditions related to plant and plant products are given in Annex 4 of the Quarantine Regulation, which is available in Turkish [here](#) and English [here](#).

Any information about special conditions should be provided clearly in the Phytosanitary Certificate or can be supplied as an additional declaration by referring to the Phytosanitary Certificate's relevant section.

According to the Turkish Quarantine Regulation, the Phytosanitary Certificate must be issued at most 14 (fourteen) days prior to the **shipment date**. Additionally, for Certificates on which the **inspection date** and the **date of issue** are separately stated, the period between the **inspection date** of the product and the **shipment date** of the product must be at most 14 (fourteen) days. The inspection date of the product must be stated on Phytosanitary Certificates issued after the shipment date.

APHIS generally requires that shipments **must** be exported within 14 days of inspection. Phytosanitary Certificates issued before departure do not have to include an inspection date. If Phytosanitary Certificates cannot be obtained before departure, the inspection date must be included as an Additional Declaration. Exporters should take note that this regulation differs from EU regulations, which require that a commodity depart a country within 14 days of issuance of a phytosanitary certificate, not the inspection date.

There should not be any erasure or scrapings on the Phytosanitary Certificate. Each correction made on a certificate should be approved and signed by the relevant competent authority.

Certificate of Free Sale/Health Certificate:

A **Free Sale Certificate/Health Certificate** is required for processed food and feed of plant origin, such as canned food, pet food of plant origin, vegetable juices, energy drinks, alcoholic beverages, etc., and for materials and articles which are intended to come into contact with food (food contact materials).

A Free Sale Certificate/Health Certificate should have one of the statements such as “product is sold and traded freely in USA,” “product is produced in compliance with the legislation of USA,” “product does not possess any risk to human and/or animal health,” “product does not possess any risk in the aspect of food and/or feed safety,” “test results of product are in compliance with legislation,” or “product is fit for contact with food.”

If a product requires both quarantine and food/feed safety controls and is accompanied by a Phytosanitary Certificate, a Free Sale Certificate/Health Certificate is not required for the product in question. Free Sale Certificate/Health Certificates should be issued on behalf of the producer or exporter and must be endorsed by the competent authority of the origin or exporting country.

Effective October 1, 2018, the U.S. Food and Drug Administration (FDA), as part of its implementation of the Food Safety Modernization Act (FSMA), has updated the format of the Certificate of Free Sale (COFS), which is called “Certificate to a Foreign Government”. The FDA issues this format to U.S. manufacturers and exporters who choose to use them. MinAF accepts the new format of FDA’s Certificate.

In addition, MinAF publishes the list of state or local certifying competent authorities which issue free sale certificate(s)/health certificate(s) recognized for food and feed of plant and plant origin from other countries, including the United States. The list is available for recognized U.S. competent authorities [here](#) in the Turkish language **Error! Hyperlink reference not valid.** The current list of competent authorities recognized for the United States is given in APPENDIX-IV of this report. The USDA/FAS Office of Agricultural Affairs at the U.S. Embassy in Ankara may need to provide Turkish officials with a document confirming the authority of the local or federal certifier if the entity is not already included on the MinAF’s preapproved list.

Certificate of Age for Alcohol:

A copy of **the Certificate of Age** is provided for products which require aging (such as whiskey) at the time of pre-notification of the product. The original copy of this certificate should be supplied at the time of import.

Food Contact Material:

For materials and articles which are intended to come into contact with food, if there is no competent authority issuing a **Free Sale Certificate/Health Certificate**, then, a **declaration** from the producer or exporter is accepted as sufficient to meet Turkey’s requirement. This declaration should contain information such as the name and amount of product, the name and address of the producer or exporter, and the statement “product is fit for contact with foods.”

Veterinary Health Certificates:

Veterinary Health Certificates are required for animal and animal origin products such as livestock, gelatin, collagen, hides and skins, dairy products, etc. Certificates under the name of “Health Certificate,” “Veterinary Health Certificate” or “Origin and Veterinary Health Certificate,” guaranteeing animal health and public health status are accepted as Veterinary Health Certificates by MinAF.

A sample Veterinary Health Certificate will be provided at the time of receiving a Control Certificate (Please see Section VI, Section IX and Section X of Turkey import procedures in the 2022 FAIRS Annual Country Report for Turkey- which is accessible [here](#)). The content of a sample Veterinary Health Certificate should be the same as the official Veterinary Health Certificate, however, it may or may not contain attestation(s).

MinAF outlines a format for Veterinary Health Certificates for certain animal/animal-origin products. These formats are available at the MinAF [website](#). Please see some of those sample Veterinary Health Certificates for certain products at the links given in APPENDIX-V of this report.

It is important to provide Veterinary Health Certificates with exactly the same content and format if the format is identified for the product by MinAF. If the format is not identified for the product in question, then the Veterinary Health Certificate should contain information such as:

- the name of the exporting country/region;
- the competent authority;
- the exporter;
- the importer;
- the country of origin;
- the species of animal from which the product is derived/produced;
- the description and amount of product;
- information related to transport, and;
- if it is for human consumption, the statement “fit for human consumption”;
- for products not for human consumption, the intended use must be indicated, such as “for feed use,” “for soap industry”, etc.
- depending on the type of product, statements related to animal and/or public health.

MinAF maintains a “List of banned countries & substances due to animal diseases” for animal and animal products on their website at <http://yasakli.gkgm.gov.tr/> (in the Turkish language). Some animal products on this list are only allowed to be imported after special treatment to eliminate risk(s). The Veterinary Health Certificate should contain a detailed description of this treatment as an additional declaration in that case. Additional declarations may also be given separately. In that case, the authority that issues the Veterinary Health Certificate must refer to the original Veterinary Health Certificate and sign/stamp it.

Certificate of Origin:

A **Certificate of Origin** is also required for animal and animal-origin products to support the product’s health status, with respect to the animal diseases of the producing or exporting country if the origin is not indicated in the Veterinary Health Certificate.

Section IV: Government Certificate Legal Entry Requirements

Certificate of Free Sale/Health Certificate:

A **Free Sale Certificate/Health Certificate**, unless indicated otherwise, is valid for one year, but may not exceed the shelf life of the product.

Free Sale Certificate/Health Certificate should have the name and origin of the product, name of the producer or exporter, name and the wet signature of the person who issues it and one of the statements listed in Section III, paragraph six of this report. The original copy of the Free Sale Certificate/Health Certificate is given to the provincial directorate of MinAF in the first consignment's initial import control verification and is kept in the Food Safety Information System of MinAF. The original copy of the Free Sale Certificate/Health Certificate can be applied to multiple listed consignments' import controls until the validity of the Free Sale Certificate/Health Certificate expires.

If the Free Sale Certificate/Health Certificate is issued for a specific shipment, it should contain the lot number and the quantity (weight, volume, or number of units) of the shipment in question and can be used only once for that shipment.

For alcoholic beverages, certificates issued by the competent authority of the country where the product is bottled are also acceptable.

Due to the COVID-19 pandemic, MinAF **“temporarily accepts”** Free Sale Certificate/Health Certificates to be e-mailed to the provincial directorate which carries out import controls at the port of entry by the issuing authority in U.S. **MinAF does not require the original copy of the Free Sale Certificate/Health Certificate to be provided later.** However MinAF plans to end this implementation and require the original copy of certificates soon but as of June 30, 2022 MinAF has not ended this temporary implementation yet. **Exporters should be in close communication with importers in Turkey to be informed about official e-mail addresses for certificates to be e-mailed and the time frame for which this “temporary implementation” is still valid.**

Phytosanitary Certificate:

For the products which are subject to phytosanitary controls; a Free Sale Certificate/Health Certificate is not required if the product is accompanied by Phytosanitary Certificate.

The original **Phytosanitary Certificate** should accompany the products, and products may be rejected at the port if the original certificate does not accompany the products. Due to the COVID-19 pandemic, MinAF **“temporarily accepted”** copies of Phytosanitary Certificates. However, the original copy of Phytosanitary Certificates was required to be provided at the earliest possible time after the import. **MinAF ended the temporary acceptance of Phytosanitary Certificate copies on August 1, 2021. Currently, the original copy of the Phytosanitary Certificate must be provided at the time of import.**

Please see the HS CODES of plant and plant products which require an accompanying Phytosanitary Certificate in APPENDIX-II-A of this report.

The following products do not need to be accompanied by Phytosanitary Certificate;

- Fresh and dried fruits and vegetables not exceeding three kilograms for personal consumption
- Noncommercial bouquet of flowers or garland, not more than one unit
- Plant and plant products donated by foreign people to government agencies or charitable institutions (quarantine controls are carried out at the customs and products are allowed in after being cleared)
- Wooden packaging materials carrying goods and marked according to ISPM-15 rules

Veterinary Health Certificate:

MinAF accepts the validity of the **Veterinary Health Certificate** as indicated by the issuing authority. Previously, for animal products excluding genetic materials (30 days for genetic materials), the validity of the veterinary health certificate **was** seven days for products coming by air, fifteen days for products coming by road, 30 days for products coming by rail, and 60 days for products coming by sea.

As of November 20, 2021, unless otherwise indicated, MinAF has permanently extended the validity of veterinary health certificates for animal products (excluding genetic materials) to 15 days for products coming by air, 30 days for products coming by road, 60 days for products coming by rail, and 120 days for products coming by sea. Validity of the certificate for genetic materials remained same at 30 days. Since February 2018, semen export certificates do not have to be endorsed within two days prior to shipment from the United States. MinAF now accepts the export certificates for semen from the United States ONLY to be endorsed within the validity period, which is 30 days.

The original copy of the Veterinary Health Certificate must be provided when the animal or animal-origin product arrives at the customs or border inspection post. Due to the COVID-19 pandemic MinAF **“temporarily accepted”** Veterinary Health Certificates to be e-mailed to MinAF’s relevant regulatory inspection sections. The original Veterinary Health Certificates then had been provided within three months after import. **MinAF ended the temporary acceptance of Veterinary Health Certificate electronic copies on August 1, 2021. Currently, the original copy of the Veterinary Health Certificate must again be provided when the animal or animal-origin product arrives at the customs or border inspection post.**

According to the Turkish import regulation, export certificates for animals and animal products to Turkey must be signed by an official veterinarian in exporting countries two days prior to shipment. For dairy products, as an exception, MinAF accepts Veterinary Health Certificates endorsed by Agricultural Marketing Service’s (AMS) inspectors.

Please see the HS CODES of animal and animal sourced products which need to be accompanied by Veterinary Health Certificate in APPENDIX-III-A of this report.

Section V: Other Certification/Accreditation Requirements

MinAF requires importers to obtain **Control Certificates**, which are considered import pre-permissions and state whether the product is eligible for import, for animal, animal products, and certain plant products.

Please see the HS CODES of plant and plant products which require a Control Certificate before the import stage in APPENDIX II-B of this report.

For animal and animal sourced products which are subject veterinary controls, please see the HS CODES which require a Control Certificate before the import stage in APPENDIX III-B and the HS CODES which do not require a Control Certificate before the import stage in APPENDIX-III-C of this report.

To learn more information about import requirements that apply or are associated with the products being certified in conformity with Turkish food and agricultural laws and regulations, please see Section VI and Section X of 2022 Food and Agricultural Import Regulations and Standards (FAIRS) Annual Country Report for Turkey which is accessible [here](#).

APPENDIX-I: - Sample Phytosanitary Certificate

1 - Name and address of exporter		2 - PHYTOSANITARY CERTIFICATE NO: EC/TR A ORIGINAL	
3 - Declared name and address of consignee		4 - Plant Protection Organization of Turkey to Plant Protection Organization(s) of	
		5 - Place of origin	
6 - Declared means of conveyance		 REPUBLIC OF TURKEY MINISTRY OF AGRICULTURE AND FORESTRY	
7 - Declared point of entry			
8 - Distinguishing marks: number and description of packages: name of the product: botanical name of plants		9 - Quantity declared	
			
10 - This is to certify that the plants, plant products or other regulated articles described above:			
<ul style="list-style-type: none"> - have been inspected and/or tested according to appropriate official procedures, and - are considered to be free from the quarantine pests specified by the importing country, and - to conform with the current phytosanitary requirements of the importing country, including those for regulated non-quarantine pests, and - are deemed to be practically free from other pests. 			
11 - Additional declaration			
DISINFESTATION AND/OR DISINFECTION TREATMENT		18 - Place of issue	
12 - Treatment		Date	
13 - Chemical (Active Ingredient)		Name and signature of authorized officer	
14 - Duration and Temperature		Stamp of the Organization	
15 - Concentration		16 - Date	
17 - Additional Information			

Yasal Uyarı: Bitki Sağlık Sertifikasını sahte olarak düzenleyen, başkalarını aldatarak şekilde değiştiren veya kullanılan kişiler 5237 sayılı Türk Ceza Kanunu 204. Maddesine göre iki yıldan beş yıla kadar hapis cezası ile cezalandırılır.

Legal Notice: The person who arrange fraudulent Phytosanitary Certificate or change or use the Phytosanitary Certificate in such a way to deceive other people shall be punished with penalty of imprisonment up to from two and to five years in accordance with Article 204 of Turkish Penal Code numbered 5237.

FEDERAL	Bureau of the Department of the Treasury

APPENDIX-V

Some of the sample **Veterinary Health Certificates** are accessible at the hyperlinks below. Also the [FSIS Export Library](#) and [APHIS iregs](#) websites list animal and animal products which are eligible for export to Turkey and the corresponding certificates to be used.

[Queen Bees And Queen Bumble Bees \(Apis Mellifera And Bombus Spp.\) and Their Attendants,](#)
[Female Breeding Cattle,](#)
[Domestic Rabbits,](#)
[Registered Horses for Breeding and Production,](#)
[Ovine and Caprine \(Sheep and Goat\) Semen,](#)
[Breeding Bull,](#)
[Domestic Bovine Animals Intended For Fattening,](#)

In Vivo Derived Embryos of Domestic Animals of the Bovine Species,
Dairy Products,
Temporary Importation of Registered Horses for racing, competition and cultural events,
Sheep/Goat Intestines (Cleansed-Untreated),
Honey and Apiculture Products Intended for Human Consumption,
Domestic Dogs, Cats and Ferrets,
Poultry Meat,
Re-entry of Registered Horses for Racing, Competition and Cultural Events,
Animal Casings,
Treated Hides and Skins of Ungulates,
Live Ratites (large flightless birds),
Sheep's Untreated Wool,
Sheep's Treated Wool,
Semen of Domestic Animals of the Bovine Species Collected, Processed And Stored Before 31
December 2004,
Semen of Domestic Animals of the Bovine Species,
Primates,
Animal Casings for Export to the European Community,
Bumble Bees (Bombus Spp.) Bred Under Environmentally Controlled Conditions within Recognized
Establishments,
Fresh or Chilled Hides and Skins of Ungulates,
Certain Birds Other Than Poultry,
Fresh, chilled, frozen meat (carcass) of domestic bovine animals,
Ova and Embryos of the Ovine and Caprine Species,
Gelatin Intended for Human Consumption,
Collagen Intended for Human Consumption,
Egg Products for Human Consumption,
Fishery Products,
Day old Chicks Other Than Ratities,
Hatching Eggs of Poultry Other Than of Ratites,
Aquaculture Animals for Farming, Relaying, Put and Take Fisheries And Open Ornamental Facilities,
Ornamental Aquatic Animals Intended For Closed Ornamental Facilities,
Wild Carnivores,
Fish Oil Not Intended for Human Consumption to be Used As Feed Material or For Purposes Outside
The Feed Chain,
Processed Animal Protein Not Intended For Human Consumption, Including Mixtures and Products
Other Than Pet food Containing Such Protein,
Dog chews,
Processed Petfood Other Than Canned Petfood,
Canned Petfood,
Highly Refined Chondroitin Sulphate, Hyaluronic Acid, Other Hydrolyzed Cartilage Products, Chitosan,
Glucosamine, Rennet, Isinglass And Amino Acids Intended For Human Consumption,
Hay and Straw,
Animal by-products Intended for Manufacture of Pet Food,
Processed Manure, Derived Products from Processed Manure and Guano from Bats
