New Zealand

Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report

Approved By:
Hugh Maginnis, Agricultural Counselor

Prepared By:
Vinita Sharma, Marketing Analyst

Report Highlights:
This report outlines regulatory requirements for food and agricultural products exported to New Zealand. The sections on food laws, copyright and trademarks laws have been updated since the last report.
Section I: List of All Export Certificates Required By Government

Summary

The Ministry of Primary Industries (MPI) is the key organization that regulates food imported into New Zealand. In 2011, the New Zealand Food Safety Authority (NZFSA) and Biosecurity New Zealand (BNZ) merged with the Ministry of Agriculture and Forestry (MAF). In April 2012, the Ministry of Fisheries was then merged with the expanded MAF to create the Ministry for Primary Industries (MPI).

The MPI has the lead role in biosecurity protection (e.g. preventing unwanted pests and diseases being imported into New Zealand, and controlling, managing or eradicating them should they arrive). New Zealand has strict biosecurity rules and most unprocessed products cannot be imported into New Zealand unless an import health standard has been developed. New Zealand defines biosecurity as “the exclusion, eradication or effective management of risks posed by pests and diseases to the economy, environment and human health.” New Zealand’s biosecurity requirements cover terrestrial, freshwater and marine environments. Import health standards specify the biosecurity requirements that must be met for trade to occur.

In New Zealand, import health standards are based upon risk analyses, which assess either a commodity or a pest/pathway combination. Biosecurity New Zealand takes legislative requirements and international obligations into account when conducting risk analyses and developing import health standards. The principal document for all New Zealand import health standards is the Biosecurity Act (1993). The act provides for management of risks associated with imported goods such as produce, seeds and plants principally through import health standards. New Zealand also adheres to the guidelines on risk analysis developed under the auspices of the Interim Commission on Phytosanitary Measures operating within the framework of the International Plant Protection Convention, and the World Trade Organization Agreement on the Application of Sanitary and Phytosanitary Measures. Information on import health standards for specific products can be found http://mpi.govt.nz/law-and-policy/requirements/import-health-standards/.

Please see New Zealand Food and Agricultural Import Regulations and Standards (FAIRS) report on Food Laws, Food Labeling and Packing requirements for imported foods in New Zealand, reports can be found at: http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx

Export Certification Requirements
The table below provides export certificate requirements for many products exported to New Zealand from the United States.

(ii) undergone appropriate pest control activities that are effective against: *Monilinia fructigena* **OR**

(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America.

Please see page 371 of Import Health Standard on *Fresh Fruit and Vegetables* for more information.
Phytosanitary certificates:
The plums in this consignment have:
(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.
AND
(ii) undergone appropriate pest control activities that are effective against: Monilinia fructigena OR been sourced from an area free (verified by an official detection survey) from: Monilinia fructigena AND
(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America.

Please see page 374 of Import Health Standard on Fresh Fruit and Vegetables for more information.

Additional declaration required on the phytosanitary certificate required - Nectarine/Peach

The nectarines/peaches in this consignment have:
1. been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and
Forestry. **AND**

(ii) undergone appropriate pest control activities that are effective against those risk group 2 regulated pests specified by NZ MAF. OR
been sourced from an area free (verified by an official detection survey) from those risk group 2 regulated pests specified by NZ MAF.

**Note:** Combinations of treatment and area freedom are permissible for the aforementioned RG2 pests.

**AND**
(iii) treated in accordance with Appendix 1 (b) of the Workplan between NZ MAF and APHIS, USDA.

**AND**
(vi) treated in accordance with the measures specified by MAF Biosecurity New Zealand for the access of host material of *Drosophila suzukii* from the United States of America.

---

**Additional declaration required on the phytosanitary certificate are required – Pears (State of Washington)**

The pears in this consignment have:
(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.

**AND**
(ii) undergone appropriate pest control activities that are effective against: *Conotrachelus nenuphar*

OR
been sourced from an area free (verified by an official detection survey) from: *Conotrachelus nenuphar*
(iii) treated in accordance with Appendix 1(d) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America.

Please see Import Health Standard on Pears from the State of Washington for more information.

Additional declaration required on the phytosanitary certificate required – Pears (State of California)

APHIS must provide the following additional declarations to the phytosanitary certificates:
The pears in this consignment have:
(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.
AND
(ii) undergone appropriate pest control activities that are effective against: *Conotrachelus nenuphar*

OR
been sourced from an area free (verified by an official detection survey) from: *Conotrachelus nenuphar*

AND
(iii) treated in accordance with Appendix 1(b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health...
Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America.

Please see Import Health Standard on Pears from the State of California for more information.

APHIS must provide the following additional declarations to the phytosanitary certificates:
The pears in this consignment have:
(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND
(ii) undergone appropriate pest control activities that are effective against: Conotrachelus nenuphar OR
been sourced from an area free (verified by an official detection survey) from: Conotrachelus nenuphar AND
(iii) treated in accordance with Appendix 1(h) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America.

Please see section 2.2.2.4
Section II. Purpose of Specific Export Certificate(s)

See table in Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Section IV. Government Certificate’s Legal Entry Requirements

Entry requirements are set out on the Import Health Standards.
Original documents relating to the shipment must accompany each shipment. Most certificates are valid for one shipment only and are required to be issued by APHIS, USDA.

Section V. Other Certification/Accreditation Requirements

U.S. exporters are required to meet both biosecurity and food safety requirements. For more information on New Zealand’s food safety requirements, please visit [http://www.foodsafety.govt.nz](http://www.foodsafety.govt.nz). Please also refer to the FAS/Wellington report entitled Food and Agricultural Import Regulations & Standards which can be found at: [http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx](http://gain.fas.usda.gov/Lists/Advanced%20Search/AllItems.aspx).
