Voluntary Report – Voluntary - Public Distribution

Date: February 11, 2020

Report Number: BE2020-0008

Report Name: Food and Agricultural Import Regulations and Standards Country Report

Country: Belgium

Post: Brussels USEU

Prepared By: Sophie Bolla

Approved By: Jennifer Lappin

Report Highlights:

This report should be read in conjunction with the EU-28 Food and Agricultural Import Regulations and Standards (FAIRS) report written by the U.S. Mission to the EU (GAIN report E42019-0048). This report focuses on the import regulations and standards that are not harmonized at EU-level or where Belgium varies.
DISCLAIMER: This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Brussels, Belgium, for U.S. exporters of domestically produced food and agricultural products. This report should be read in conjunction with the Food and Agricultural Import Regulations and Standards (FAIRS) – Country Report written by the U.S. Mission to the EU (GAIN report E42019-0048).

While every possible care was taken in the preparations of this report, information provided may not be completely accurate either because policies have changed since its preparation or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign buyers, who are in the best position to research such matters with local authorities, before any goods are shipped. Final approval of any product is subject to the importing country’s rules and regulations as interpreted by border officials at the time of product entry.

Section IX. Import Procedures ...........................................................................................................13
Appendix I. Government Regulatory Agency Contacts .................................................................15
Appendix II. Other Import Specialist Contacts ................................................................................16
Executive Summary

This report provides an overview of food and feed legislation currently in force in Belgium. Please note that, as a member of the European Union, Belgium follows requirements laid down in European-wide legislation. However, in some specific cases, Belgian legislation differs from the European one. Special attention should be paid to languages requirements, food supplements and requirements for processing aides.

Section I. General Food Laws

General principles such as the precautionary principle are set out in the European Union (EU)’s General Food Law Regulation 178/2002. Although most food legislation is harmonized at the EU-level, national Member State rules may exist in addition to EU rules or in cases where EU-harmonization is not yet finalized. U.S. exporters should be aware that in such cases different rules may apply in different Member States. National measures exist, for example, for certain food contact materials, botanical ingredients in food supplements, minimum and maximum levels for vitamins and minerals, country of origin labeling and for official control fees.

Belgium

Member State officials are responsible for enforcing EU food legislation. The European Commission monitors Member States compliance with EU law and publishes an annual report on Member States performance. The European Commission has the authority to initiate legal action in the Court of Justice of the EU against Member States that are not complying with EU Directives and Regulations. “Directives” define the result that must be achieved but leave to each Member State the choice of form and methods to transpose the directive into national laws. Regulations are binding in their entirety and automatically enter into force on a set date in all Member States. Belgium, as a member of the EU, conforms to all EU regulations and directives. There may be some variation among Member States in applying EU harmonized legislation.

The Belgian Food and Drugs Law is called “Wet betreffende de bescherming van de gezondheid van de gegevens op het stuk van de voedingsmiddelen en andere produkten / Loi relative à la protection de la santé des consommateurs en ce qui concerne les denrées alimentaires et les autres produits”. This law from 1977 provides the Belgian regulatory framework for all food products. It applies to domestically produced and imported food and other products including tobacco and cosmetic products. The main objective of this law is (1) health protection, (2) product safety, (3) ensuring that consumers have adequate and correct information and (4) promotion of fair trade. All amendments and supplementary food laws are published in “Het Belgisch Staatsblad/Le Moniteur Belge”, which can be consulted on www.staatsblad.be (not available in English).

Belgium has a federal political structure. Food policy and safety are regulated at the federal level while agriculture policy is regulated at the regional level (Flanders and Wallonia). The Directorate-General for control of the Belgian Federal Agency for the Safety of the Food Chain (FAVV/AFSCA) has the responsibility for food controls. Laying down implementing and enforcing measures related to food safety, animal health and plant protection are within the domain of the FAVV/AFSCA. The Federal
Public Service (FPS) Health, Food Chain Safety and Environment is in charge of policy and legislation on food product standards, contaminants and animal and plant health. Quality schemes such as geographical indications (GIs) and traditional specialties guaranteed fall under the competence of the FPS Economy, SMEs, Self-Employed and Energy. The Belgian Minister of Agriculture is responsible for the FAVV/AFSCA, the Animal, Plant and Food Directorate General of the FPS Health, Food Chain Safety and Environment and for the FPS Economy, SMEs, Self-Employed and Energy. For more information see [www.federal-government.be/en](http://www.federal-government.be/en).

### Section II. Labeling Requirements

#### A. General requirements

The standard U.S. label, including the nutrition facts panel, fails to comply with EU labeling requirements. The EU’s “Food Information to Consumers (FIC)” regulation 1169/2011 is applicable to all pre-packaged food and drink products marketed in the EU, including those imported from non-EU countries.

For an overview of the EU-harmonized labeling requirements see [EU FAIRS report](http://www.federal-government.be/en) update. Member State specific requirements are listed below.

#### 4. Language requirements

There are 3 official languages in Belgium: Dutch, French and German. Belgium covers 4 language areas. The Dutch language area is located in the Northern part of Belgium whereas the French language area is located in the South. Brussels, the capital of Belgium, is bi-lingual. Finally, there is a small German language area located in the east and borders with Germany. Language has been a very sensitive issue for many decades. This language sensitivity is reflected in the labeling requirements. The label has to be in the language or languages of the language area where the product is being marketed.
Considering the size of the market, most food companies only use bi-lingual Dutch/French or tri-lingual Dutch/French/German labels. FAS/Brussels recommends that U.S. exporters adopt the latter option, as it will allow for products to be marketed not only in Belgium but also in France, Germany, the Netherlands, Austria, Switzerland and Luxembourg, or roughly a third of all EU consumers.

7. Minimum Durability

Annex X to the “Food Information to Consumers (FIC)” regulation 1169/2011 sets out rules for the indication of the date of minimum durability, use-by date and date of freezing. The use-by date must be indicated on individual pre-packed portions. The durability date and the date of (first) freezing preceded by the words “frozen on” is required on: labels of frozen meat, frozen meat preparations, and frozen unprocessed fishery products.

- The date shall be preceded by the words:
  ‘Best before’
  ‘Best before end’
  In Belgium:
  ‘Tenminste houdbaar tot’
  ‘Tenminste houdbaar tot einde’
  ‘A consommer de préférence avant le’
  ‘A consommer de préférence avant fin’
  ‘Mindestens haltbar bis’
  ‘Mindestens haltbar bis Ende’

- The ‘use by’ date shall be preceded by the words:
  ‘Use by’
  ‘Te gebruiken tot’
  ‘A consommer jusqu’au’
  ‘Zu verbrauchen bis’

- The date of freezing or the date of first freezing shall be preceded by the words:
  ‘Frozen on’
  ‘Ingevroren op’
  ‘Produit congele le’
  ‘Eingefroren am’

12. Nutrition Declaration

The EU’s FIC regulation 1169/2011 sets out EU-harmonized rules on nutrition labeling but allows Member States to recommend the voluntary use of additional nutritional labeling schemes.

In August 2018, the Belgian government announced the introduction of the voluntary “Nutri-Score” labeling scheme. Even though, the scheme is voluntary, many Belgian retailers require the Nutri-Score for marketing purposes. For detailed information, see GAIN report “Belgium adopts Nutri-Score for front of pack nutritional labeling.”
13. Stick-on labels

It is allowed in Belgium to use stick-on labels on pre-packed consumer products.

14. Samples

Samples of products that are not approved to export to the EU for research purposes or to be handed out at trade shows can still in some cases be shipped to Belgium. This process can be expensive and burdensome. An application form to ask for an exemption can be requested at the Federal Agency for the Safety of the Food Chain (FAVV) by sending an email to import.export@favv.be.

Exceptions:

The FIC regulation allows Member States to deviate from EU rules. Article 39 of the FIC regulation sets conditions for Member States to adopt additional mandatory national measures such as for example country of origin labeling requirements.

B. Other Specific Labeling Requirements

6. Special Use Foods

On July 20, 2016, the EU’s “foods for specific groups” rules set out in European Parliament and Council Regulation 609/2013 became applicable. The scope of this regulation is limited to infant formula, follow-on formula, processed cereal-based food and baby food, food for special medical purposes and total diet replacement for weight control. Foods that no longer fall within the scope of Regulation 609/2013, such as for example meal replacements and low-calorie cereal bars will be regarded as “normal” foods and must comply with the Food Information to Consumers Regulation 1169/2011, Nutrition and Health Claims Regulation 1924/2006 and Fortified Foods Regulation 1925/2006. For detailed information see http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/eu-labeling-requirements/dietetic-foods/.

New EU rules on “total diet replacement for weight control” will become applicable on October 27, 2022. Commission Delegated Regulation 2017/1798 sets out specific compositional and labeling requirements as well as a notification procedure under which food business operators are required to send copies of their product labels to the competent authority of each Member State where the product will be marketed.

E-mail: fostplus@fostplus.be

C. Material in Contact with Food Stuffs

For detailed information see http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/food-contact-materials/

Belgian rules on food contact materials are established in “Koninklijk besluit van 11 mei 1992 betreffende materialmen en voorwerpen bestemd om met voedingsmiddelen in aanraking te komen” / “Arrêté royal du 11 mai 1992 concernant les matériaux et objets destinés à entrer en contacts avec les denrées alimentaires.” In September 2018, Belgium notified to the European Commission a proposed decree on release limits for metals and alloys in food contact materials.

Contact information with regard to the submission of applications for authorization can be downloaded from the European Commission website at https://ec.europa.eu/food/safety/chemical_safety/food_contact_materials/authorisations_en.

Federal Agency for the Safety of the Food Chain
Ms. Caroline De Praeter
CA Botanique - Food Safety Center
Boulevard du Jardin Botanique 55
B-1000 Brussel, Belgium
Several EU Member States have introduced national bans on the use of Bisphenol-A (BPA) in plastic food contact materials and other materials such as coatings. In September 2012, Belgium passed a ban on the use of Bisphenol-A, or BPA, in the packaging of food products for children less than three years old and also in plastic articles like spoons and plates for the same age group. The ban went into force on January 1st of 2013. Diverging laws in some EU Member States have created uncertainty and confusion as to what products that use or contain BPA can be placed on the market. In September 2018, the European Food Safety Authority announced it would start evaluating recent toxicological data on BPA. The final report is expected in 2020.

Section IV. Food Additive Regulations

A. Additives: see [EU FAIRS report](http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/food-additives/) update

C. Enzymes

EU Regulation 1332/2008 on food enzymes harmonized the rules on food enzymes for the first time in the EU. Food enzymes are in the process of being evaluated for safety by the European Food Safety Authority (EFSA). Until the EU list of food enzymes is drawn up, national rules on the marketing and use of food enzymes and food produced with food enzymes continue to apply in EU countries. Belgium does not have specific national legislation on food enzymes.

D. Processing Aids

EU harmonized rules exist only for certain categories of processing aids: a list of extraction solvents allowed in the production of foodstuffs and food ingredients, along with their conditions of use has been established in Council Directive 2009/32/EC. Belgian legislation on processing aids is established in “Koninklijk besluit van 25 november 1991 betreffende bij de productie van voedingsmiddelen gebruikte extractiemiddelen” / “Arrêté royal du 25 novembre 1991 concernant les agents de modification des aliments utilisés pour la production de denrées alimentaires”.
Section V. Pesticides and Other Contaminants
For detailed information see https://www.usda-eu.org/eu-early-alert/pesticides/

A. Pesticides

EU Regulation 1107/2009 sets out rules for the authorization of plant protection products. For the authorization/withdrawal of plant protection products, the EU is divided into three zones. Belgium together with The Netherlands, Czech Republic, Germany, Ireland, Luxembourg, Hungary, Austria, Poland, Romania, Slovenia, Slovakia and the United Kingdom fall in Zone B – Centre (see Annex I to regulation 1107/2009). The authorization of plant protection products fall within the competence of the FPS Health, Food Chain Safety and Environment. For detailed information see http://fytoweb.be/en.

For the renewal of active substances whose approval expired by December 31, 2108 at the latest, the Commission allocated for each active substance a “rapporteur” and “co-rapporteur” Member State responsible for the evaluation of the substance. An updated list is published in Commission Implementing Regulation 2016/183.

In August 2019, the Belgian government proposed a law prohibiting the placing on the market of five substances from the neonicotinoid family, including two that can still be used in the rest of the EU: thiacloprid (authorized for use in the EU until March 2020) and acetamiprid (authorized for use in the EU until 2033). Final adoption of the law is expected for 2020.

B. Contaminants: see EU FAIRS report update

Section VI. Other Requirements, Regulations and Registration Measures

A. Facility Registration

The EU approves establishments to ship products of animal origin based on submissions from U.S. government agencies. Only products processed in approved establishments may enter the EU. Detailed information on approved U.S. establishments is available on our website at http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/certification/. Non-EU country lists per sector and per country
are published on the European Commission’s website

B. Product Registration

The introduction of special use foods needs to be notified to the Member State where the food is sold. Exporters of vitamin-enriched foods or nutritional supplements are especially advised to check for the existence of specific Member State registration or notification requirements.

The competent authority for Belgium:
FPS Health, Food Chain Safety and Environment
Department for Foods, Animal Foods
and Other Consumption Products (DG for Animals, Plants and Foodstuffs)
Place Victor Horta, 40 Boîte 10
Bloc II - 7° étage
B-1060 Bruxelles
Tel: +32(0)2.5247351-52
E-mail: apf.food@health.fgov.be

C. Inspections

In Belgium the Federal Agency for the Safety of the Food Chain (FAVV/AFSCA) is responsible for the inspections. Criteria for laboratories conducting food controls have been harmonized but it is the Member States’ responsibility to designate laboratories that are allowed to perform analyses. A list of authorized laboratories can be found on FAVV’s website at http://www.favv-afsca.be/laboratoria/.

Federal Agency for the Safety of the Food Chain (FAVV/AFSCA)
DG Laboratories
Director General Mr. Bert Matthijs
Phone: +32 (0)2 211.87 25
CA-Botanique - Food Safety Center, 4th Floor
Boulevard du Jardin botanique 55
1000 Brussels, Belgium

Section VII. Other Specific Standards

A. Novel Foods
For detailed information see http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/novel-foods/

The new EU framework regulation 2015/2283 on Novel Foods became applicable on January 1, 2018. For questions relating to the novel food status of a product or ingredient, please contact:

FPS Health, Food Chain Safety and Environment
Department for Foods, Animal Foods
and Other Consumption Products (DG for Animals, Plants and Foodstuffs)
D. Fortified Foods

EU Regulation 1925/2006 sets out harmonized rules on the addition of vitamins and minerals to food. However, maximum permitted levels of vitamins and minerals are not yet harmonized and still subject to Member States’ national rules. The Belgian decree on enriched food establishes maximum levels for the addition of vitamins and minerals, a pre-market notification procedure and labeling requirements.

Point of contact in Belgium:
FPS Health, Food Chain Safety and Environment
Department for Foods, Animal Foods
and Other Consumption Products (DG for Animals, Plants and Foodstuffs)
Tel: +32 (0)2 524 7351/52
E-mail: apf.food@health.belgium.be

F. Food Supplements

EU Directive 2002/46/EC only sets out EU-harmonized rules on labeling and vitamins and minerals that may be used in food supplements. Key aspects in the marketing of food supplements such as minimum and maximum levels of vitamins and minerals or the use of other substances such as botanical extracts remain the competence of the Member States. Before marketing food supplements in Belgium, a notification file must be submitted providing the following information:

- A complete qualitative and quantitative list of ingredients
- Nutritional analysis
- Data about the presence and non-toxicity of the active substances
- Product label

Belgium has a long tradition in the use of plants in food supplements. Botanicals in Belgium are regulated since 1997 under a Royal Decree relating to the manufacture and trade in foods composed of or containing plants or plant preparations. Since then, the safety of more than 1000 plants and their parts has been assessed by the Belgian authorities. Exporters of food supplements containing botanicals tend to notify their products in Belgium first as obtaining a Belgian authorization opens the door to other Member States’ markets under the mutual recognition principle. GAIN report “Exporting food supplements to the European Union” provides a detailed overview of EU-harmonized and non-harmonized rules.

On February 10, 2017, Belgium published a revision of its lists of botanicals for use in food and food supplements in the Belgian Official Journal. The Royal Decree, published in French and Dutch, updates three lists:
- List of plants prohibited for use in food due to their toxicity
- List of edible mushrooms
- List of plants approved for use in food supplements, with conditions

For detailed information, see GAIN report “Belgian Decree Sets New Conditions for Plants in Food Supplements.”

On November 29, 2018, Belgium published a decree setting new maximum limits for caffeine, lutein, lycopene and red yeast rice in food supplements. Products containing red yeast rice must also include a mandatory warning on their packaging concerning the suitability of the product for specific populations. As a transitional measure, food supplements which were placed on the market or labeled before November 29, 2018, and which do not comply with the provisions of the new decree, may continue to be marketed until exhaustion of stocks and until October 26, 2019. However, the transitional measure does not apply to supplements with red yeast rice. For these products, the new decree applies immediately.

G. Irradiated Foodstuffs

Harmonization of EU rules on food irradiation has been slow and only a few products have so far received EU-wide approval. Until the EU positive list is expanded, national authorizations continue to apply. A list of Member State authorizations of food and food ingredients which may be treated with ionizing irradiation is available on the European Commission’s website.

Any foodstuff which has been treated with ionising radiation must bear one of the following indications:

<table>
<thead>
<tr>
<th>In Dutch:</th>
<th>In French:</th>
<th>In German:</th>
</tr>
</thead>
<tbody>
<tr>
<td>- &quot;doorstraald&quot;;</td>
<td>- “traité par rayonnements ionisants”;</td>
<td>- “bestrahlt”;</td>
</tr>
<tr>
<td>- &quot;door straling behandeld&quot;;</td>
<td>- “traité par ionization”;</td>
<td>- “mit ionisierenden Strahlen behandelt”;</td>
</tr>
<tr>
<td>- &quot;met ioniserende straling behandeld&quot;;</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Section VIII. Trademarks, Brand Names and Intellectual Property Rights

A. Trademarks

In the EU, trademarks can be registered at the national, regional or EU level. Trademarks registered at the national level are protected in the EU Member State of registration only. Applications must be
submitted directly to the relevant national Intellectual Property (IP)-office (full list of national offices). Currently, there is only one regional-level IP office in the EU, i.e. the Benelux Office which registers trademarks for three Member States: Belgium, the Netherlands and Luxembourg. Detailed information on the registration of trademarks is available on the website of the European Union Intellectual Property Office (EUIPO).

Applications for trademark registration in the Benelux can be sent to:

Benelux Merkenbureau (Benelux Trademark Office)
Bordewijklaan 15
2591 XR The Hague, the Netherlands
Phone: +31-(0)70-349 1111.

Section IX. Import Procedures

C. Import duties

Information on Belgium’s customs authorities can be found at https://financien.belgium.be/nl/douane_accijnzen.

It is possible to obtain Binding Tariff Information (BTI) from a Member State’s customs authority to get the proper product classification. Through this system, traders know in advance the tariff classification of the goods they intend to import. BTI is legally binding in all the member states. Information on how to obtain a BTI can be downloaded from the European Commission’s Taxation & Custom’s website at https://ec.europa.eu/taxation_customs/business/union-customs-code/ucc-guidance-documents_en#binding_tariff_information.

Applications for BTIs should be addressed to:

Centrale administratie der douane en accijnzen Dienst Nomenclatuur (Tarief),
Landbouw en Waarde Cel BTI
North Galaxy – Building A – 8th Floor
Koning Albert II-laan 33
1030 Brussel, Belgium

The Import Process:

- **Pre announcement**: by Common (Veterinary) Entry Document, issued by agent. Commission Decision 2009/821/EC establishes a list of border inspection posts approved to carry out veterinary checks;
- **Documentary Check**: examination of the original required documents that accompany the consignment based on model certificate according to EU legislation, carried out by Customs based on an agreement between Ministry of Agriculture and Ministry of Finance;
- **Identity Check**: to ascertain that the products correspond to the information given in the accompanying certificates or documents;
- **Physical Check**: check on the product itself to verify compliance with food or feed law.
Appendix I. Government Regulatory Agency Contacts

All Belgian legislation is published in the Belgian official journal "Het Belgisch Staatsblad"/"Le Moniteur Belge". This journal is edited by the Federal Public Service Justice and can be consulted online in Dutch and French at [www.staatsblad.be](http://www.staatsblad.be) or [www.moniteur.be](http://www.moniteur.be).
