Israel

Food and Agricultural Import Regulations and Standards Report

FAIRS Export Certificate Report 2018

Approved By:
Ali Abdi, Agricultural Minister Counselor

Prepared By:
Jessica Sullum Shay, Marketing Specialist, and Bret Tate, Agricultural Attaché

Report Highlights:
The report lists and describes certificates that should accompany food and agricultural products to Israel. It also includes the purpose of each certificate and the governmental agency responsible. In general, an original invoice, bill of lading, packing list, weighing list, health certificate, batch number certificate, invoice declaration, and insurance certificate are required to accompany any shipment. An export certificate matrix is included in this report. This report supplements the Israel Food and Agricultural Import Regulations and Standards (FAIRS) – Country Report 2018.
Disclaimer:
This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Tel Aviv, Israel for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY’S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

### Sensitive Products

1. Export certificates are issued by a number of US agencies, depending on product. Please see example certificates in Appendix III: FDA – Processed Products; AMS – Dairy Products; FGIS – Grains and Oilseeds; FSIS – Meat and Poultry; NOAA – Fish and Seafood Products.
2. Note that the Certificate of Origin for Exporting to Israel has been replaced with an “Invoice Declaration”, see Certificate of Origin update.
3. Note that any processed products containing meat or poultry must meet the same requirements listed under Meat, Poultry, and Products.
4. For additional requirements of meat, poultry, and products see the FSIS Export Library.
Israel divides food products broadly into sensitive and non-sensitive products. Israeli authorities will have more stringent certificate requirements for those goods listed as sensitive. While non-sensitive products may require only a sanitary or health certificate, sensitive products could require additional certification such as a manufacturing license (ISO 9001 or 22000), GMP certificate, or a certificate of thermal treatment for low acid canned goods. A list of sensitive food products can be found in Appendix I. Exporters should work closely with Israeli importers on verifying and meeting certificate requirements for sensitive products.

**Animal Feeds**

Israel groups animal feeds into ten categories, each of which maintains a distinct certificate requirement. Exporters of these products should be aware of the group that includes their specific product and the certificate requirements for that group of products. Table 2 lays out the groups and their requirements. Appendix II includes more detail regarding the definition of each feed group.

Note that the requirement for a Plant Accreditation Certificate can generally be met with ISO 9001/2000 standard or similar (GMP, HACCP or equivalent).

SECTION II: Purpose of Specific Export Certificate

(See Section I above)

SECTION III: Specific Attestations Required on Export Certificates

Beef and Beef Products
Beef and beef products exported from the US must be accompanied by an Export Certificate of Wholesomeness (FSIS 9060-5) and a Letterhead Certificate issued by the USDA/FSIS veterinary inspector at the U.S. slaughter facility. Both certificates must be signed and stamped by the attending veterinarian.

The Export Certificate of Wholesomeness must attest the following:

- I, the undersigned official veterinarian, hereby certify that the meat/offals/meat products specified above are from animals that were approved for export to Israel following an antemortem and postmortem veterinary inspection as provided by law and regulations of the exporting country.
- The said products conform with the requirements and procedures for the approval of slaughterhouses, meat boning, and cooling facilities for the export of meat and offals to Israel and are at the time of loading fit for human consumption.

If exporting bovine brain, spinal cord, thymus, spleen, and intestinal tract the following attestation must be included:

- The animals from which these products derived had not been fed with ingredients of animal origin (except milk products).

The Letterhead Certificate must attest to the following:

- The United States complies with the conditions of a Negligible BSE risk country by the OIE.
- The cattle from which the beef and beef offal were derived were born in the United States or legally imported.
- The cattle from which the beef and beef offal were derived were born after the date from which the ban on the feeding of ruminants with meat and bone meal and greaves derived from ruminants had been effectively enforced.
- The beef and beef offal originate from cattle from a country or zone/county free of Foot and Mouth Disease without vaccination since birth or the previous 3 months, or were legally imported and a Rift Valley fever free country or zone/county since birth or for the 30 days prior to slaughter.
- The beef and beef offal were subject to testing for chemical residues in accordance with the FSIS National Residue Program sampling plans.
Note that these certificates are in addition to the required kosher slaughter requirements and certifications. Exporters of beef or beef products are urged to work closely with Israeli importers, as well as check the FSIS Export Library for the latest updates.

**Live Animals**

Israel requires that live animals be accompanied with a veterinary health certificate issued not more than ten days prior to arrival. That certificate should be issued by a veterinarian that is accredited by the USDA and endorsed by USDA/APHIS after issuance. More details on exporting pets can be found here.

The veterinary health certificate for dogs and cats must attest that:

- **At the time of examination, it did not exhibit any symptoms of contagious or infectious diseases**
- **They have been vaccinated against rabies no more than one year and no less than 30 days prior to their arrival in Israel.**
- **Not less than 30 days after the rabies vaccination, a serological test for the animal, carried out on a sample taken by an approved veterinarian and tested in an OIE-approved laboratory, which states that the rabies neutralizing antibody titer was equal to or greater than 0, 5 IU/ml. The rabies titer test is valid for all lifelong of the animal if the dog/cat is vaccinated against rabies annually or according the vaccine manufacture instruction.**

**SECTION IV: Government Export Certificate’s Legal Entry Requirements**

The general principles of certification for a consignment of animals or products of animal origin are detailed below and can also be found in Appendix III.

**General Principles of Certification:**

- The representative of the competent authority of dispatch issuing a certificate to accompany a consignment of animals or animal origin must sign the certificate and ensure that it bears an official stamp. This requirement applies to each sheet of the certificate if it consists of more than one.
- Certificates must be drawn up in English. However, it is possible to certify bilingually, the official language of the exporting country and English.
- The original version of the certificate must accompany consignments on entry into Israel.
- Certificates must consist of:
  - A single sheet of paper; or
  - Two or more pages that are part of a single and indivisible sheet of paper; or
  - A sequence of papers numbered so as to indicate that it is a particular page in a finite sequence (for example, ‘page 2 of 4’).
- Certificates must bear a unique identifying number. Where the certificate consists of a sequence of pages, each page must indicate this number.
- The original veterinary health certificate must bear the word “ORIGINAL”. Copies of the veterinary health certificate must bear the word “COPY”.
- The certificate must be issued before the consignment to which it relates leaves the control of the competent authority of the country of dispatch.
- The color of the stamp and signature must be different then to that of the other particulars in the certificate.
- Near each addition or correction, a signature and an official stamp must be added. Any deletion in the certificate should be in a manner that the deleted should be readable.

**SECTION V: Other Certification Requirements to Ensure Market Entry**

**Invoice Declaration**
The Certificate of Origin for Exporting to Israel has been replaced with an “Invoice Declaration”, see Certificate of Origin update.

**Animal Feed**
Importation of animal feed is regulated under the 2014 Control of Animal Feed Law (Hebrew). The law regulates the production and marketing of animal feed.

**Live Animals (including semen and embryos)**
Importation of Live Animals (including semen and embryos) is regulated under Animal Disease Regulations (Imports of Animals) 1974. Further details on the importation of pets are available in Section III.

**Other Products of Animal Origin**
The importation of products of animal origin is regulated under the Animal Disease Regulations (Import and Export of Animal Products) 1988.

For the purpose of these regulations, *animal products* are considered the carcass of animal, inclusive of any part of an animal including blood and its components, skin, hide, bones, internal organs, hooves, horns, wool, hair, bristles, feathers, dung, and including meal, processed fat, and other products derived from animal products, or material containing any such part used for the feeding of animals or the preparation of animal feed.

**Food**
Importation of food is regulated under the Public Health Protection (Food) Law 2015. Food imports to Israel can be broadly divided into two categories: sensitive and non-sensitive products. A list of sensitive food products can be found in Appendix I. The importation of sensitive food products often requires specific analysis, for instance in the case of milk products the Certificate of Analysis must include a phosphate and microbiological analysis.

**Plants and Plant Products**
Under Israeli plant regulation, certain low-risk plant materials may be imported without a phytosanitary certificate. In these cases, the products are required to be accompanied by an invoice declaration. The specific products that are eligible for the exception are enumerated in Figure 1. Exporters that believe their products may be eligible for this exemption are encouraged to review Israeli Plant Protection Regulations (Plant Import, Plant Products, Pests and Regulated Articles) - 2009 and work closely with Israeli importers.

**Figure 1: Goods Requiring only a Certificate of Origin**

---

5 As noted earlier, Israel no longer requires a Certificate of Origin from the U.S. An “Invoice Declaration” replaced the Certificate of Origin. However, the requirement stands for all other countries.
For further information on the import procedure and requirements please refer the latest Israel FAIRS Country Report, Section IX: Import Procedures.

GENERAL PRINCIPLES OF CERTIFICATION FOR CONSIGNMENTS OF ANIMAL OR PRODUCTS OF ANIMAL ORIGIN

STATE OF ISRAEL
MINISTRY OF AGRICULTURE AND RURAL DEVELOPMENT
VETERINARY SERVICES & ANIMAL HEALTH

General principles of certification

1. The representative of the competent authority of dispatch issuing a certificate to accompany a consignment of animals or products of animal origin must sign the certificate and ensure that it bears an official stamp. This requirement applies to each sheet of the certificate if it consists of more than one.

2. Certificates must be drawn up in English. However, it is possible to certify bilingually, the official language of the exporting country and English.

3. The original version of the certificate must accompany consignments on entry into Israel.

4. Certificates must consist of:
   (a) a single sheet of paper; or
   (b) two or more pages that are part of a single and indivisible sheet of paper; or
   (c) a sequence of pages numbered so as to indicate that it is a particular page in a finite sequence (for example, ‘page 2 of 4 pages’).

5. Certificates must bear a unique identifying number. Where the certificate consists of a sequence of pages, each page must indicate this number.

6. The original veterinary health certificate must bear the word "ORIGINAL". Copies of the veterinary health certificate must bear the word "COPY".

7. The certificate must be issued before the consignment to which it relates leaves the control of the competent authority of the country of dispatch.

8. The color of the stamp and signature must be different than to that of the other particulars in the certificate.

9. Any addition or correction a signature and an official stamp must be added.

10. Any deletion in the certificate should be in a manner that the deleted should be readable.

General principles of certification
