Food Processing Ingredients

Food Processing Ingredients 2014

Approved By:

Ali Abdi

Prepared By:

Fahwani Y. Rangkuti and
Thom Wright

Report Highlights:

The Indonesian food processing industry will serve a population of 255 million in 2015 and offer significant market potential for U.S. food and ingredient suppliers. In 2013, the product value of Indonesia's large and medium food and beverage processing industry was \$70.6 billion (IDR 745 trillion). The Indonesian food processing industry produces food products catering to all levels of consumers. Several factors contributing to the growth of the food processing industry are the introduction of new flavors and products with variant package sizes, growing middle class, aggressive promotional activities, growth of modern retail outlets, and growing health awareness. U.S. exporters face competition from neighboring ASEAN countries, China, Australia, New Zealand, and Europe.

Jakarta

Executive Summary:

I. MARKET SUMMARY

The Indonesian food processing industry offers significant market potential for U.S. food and ingredient suppliers, serving a population of 255 million people in 2015. In 2013, the product value of Indonesia's large and medium food and beverage processing industry was \$70.6 billion. (Indonesian Rupiah (IDR) 745 trillion). Due to strengthening US dollar/IDR exchange rate, 2013 values (in U.S. dollars) decreased from \$78.1 billion (IDR 736 trillion) in 2012.

According to the National Statistical Agency (BPS), there were approximately 6,200 large and medium-sized producers with 877,000 employees and 1.215 million micro and small scale producers with 3.389 million employees in 2013. Micro and small scale producers include home industries and products sold in small roadside restaurants, retailer kiosks called warungs, and pushcarts called kaki limas. Micro and small scale producer revenue was estimated at \$18.7 billion (IDR 197 trillion) in 2013.

Several factors contributing to food processing industry growth are the introduction of new products, flavors and package sizes; growing middle class, aggressive promotional activities; growth of modern retail outlets; and growing health awareness. The Government of Indonesia (GOI) actively encourages growth in the food processing industry.

In 2013, packaged foods sales growth ranged from 4.84 to 10.15 percent in volume (except for snack bars at 24.76 percent and meal replacements at 40.41 percent). Packaged food growth is expected to continue. In addition, more women in urban areas are entering the workforce and prefer the convenience of processed food products. These consumers seek practical food products that are affordable and offer health attributes such as weight management.

Indonesian ties to Europe are strong, influencing tastes and manufacturing methods. Australian, U.S., Korean, and Japanese packaged foods, however, are also common. In Jakarta, which is home to about one-third of the upper and middle class, the growing Asian expatriate community is bringing new Asian-style foods and flavors.

The growing middle class is also driving the food industry to diversify brands, and expand the range of economical and premium products. The middle class population grew from 37 percent in 2004 to 56.7 percent in 2013. This group spends \$2 to \$20 a day ("Satu Dasawarsa Membangun Untuk Kesejahteraan Rakyat – A Decade of Development for People Welfare" - Cabinet Secretary April 2014). The food processing industry is challenged by the increasing prices of raw materials, packaging materials, and energy.

Healthy eating is becoming more popular among educated consumers. This is particularly true amongst

those who have lived abroad or were exposed to western-style products by newspapers, magazines, and television. Food manufacturers are responding to the demand for healthier products by providing products with heightened vitamin content, healthier ingredients, lower sugar, cholesterol and fat content. Wheat flour, dairy products, noodles, cookies, and frozen processed chicken fortified with minerals and vitamins are commonly available.

Other products that are growing in popularity include fruit juice, snack bars, breakfast cereals, fresh and pasteurized milk, ice cream, yogurt, pasta, frozen processed food (nuggets, sausages, meatballs, etc.) and frozen snacks, such as shumai, chicken and shrimp puffs, spring rolls, dumplings, and croquettes.

All ages and income levels enjoy snacking. Giving food as a gift is a tradition in Indonesia and remains popular. Since the large majority of Indonesians are Muslim, most foods are produced using methods and products that meet halal requirements.

Soft drink industry has grown in the past few years. Changing lifestyles and a new emphasis on socializing after office hours and school encourages this trend. New products and variants with attractive packaging and flavor have been launched. Interest in healthier products is driving fruit juices, package coconut water, tea and sport/energy drinks. Demand for instant coffee continues to expand.

Food processors are differentiating products for different markets and demands. For example, premium packaging is offered as well as small packs for price sensitive consumers. Private labels are also growing and are easily found on supermarket shelves. Food packaging oriented to the food service industry is being developed for the growing of food service sector. This supports the preference of eating out for family events, socializing and business purposes, as well as catering to families that have less time to prepare daily meals at home. Recently, several food processors (such as Cimory, Magnum café and Richese) have expanded their businesses to cater to eating out. This trend is expected to continue in 2015.

Small roadside restaurants (called Warungs) and kaki limas are ubiquitous and provide a variety of meals and popular snacks for Indonesians. U.S. soybeans and beef offals (heart) are popular ingredients for traditional dishes such as tempe and bakso (meat balls). Homemade soy milk in single-serving plastic bags is popular in both urban and rural areas. Soymilk in UHT packaging is found increasingly on supermarket shelves. Warung and kaki limas also drive sales of processed food in small and individual packages in the confectionery, bakery, sweet & savory snack and dairy categories.

Fresh bakery products sold in shopping areas and malls are popular as gifts and snacks for the middle and upper classes. Indonesians also visit high-end retail food stores to buy small packages of imported snacks.

Rice is a staple eaten at every meal. However, noodles from imported wheat, especially instant noodles, are a popular substitute and wheat consumption continues to grow. Dairy ingredients such as milk powder are increasingly used as a food processing ingredient or are used to mix with and fresh milk. Indonesia currently produces about 25 percent of its milk requirement.

Indonesian importers are sensitive to foreign exchange fluctuations and the fall of the Rupiah's value in late 2013 has adversely affected imports. Other threats to imports include the GOI's trade protectionist

measures, and inconsistent and often confusing regulations. Since 2011, Indonesia’s Ministry of Trade (MOT), and their FDA-equivalent National Agency of Drug and Food Control (BPOM), issued new requirements for packaged food products and ingredients. Animal-based foods and horticultural products also face import permit constraints from the Ministry of Agriculture (MOA) and MOT.

Table1. Indonesia: Retail Packaged Food Sales in 2013

Product	Value (IDR Trillion)
Baby food ('000 ton)	26.15
Bakery products ('000 ton)	34.78
Canned/preserved food ('000 ton)	5.23
Chilled processed food ('000 ton)	1.25
Confectionery (000 ton)	19.30
Dairy products (not countable)	26.47
Dried processed food ('000 ton)	87.55
Frozen processed food ('000 ton)	6.23
Ice cream (million liters)	3.47
Noodles ('000 ton)	23.71
Oils and fats ('000 ton)	15.03
Pasta ('000 ton)	0.23
Sauces, dressings and condiments ('000 ton)	11.55
Spreads ('000 ton)	1.00
Sweet and savory snacks ('000 ton)	13.55
Meal replacement products, Ready meals, Snack Bars, Soup ('000 ton)	1.59

RTD Coffee	14.0	11.3
RTD Tea	7.2	8.0
Sports and Energy Drinks	12.6	10.4

Source: Euromonitor**Table5. Indonesia: Advantages and Challenges for U.S. Food Ingredients**

Advantages	Challenges
Market size – Indonesia’s 2015 population will be approximately 255 million people.	Import regulations are often complex and non-transparent. Permits can be difficult to obtain, thus requiring a close relationship with a local agent.
Industry is constantly creating new products based on consumer preferences. These new products often require ingredients unavailable domestically.	Quantities of ingredients for new product and market trials are usually not enough to fulfill the minimum required by U.S. suppliers.
U.S. products are considered high quality.	Non-U.S. origin products are often less expensive, and can be substituted with U.S. products.
Modern retail outlets, hotels and restaurants are growing, thus requiring a wider variety of food products.	Food ingredients from the region enter Indonesia at lower prices due to the ASEAN Free Trade Area, while food ingredients from the U.S. have higher shipping cost.
Applied duties on most food and agricultural products are 5 percent.	88% of the population require halal-certified products.
The chilled, frozen and canned/preserved meat and meat products industry is growing. Local meat supply is insufficient.	Meat and horticultural products must have an import recommendation from MOA and an import permit from MOT before importing to Indonesia.
Fruit juice production is growing and requires fruits that are not produced domestically.	Average purchasing power of the majority of the population is weak.

II. ROAD MAP FOR MARKET ENTRY

A. ENTRY STRATEGY

The best way to overcome the hurdles associated with exporting to Indonesia is to select an agent. An agent should be chosen based on his ability to assure the widest distribution of products and the ability to undertake the marketing efforts necessary to create awareness for products among consumers. Price, quality, and continuous supply are important to Indonesian agents but personal interaction with potential business partners is also important. A face-to-face meeting will likely be needed, though younger importers maybe more comfortable with establishing relationships via electronic communication.

Market research for product testing, price comparison and adjusting the product for local tastes is important. Agents and distributors can help with market research and their assistance has proved to be an effective strategy in expanding sales since they understand the regulatory system and can bridge cultural differences.

Participating in food ingredient shows to introduce your products to a large audience and to meet with potential importers is strongly suggested.

B. MARKET STRUCTURE

Food ingredients can be imported by agents, distributors, or food manufacturers. The diagram below provides an overview of common distribution channels.

Figure1. Indonesia: Distribution Channels

Food processors commonly import primary inputs, such as frozen meat or beef offal, wheat flour, skim milk and whey powder. Food processors generally purchase essential complementary inputs/food additive like flavorings, preservatives, emulsifiers, and vitamins from a local agent or distributor because they are used in smaller quantities and often have limited shelf life.

Food processors that depend on a consistent supply of a product may have an exclusive sales agreement with a local agent. Some processors may choose to act as an importer if they find a better-priced alternative. Many multinational food processors operating in Indonesia must follow global product specifications. These companies have central purchasing offices, often in the United States, Europe or other Asian countries.

Larger, modern retail companies usually have an exclusive agreement with the processors to supply the food product that they need. Processors will reach an agreement with the retail company to supply specified quantities at agreed upon intervals and prices. In return, the retailer agrees to display products attractively and at agreed upon quantities. On the other hand, smaller independent retail stores and traditional markets get products mostly from distributors.

Although cold chain facilities are generally available in urban areas, many food items are sold without any temperature control in the more traditional distribution channels. Limited capital, low awareness of the benefits of refrigeration, and the practice of buying and consuming meals on the spot are still very common and limit the development of a cold chain network.

C. COMPANY PROFILES

Table 6. Indonesia: Major Food Processors

Company (Product Types)	Sales in 2013	End-Use Channels	Production Location in Indonesia	Procurement Channels
--------------------------------	----------------------	-------------------------	---	-----------------------------

Dairy related products to include cheese, baby and toddler food				
Dairygold Indonesia, PT (cheese)	N/A	Retail and HRI	Cikarang - Bekasi (1)	Direct; Importer
Danone Dairy Indonesia, PT (+ yogurt)	N/A	Retail	Cikarang – Bekasi (1)	Direct; Importer
Diamond Cold Storage, PT (+ice cream, yogurt, cheese, dressing, fruit juice)	N/A	Retail and HRI	Jakarta, Cibitung-Bekasi (2)	Direct
Frisian Flag Indonesia, PT	N/A	Retail and HRI	Jakarta (2)	Direct
Fontera Brands Indonesia, PT	N/A	Retail	Cikarang – Bekasi (1)	Direct
Greenfields Indonesia, PT	N/A	Retail and HRI	Gunung Kawi-Malang (1)	Direct
Indofood Sukses Makmur Tbk, PT (+snack food, instant noodle, pasta, sauces, ready meals, confectionery, biscuit)	IDR25.09 trillion (to include Indomilk, PT and Indolakto, PT)	Retail	All over Indonesia, mostly in Java (34)	Direct, Importer
Indolakto, PT (+ ice cream, oils & fats)	N/A	Retail	Sukabumi (1)	Importer
Indomilk, PT (+ yogurt)	N/A	Retail and HRI	Jakarta (1), Malang (1)	Importer
Kalbe Farma Tbk, PT (+meal replacement, snack bars, juice)	IDR13.63 trillion (to include pharmaceutical)	Retail	Bekasi, Bogor (2)	Direct
Kraft Foods Indonesia, PT (+cheese, sauces, biscuit, Juice)	N/A	Retail and HRI	Cikarang –Bekasi (1), Cimahi (1)	Direct
Mulia Boga Raya, PT (cheese)	N/A	Retail and HRI	Cikarang - Bekasi (1)	Direct
Milko Beverage Industry, PT	N/A	Retail	Sukabumi (1)	Importer
Nestle Indonesia, PT (+ breakfast cereals, confectionery, sauce, instant coffee)	N/A	Retail	Pasuruan (1), Karawang (1), Cikupa-Banten (1) Lampung (1- coffee)	Direct
Nutricia Indonesia Sejahtera, PT	N/A	Retail	Bogor (1), Jakarta (1)	Direct
Nutrifood Indonesia, PT (meal replacement, fruit juice)	N/A	Retail	Jakarta (1), Bogor (1)	Importer
Sari Husada PT	N/A	Retail	Yogyakarta (2)	Direct; Importer
Ultrajaya Milk Industry & Trading Co Tbk, PT		Retail and HRI	Cimahi (1)	Direct; Importer
Yakult Indonesia Persada, PT (yogurt)	N/A	Retail	Sukabumi (1)	Importer
Yummi Food Utama, PT (yogurt, cheese)	N/A	Retail and HRI	Jakarta (1)	Importer
Baked goods				
Marizarasa Sarimurni, PT (+spreads, chili sauces)	N/A	Retail	Rangkasbitung – Banten (1)	Importer

Nippon Indosari Corporindo Tbk, PT	IDR 1.50 trillion	Retail	Cikarang (3), Serang (1), Pasuruan (1), Semarang (1), Medan (1), Palembang (1), Makassar (1)	Importer
Pangan Rahmat Buana, PT	N/A	Retail	Bogor (1)	Importer
Swanish Boga Industrial, PT	N/A	Retail	Bogor (1)	Importer
Breakfast Cereals, biscuit, snack food, snack bar				
Amerta Indah Otsuka, PT (snack bar , energy drink)	N/A	Retail	Sukabumi (1)	Direct; Importer
Arnott's Indoneia, PT (biscuit)	N/A	Retail	Bekasi (1)	Direct
Dua Kelinci, PT (nuts/snack food)	N/A	Retail	Pati (1)	Importer
Garuda Food Group (+ chocolate confectionery, snack food, dairy, tea, biscuit)	N/A	Retail	12 owned plants (Pakanbaru, Lampung, Bandung, Tangerang, Bogor, Pati, Surabaya, Banjarmasin, Makassar); 16 beverage contract manufacturers; 11 food contract manufacturers	Direct, Importer
Khong Guan Indonesia, PT (biscuit)	N/A	Retail	Bogor (2), Cikarang (1), Semarang (1)	Direct; Importer
Kobe & Lina Food CV (sauces)	N/A	Retail and HRI	Tangerang (1)	Importer
Konimex Pharmaceutical Laboratories, PT (confectionery, biscuit)	N/A	Retail	Solo (1)	Importer
Manohara Asri, PT/Kapal Api group (snack food)	N/A	Retail	Sidoarjo (1)	Direct; Importer
Mayora Indah Tbk, PT (+chocolate confectionery, biscuit, breakfast cereals, instant coffee)	IDR 12.0 trillion	Retail and HRI	Bekasi (1), Tangerang (3), Medan (2)	Direct; Importer
Nabisco Food, PT (biscuit)	N/A	Retail	Cikarang-Bekasi (1)	Direct; Importer
Orang Tua group (+dairy products, yogurt, snack, biscuit, chocolate & sugar confectionery, biscuit)	N/A	Retail	Java and Makassar (more than 10 plants)	Direct; Importer
Sekar group (+snack food, sauces, frozen food)	N/A	Retail	Sidoarjo (3)	Direct; Importer
Siantar Top Tbk, PT (snack food)	N/A	Retail	Sidoarjo (1), Medan (1), Bekasi (1), Makassar (1)	Direct; Importer
Simba Indosnack Makmur, PT (+ ready meals, breakfast cereals)	N/A	Retail; HRI	Bogor (1)	Direct; Importer
Tata Nutrisana, PT (cereal)	N/A	Retail	Tangerang (1)	Importer
URC Indonesia, PT	N/A	Retail	Cikarang (1)	Direct; Importer

(+snack food, confectionery)				
Sauces, oils & fats, canned & dried products and noodles, soup and spread				
ABC President Indonesia, PT (instant noodles)	N/A	Retail	Karawang (1)	Direct; Importer
Asta Guna Wisesa, PT (spread)	N/A	Retail	Cikarang (1)	Importer
Bina Karya Prima, PT (+oils & fats)	N/A	Retail and HRI	Bekasi (1)	Importer
Heinz ABC Indonesia, PT (+sauces, fruit juice)	N/A	Retail and HRI	Tangerang (3)	Direct; Importer
Nissin Mas, PT (+instant noodles)	N/A	Retail	Semarang (1)	Direct; Importer
Pido, PT (spreads)	N/A	Retail	Cikarang (1)	Importer
Pondan Pangan Makmur Indonesia, PT (baking mix)	N/A	Retail and HRI	Tangerang (1)	Importer
Perusahaan Industri Ceres, PT (Petrafood Group) (+chocolate confectionery, spread, chocolate powder)	\$370 million (Indonesia); \$139 (regional)	Retail, HRI and Food Processing	Bekasi (1), Bandung (1)	Direct; Importer
Pure Foods Suba Indah, PT (+sauces, chilled processed food)	N/A	Retail and HRI	Bogor (1)	Importer
Salim Ivomas Pratama Tbk, PT (oils & fats)	IDR 13.8 trillion	Retail, HRI and Food Processing	Jakarta (1)	Importer
Sayap Mas Utama, PT/Wingscorp) (+instant noodles, sauces, fruit juice, instant coffee)	N/A	Retail	Surabaya (1), Bekasi (1)	Direct; Importer
Sinar Meadow International, PT (+oils & fats)	N/A	Retail, HRI and Food Processing	Jakarta (1)	Importer
Tiga Pilar Sejahtera Food Tbk, PT (+noodles, snack foods)	N/A	Retail and HRI	Solo, Bogor, Medan, Sidoarjo (4)	Importer
Unilever Indonesia Tbk, PT (+ice cream, spreads, soup, sauces, oils & fats +fruit juice)	IDR 27.3 trillion	Retail and HRI	Cikarang (3)	Direct; Importer
Welco, PT (spread)	N/A	Retail	Surabaya (1)	Importer
Frozen, chilled and canned/preserved processed products				
Aroma Duta Mandiri, PT	N/A	Retail and HRI	Bali (1)	Importer
Belfoods Indonesia, PT	N/A	Retail	Bogor (1)	Importer
Bumi Menara Internusa, PT	N/A	Retail and HRI	Surabaya (1), Malang (1)	Direct; Importer
Eloda Mitra, PT (+soup)	N/A	Retail	Sidoarjo (1)	Direct; Importer
Frozen Food Pahala, PT	N/A	Retail	Bogor (1)	Importer

(+ ready meals)				
Kemang Food Industries, PT	N/A	Retail and HRI	Jakarta (1)	Importer
Macroprima Pangan Utama, PT (+ yogurt, milk, chocolate confectionery)	N/A	Retail	Cikupa-Tangerang (1)	Importer
Madusari Nusaperdana, PT	N/A	Retail and HRI	Bekasi (1)	Direct; Importer
Prima Food International, PT (Charoend Phokphand group)	N/A	Retail and HRI	Cikande-Tangerang (1)	Importer
San Miguel Pure Foods Indonesia, PT	N/A	Retail and HRI	Bogor (1)	Importer
Soejasch Bali, PT	N/A	Retail and HRI	Bali (1)	Direct; Importer
So Good Food, PT (+soup)	N/A	Retail	Serang-Banten (1)	Importer
Confectionery				
Agel Langgeng, PT (Kapal Api group) (+biscuit)	N/A	Retail	Bekasi, Pasuruan (2)	Retail and HRI
Perfetti Van Melle Indonesia, PT	N/A	Retail	Bogor (1)	Importer
Kino Sentra Industrindo, PT	N/A	Retail	Semarang (1)	Importer
Yupi Indo Jelly Gum, PT	N/A	Retail	Bogor (1)	Importer
Ice cream				
Campina Ice Cream Industry, PT	N/A	Retail and HRI	Surabaya (1)	Direct; Importer
Beverages				
Lassale Food Indonesia, PT (fruit juice, + dressing, Del Monte sauces & dressing)	N/A	Retail and HRI	Bogor (1)	Direct; Importer
Berri Indosari, PT (fruit juice)	N/A	Retail and HRI	Jakarta (1)	Direct
Coca-Cola Indonesia, PT (soft drink, fruit juice)	N/A	Retail and HRI	Cibitung-Bekasi, Medan, Padang, Lampung, Bandung, Semarang, Surabaya, Denpasar (8)	Direct
Sinar Sosro, PT (Rekso group) (fruit juice)	N/A	Retail and HRI	Cikarang (1)	Direct; Importer
Jaya Santos Abadi, PT (Kapal Api group) (instant coffee/coffee mix)	N/A	Retail	Sidoarjo (1)	Direct; Importer
Sari Incofood Corporation, PT (instant coffee/coffee mix)	N/A	Retail	Medan (1)	Direct; Importer
Canned fish/beef/vegetable				
Canning Indonesia	N/A	Retail	Bali (1)	Direct, Importer

Products, PT (fish, meat+ready meals+seasoning)				
Jakarana Tama, PT (+instant noodle , sauces)	N/A	Retail	Bogor (1), Medan (1), Surabaya (1)	Direct; Importer
Maya Muncar, PT	N/A	Retail	Banyuwangi	Direct; Importer
Medan Tropical Canning, PT	N/A	Retail	Medan (1)	Direct; Importer
Surya Jaya Abadi Perkasa, PT (canned vegetables/meat, sauces-CIP brand)	N/A	Retail	Jember (1)	Importer
Alcoholic beverages				
Arpan Bali Utama, PT (using local wine and imported grape juice)	N/A	Retail and HRI	Bali (1)	Direct; Importer
Bali Hai Brewery Indonesia, PT(beer)	N/A	HRI	Bekasi (1)	Direct; Importer
Delta Jakarta, Tbk, PT/San Miguel corporation (beer)	IDR 1.71 trillion	HRI	Bekasi (1)	Direct
Multi Bintang Indonesia Tbk, PT (beer)	IDR1.56 trillion (Jan-Sep 2012)	HRI	Mojokerto (1), Tangerang (1)	Direct
Food Ingredients				
BT Cocoa (cocoa powder, cocoa butter, cocoa liquor)	N/A	Food processing and HRI	Tangerang (1)	Direct
Foodex Inti Ingredients, PT (seasoning, flavor ,meat extract)	N/A	Food processing	Cikarang-Bekasi (1)	Direct
Gandum Mas Kencana, PT (dessert mix, baking cocoa bar)	N/A	HRI and HRI	Tangerang (1)	Direct
Halim Sakti Pratama, PT (cake emulsifier, baking powder, jelly powder)	N/A	HRI	Surabaya (1)	Direct
Indesso Niagatama, PT (alavor, sweetener, seasoning)	N/A	Food processing	Bogor (1), Purwekerto (1)	Direct
Indofood Sukses Makmur Tbk, PT (wheat miller)	N/A	Food Processing, HRI and Retail	Jakarta (1), Surabaya (1)	Direct

D. SECTOR TRENDS

Consumption Trends

Health Awareness: More consumers are making decisions based on health and wellness concerns and fortified foods are increasing in popularity. As a result, consumption of many products is expected to grow. These include:

- sports drinks
- liquid ready-to-drink milk
- yogurt and other dairy products
- energy foods
- fortified foods
- high-protein snacks

Processed frozen food products: More consumers are turning to frozen/chilled processed foods (especially poultry products like nuggets and sausages) outside of urban areas due freezers in traditional wet markets and major retail expansion and its very convenient for hectic mother.

Private label: There is an increasing tendency for hypermarkets and supermarkets to sell private label food products. More and more consumers seek private labels for commodity items such as rice, cooking oil, and sugar as well as sauces, snack, bakery products and processed frozen/chilled products.

Popular flavors:

- strawberry, vanilla, and chocolate for ice cream, raisins and other berry fruit flavors
- fruity flavors for yogurt
- exotic cookie flavors

Alternative staple foods: Rice is an important staple for most Indonesians and is present at most meals. Noodles, bread, pasta, milk and cereals are starting to become important substitutes. As more food service outlets feature pasta and spaghetti on their menu, spaghetti is becoming more popular.

Packaging: Smaller package sizes (bite size) are preferred due to convenience and price considerations. Small/single portions are also considered a good way to manage weight and to limit consumption for health concerns. Inconsistent and unsteady incomes force many Indonesians to purchase food in small quantities, in some cases in daily portions. Toy inserts and individual cartons with bright colors and attractive designs including popular cartoon characters are popular for children. Shelf-stable milk and fruit juice in 90 and 125-ml packaging, as well as bite-sized snacks in smaller package sizes for school children have been successfully introduced in the last few years. Single serving jelly and ready to eat sausages for kids are also popular.

Table7. Indonesia: Popular processed food products in retail outlets during 2012

Product type	Processed food
Baby food	Powder toddler milk formula (Nestle lead to 25% share baby food)

Baked goods	Bread, and filled pastry
Biscuit	Chocolate coated biscuit and sandwich /filled biscuit (wafer)
Breakfast cereal	Children breakfast cereal and hot cereal
Canned/preserved food	Canned sardines in chili sauces, corned beef and sausages
Cheese	Un-spreadable processed cheddar cheese, cheddar, permesan
Chilled processed food	Sausages and meat ball
Chocolate confectionery	Fill chocolate tablets (range of nut filled) and plain milk chocolate.
Dried processed food	Package rice and instant noodle
Milk products	Fortified flavored UHT milk drinks, fortified flavored powder milk, fresh & pasteurized milk, condensed & evaporated milk, soymilk
Frozen processed food	Frozen processed poultry (chicken nugget, seasoned chicken wings , karaage), frozen processed beef (meat ball, sausages, beef patty), frozen processed fish (breaded fish fingers, coated prawns, crabsticks), frozen Chinese snack (dim sum, spring rolls, chicken/fish/shrimp dumpling, croquettes)
Ice cream	Chocolate, strawberry, vanilla, blueberry, mocha, coffee, mix flavor
Yogurt	Drinking yogurt, spoonable yogurt with fruit flavor
Pasta	Dried pasta (spaghetti and fettuccini)
Sauces, dressing, and condiments	Soy sauces, chili sauces, mayonnaise, salad dressing, ketchup, pasta sauces, and ethnic cooking sauces.
Spreads and preserve	Chocolate, srikaya (egg and coconut milk based), fruit flavor/strawberry jam, peanut, honey
Sweet and Savory Snacks	Chips, extruded snacks, nuts, non-microwave popcorn, ethnic Indonesian snack, and cup jelly

Source: Euromonitor

Table8. Indonesia: Popular soft drink products during 2012

Product type	Soft drink
Carbonates	Cola and non-cola carbonates
Concentrate	Sachet energy drink and fruit-based powder concentrate, liquid concentrate (squash and syrup)
Fruit/vegetable juice	100% juice (fruit, vegetable or mix), nectars, juice drinks, fruit-flavored drinks

Source: Euromonitor

Note: The government strictly controls alcoholic beverage production, distribution, sale, consumption, and advertisement in Indonesia because the majority of Indonesians are Muslim. Alcoholic drinks are subject to specific import and excise duties.

Foreign Company Profiles

A number of multinational companies have food and beverage manufacturing plants in Indonesia; some were acquisitions of existing companies while others are joint ventures.

Table9. Indonesia: Foreign Companies active in Indonesia

Company	Notes
ABC President, PT (Hongkong and Taiwan)	The company is a joint venture company with Nan Gai Investment Co. Ltd, Hongkong and Yeuan Yeou Enterprises Co. Ltd, Taiwan. The company produces sauces and instant noodle.
Ajinomoto Indonesia, PT (Japan)	Ajinomoto products are manufactured in Mojokerto since 1969. The company produces flavor enhancer (Ajinomoto), flavor seasoning (Masako), ready to use seasoning (Sajiku), and oriental seasoning (Saori). III. COMPETITION

Competition among food processors is expected to increase as the market matures. As companies grow, it is expected that food processors will slowly integrate their operations, expanding their business upstream and working with farmers to procure raw material directly.

Factors contributing to ingredient import growth include the establishment of new manufactures, production expansion, expanding product development, and improved distribution systems and storage facilities. Several processors plan to expand their businesses serving baking sector, food service, and retail.

On February 27, 2009, Australia and New Zealand signed a free trade agreement with ASEAN (AANZ-FTA). The agreement calls for Indonesia to gradually eliminate the tariff on imports of many Australian and New Zealand products. Most tariffs will be gradually reduced starting in October 2009 with exceptions for some of dairy products, meat products, fish (such as grouper, tilapia and fish fillet), fruit and vegetable products (such cabbages, carrot, tomato and potatoes, banana, pine apple, avocado, mandarin and mango). AANZFTA is the first region-to-region free trade agreement for both ASEAN and Australia and New Zealand. It is ASEAN’s fourth free trade agreement with a dialogue partner after China, Korea, and Japan.

As of December 2012, Indonesia has free trade agreements (FTA) with ASEAN-South Korea, ASEAN-China, ASEAN-Australia and New Zealand, Indonesia-Japan; Indonesia-Pakistan. Despite these FTAs, exporters and importers still face lengthy and cumbersome custom procedures and non-tariff measures.

The ASEAN Economic Community (AEC) will be integrated in 2015. AEC envisages the following key characteristics: (a) a single market and production base, (b) a highly competitive economic region, (c) a region of equitable economic development, and (d) a region fully integrated into the global economy.

Table10. Indonesia: Competition between Domestically Produced Goods and Imports 2013

Product Category	Major Supply Sources	Strengths of Key Supply Countries	Advantages and Disadvantages of Local Suppliers
Wheat Net Volume Import: 6,7 million ton Value: \$2.39 billion	Australia 56.53% Canada 20.36.9% U.S. 7.95% India 5.65% Ukraine 4.52% Russia 3.29%	Australia has a geographic proximity. Indonesia prefers Australian wheat due quality preference for specific purpose (noodle)	No wheat produced domestically
Sugar Net Volume Import: 3,3 million ton	Thailand 37.45% Brazil 34.01% Australia 20.07% South Africa	Thailand has a geographic proximity and Brazil is a major supplier.	Indonesia does not produce raw sugar

Value: \$1.73 billion	3.16% El Salvador 2.86%		
Soybean Net Volume Import: 1.7 million ton Value: \$1.10 billion	U.S. 92.03% Argentina 5.08%	Indonesia prefers U.S. soybeans due to characteristics optimized for tempeh and tofu. The U.S. has exportable supplies and good quality.	Soybean is not produced extensively in Indonesia.
Dairy excl cheese Net Volume Import: 363 thousand ton Value:\$1.30 billion	U.S. 23.10% New Zealand 22.15% Australia 10.73% France 10.17% Netherlands 6.93% Germany 5.83% Belgium 4.77% Poland 4.10%	New Zealand and Australia have a geographic proximity. Europe offers lower prices and they have milk processing plants in Indonesia.	Less dairy produced locally (only around 25%)
Wheat flour Net Volume Import: 205 thousand ton Value: \$82.07 million	India 29.125 Turkey 29.07% Sri Lanka 27.67% Ukraine 4.51%	India, Turkey and Sri Lanka offer competitive prices compared to local wheat flour.	Locally-produced wheat flour price is higher than imported flour but has a good quality and has been fortified with Zn, Fe, B1, B2 and Folic acid
Fish and Seafood products Net Volume Import: 154 thousand ton Value:\$228.28 million	China 51.32% Malaysia 9.89% India 9.79% Pakistan 6.79% Japan 3.59%	Tuna, Mackerel, and sardines are used as an additional source for the fish canning industry.	Local fish and seafood production is significant in volume
Corn starch Net Volume Import: 60.89 thousand ton Value: \$30.44 million	China 52.97% India 34.31% South Korea 5.23% Argentina 3.53%	China and India offer competitive prices.	Local corn starch is not produced extensively.
Cocoa beans Net Volume Import: 30,766 ton Value:\$77.42	Ghana 26.82% Cote d Ivory 26.79 % Papua New Guinea 17.64% Ecuador	Industry needs a variety of cocoa beans for blending.	Domestic production is limited

million	11.24% Cameroon 9.56%		
Potato starch Net Volume Import: 11, 799 ton Value: \$8.96 million	Netherland 32.35% Germany 25.09% Denmark 19.54% France 15.76%	European countries offer competitive prices and consistent supply.	No potato starch produced locally.
Dehydrated potato Net Volume Import: 6,086 ton Value:\$9.25 million	Germany 64.4% The U.S. 23.7% Netherlands 6.52% Poland 2.53% India 2.45%	European countries offer competitive prices and consistent supply. Aggressive promotion of U.S. dehydrated potato is effective.	No domestic production.
Non-alcoholic preparation used in beverages manufacturers Net Volume Import: 4,321 ton Value:\$62.21 million	China 35.29% Denmark 13.72% Singapore 11.36% Italy 8.75% The U.S. 6.02% Taiwan 4.63% South Korea 3.33%	Consumers seek novel flavors and new concepts.	Domestic beverage manufacturing is growing and requires inputs for new flavors.
Onion powder Net Volume Import: 4,166 ton Value: \$12,13 million	U.S. 94.89% China 2.33%	U.S. produces high quality onions with whiter color and high total solid content.	No onion produced locally.
Chili powder Net Volume Import: 3,046 ton Value: \$3.95 million	India 72.03% China 19.89% Germany 3.74%	Those countries offer competitive price.	No chili powder produced locally.
Garlic powder Net Volume Import: 2,854 ton Value: \$5.65 million	China 92.78% U.S. 7.22%	China offers competitive price.	No garlic powder produced locally.
Bakery dough	Germany 22.21% Singapore	Indonesia prefers Asian type of bakery products and also opens to new Western type of bakery	Domestic production is growing.

Net Volume Import: 2,179 ton Value: \$5.70 million	17.03% Malaysia 12.62% Japan 12.57% Australia 10.00% Thailand 8.54% Vietnam 6.84% U.S. 5.51%	products.	
Fresh Fruit Net volume import: 499 thousand ton Value: \$637.94 million	China 58.57% Thailand 12.30% U.S. 9.55% Australia 4.43% United Arab Emirates 2.56% Vietnam 2.18% Egypt 2.01%	China offers very competitive prices.	Local fresh fruit is limited in variety and inconsistent in supply.
Processed fruit & vegetables Net volume import: 112.70 thousand ton Value: \$167.32 million	China 30.04% U.S. 29.02% Canada 7.94% Netherlands 5.95% Thailand 5.79% Germany 3.70%	China and Thailand supply processed fruit and vegetable products. Brands are well known and prices are competitive. U.S. and Canada supply French fries and frozen vegetables	Limited processed fruit and vegetables products produced locally.
Red meats fresh, chilled, frozen Net volume import: 56.54 thousand ton Value: \$ 249.33 million	Australia 74.75% New Zealand 18.52% U.S. 6.46%	Australia and New Zealand have competitive pricing and no reported cases of FMD and BSE.	Shortage of supply. Most domestic production is sold fresh to traditional markets and modern retail outlets. Meat processing industry and food service sector relies on import.
Cheese and curd Net volume import: 21,422 ton Value: \$ 97.43 million	New Zealand 55.11% U.S. 23.03% Australia 14.42%	New Zealand and Australia have a competitive pricing and geographic proximity.	Domestic cheese processing industry and cheese application in food processing industry are growing, but local ingredients supplies do not exist.
Tree nuts Net volume import: 5,014 ton	Vietnam 30.16% US 26.86% Thailand 10.51%	Thailand supplies repackaged tree nuts from the U.S.	Local tree nut production is limited.

Value: \$20.06 million	Benin 10.07% China 7.48% South Africa 4.57%

IV. BEST PRODUCT PROSPECTS

A. Product Present in the Market with Sales Potential

Below is a list of major ingredients used by the Indonesian food processing industry.

Table11. Indonesia: Products Present in the Market with Good Sales Potential

Product Category	2013 Import (thousand tons)	2013 Import (\$mil)	5 Yr. Avg Annual Import (Volume) Growth (%)	Import Tariff Rates (%)	Key Constraints to Market Development	Market Attractiveness for USA
Wheat	6,737	2,439	8.53	5	Competition from Australian	Demand for high quality flour for bakery industry
Sugar	3,344	1,730	27	Rp 790/kg	Indonesia prefers cane sugar over sugar beet.	Food processing industry seeks low cost inputs.
Soybean	1,785	1,101	10	5	Trade barriers and food sovereignty issues.	Tempeh and tofu made from soybean are staple proteins. The soymilk industry is growing.
Dairy excl cheese	363	1,304	8	5	Price competition with Australia, New Zealand and European countries.	Domestic dairy processing industry demand is growing.
Wheat flour	205	82	-11	5	Price competition with India and Sri Lanka.	U.S. wheat is needed by milling industry.

Non-alcoholic preparation used in beverages manufacturers	4.3	62	-3	5	Complicated import permits processing.	Limited fruit options available in domestic market for fruit-based industry
Onion powder	4	12	22	5	No concerns.	Instant noodle and sauces/condiment industry needs onion as a seasoning
Chili powder	3	3.9	6 (data available since 2012)	5	No concerns.	Instant noodle and sauces/condiment industry needs chili as seasoning
Garlic powder	2.8	5.6	19	5	No concerns.	Seasoning for instant noodles, sauces/condiments and snack. Food industry is growing
Bakery dough	2	5.7	-1	10	No concerns.	Bakery industry is growing.
Fresh Fruit	489	637	4	5 20% for mandarin & mangoes	Current Government of Indonesia regulations inhibit some US fresh fruit import	Health awareness and rising middle class pushes demand of quality fresh products
Processed fruit & vegetables	112	167	11	Mostly 5	Complicated import permitting process.	Food service sector, bakery and biscuit industry are growing and need processed fruit/vegetables.
Cheese and curd	21	97	16	5	Cheese manufacturers must be approved by the GOI before they can export to Indonesia.	Cheese applications in food processing are growing.
Tree nuts	5	20	12	5	Price concerns.	Bakery industry is growing and consumer understands U.S. tree nut quality.

B. Product Not Present in Significant Quantities but which have Good Sales Potential

Table12. Indonesia: Products Not Present in Significant Quantities but That Have Good Sales

Product Category	2013 Import (thousand tons)	2013 Import (\$mil)	5Yr. Avg Annual Import (Volume) Growth (%)	Import Tariff Rates (%)	Key Constraints to Market Development	Market Attractiveness for USA
Corn starch	60	30	15	10	Price concerns.	Corn starch is a key ingredient in the snack food industry.
Potato starch	11.8	8.9	30	5	Price concerns	Potato starch is needed by snack industry.
Dehydrated potatoes	6.0	9.2	19	5	Price concerns.	Snack food industry is growing.

Source: GTA

C. Products not Present (only a few) in the Market Because They Face Significant Barriers

The frozen processed beef and poultry industry is growing. However, the GOI regulates beef and poultry imports. Indonesia has a number of major integrated poultry companies that own up-stream and down-stream production facilities. There is also a possibility to supply alcoholic preparations used by alcoholic beverages manufacturers. The GOI has set strict import regulations and high tariffs for alcoholic products.

Table 13. Products not Present in the Market Because They Face Significant Barriers

Product Category	2013 Import (Volume, thousand T)	2013 Import (\$mil)	5Yr. Avg Annual Import (Volume) Growth (%)	Import Tariff Rates (%)	Key Constraints to Market Development	Market Attractiveness for USA
Poultry Meat	961	2.96	-10.79	5 except 20% for chicken tights	MOA does not issue any recommendation to import poultry products including duck and turkey since January 2014. MOA requires poultry that exported to Indonesia must be slaughtered manually and halal	Domestic chicken prices are high and turkey is not produced locally. Chicken MDM (Mechanical debone meat) for independent poultry processing industry is not available.
