Certification/ Requirements	Remarks
	3mm in height. <ul style="list-style-type: none"> • Uncooked/raw – Keep Frozen Partly cooked – Keep Frozen Cooked – Keep Frozen
Date of manufacture and factory code	<ul style="list-style-type: none"> • Must be indelibly marked or stamped on each immediate container or, in the case of glass jars, on the cap or label. • The use of a code is permissible provided that the key is disclosed to the SABS.
Marking of master cartons	<ul style="list-style-type: none"> • Print or stencil: <ul style="list-style-type: none"> - The quantity and net mass of the packages it contains - the information as required in the previously mentioned requirements, except: <ul style="list-style-type: none"> ▪ the street address of the manufacturer need not be the full address, but must be sufficient for identification purposes ▪ The method of preparation need not be given on the container. - The date of packing and batch number (if applicable) shall be stamped or otherwise marked on the container or on a label securely attached to the container.
Nutritional and Health Claims	<ul style="list-style-type: none"> • Nutrition labeling must appear on food labels or in accompanying labeling. • The label must have the heading 'Nutrition Information' , and should specify serving size, the nearest kilojoule of energy content of a serving per 100g or per 100 ml, total amount of proteins, carbohydrates, fats and dietary fiber in grams(weight), sodium in milligrams and RDA proteins per serving. • Labeling of foods for special medical purposes must indicate nutritional information, osmolarity on acid-base balance, number of servings contained in the package, nature of animal/plant protein hydrolysates, the description of modification and information on the amino acid, fatty acid/carbohydrate profile, a bold capital lettered statement not less than 3mm reading "USE UNDER MEDICAL SUPERVISION".
GMO labeling regulations	<ul style="list-style-type: none"> • Compulsory labeling according to the Consumer Protection Bill (2009)
Other Information	
Inspection/Testing	<ul style="list-style-type: none"> • All food and agricultural products that enter South Africa are sampled and tested before distribution and sale to ensure that they are not contaminated with any pest and that they are fit for their intended use. • The Port Health Authority may detain goods at customs or issue an extended health detention to assist the food industry and other associated industries to take samples and conduct one or more of the following tests: sensory, microbiological and chemical. The sample is divided and packed separately into three sealed and labeled containers to indicate its nature and to identify it as from the original sample. One of the packages is

Certification/ Requirements	Remarks
	<p>given to the person responsible for the commodity, and the other package is sent for testing, while the third package remains with the inspector. For further analysis, the sample is derived from the remaining two packages. The same procedure also applies to perishables.</p> <ul style="list-style-type: none">• All canned seafood products are tested under the compulsory specifications. The products are detained when tests are conducted and are only released for sale after a compliance certificate is issued.• Frozen products are monitored on a regular basis at the processors.
Microbiological Standards	<ul style="list-style-type: none">• On May 23, 2008, the Government Gazette no. R547 was published which amends regulations governing microbial standards for foodstuffs and related matters. (available at http://www.doh.gov.za/docs/regulations/2008/reg0547.pdf)
Packaging and Container Regulations	<ul style="list-style-type: none">• For all goods, temperature in transit and at the destination point must be taken into consideration when using gels and dry ice.• Chilled goods should be packed either in insulated container with gel-packs/blue ice or in heavy cardboard boxes with gel-packs. Goods should never be packed with wet ice.• Frozen goods, as with chilled, should be tightly packed with gel-packs and/or dry ice.• Dry goods should be packed tightly to avoid internal damage.• Carton labels should be marked to indicate either dry/chilled/frozen content.• The shipments should be marked with colored labels, and all boxes should contain the following: Supplier name, address, destination, total number of cartons shipped, and a copy of pro-forma / commercial invoices
Food Additives Regulations	<ul style="list-style-type: none">• According to Government Gazette no. R125, the following words should appear below the term "Isomaltulose" and should be in parenthesis "source of glucose & fructose"• Food additives used as oxidants, sweeteners, colorants, curing agents, flavor enhancers, flavorants or preservatives, in a given foodstuff must appear on the label.• The label on any pre-packed food additive or blend of food additives must comply with all labeling requirements and bear the words "for use in foodstuffs", or "for use in food" or "blend of food additives". The common chemical name of the product should be used on the labels.• The names 'food colorant' or 'food coloring' or 'food color' and common chemical name and color index number should appear in the label.• If an additive is sulfur dioxide, the maximum and minimum percentages should be specified.

DOCUMENT REFERENCE

Date :05/07/10

Page :6/7

Certification/ Requirements	Remarks
	<ul style="list-style-type: none">• The date of maximum durability for food additives with the shelf-life not exceeding 18 months should have words as “use before < latest recommended date of use>”• The DOH does not maintain a list of permitted additives.• South African Food Additive regulations are categorized according to type. Please look up your product at the following internet address and then see which additives are permitted with that particular foodstuff: http://www.doh.gov.za/department/dir_foodcontr.html (Click on “legislation” at the top, then scroll at the bottom to see all the final regulations pertaining to additives).
Pesticides and Other Contaminants	<ul style="list-style-type: none">• DOH is the main food control regulatory body.<ul style="list-style-type: none">- approves the Maximum Residue Limits (MRLs) for pesticides and for other chemicals and metals that may be present in foodstuffs for both exports and imports- DOH inspection services performs analysis for pesticide MRL• The National Department of Agriculture (NDA) gives guidance for usage of pesticides.• Regulations of maximum residue limits for pesticides on imported foodstuffs are governed under the FCD Act, 1972 (Act No.54 of 1972).• Food import control is conducted by the Port health services and the Provincial Health Department according to the act. For specific MRLs, please see http://www.doh.gov.za/department/dir_foodcontr.html.• Samples are continuously taken from the consignments to test for food colorants, aflatoxin, preservatives, sweetness and labeling.• Codex Alimentarius values are the principal default levels but are only applicable when no South African MRLs have been established.<ul style="list-style-type: none">- If there is no Codex value for a particular chemical/commodity, the second default choice is the lowest Limit of Detection (LoD) level, usually at 0.01mg/kg of commodity, established in South Africa for a crop in the same food category- If none of these defaults are applicable, then the MRL set by other countries are considered
Vitamin-Enrichment Requirements	<ul style="list-style-type: none">• Fortification of foodstuffs is regulated under South Africa’s Department of Health, Food Act of 1972.• Importers and manufacturers of food vehicles should use only micronutrient mix from companies that have registered with the Department of health.• The importer should record certificates of micronutrient mix used in the production of every batch of the food vehicles.

DOCUMENT REFERENCE
