Policy and Program Announcements

SP2 - Prevent or Resolve Barriers to Trade that Hinder

U.S. Food and Agricultural Exports

Approved By:

Morgan Haas

Prepared By:

FAS/Rabat

Report Highlights:

This report contains an unofficial translation of Morocco's 2017 marketing program for common wheat, including domestic support for producers, storage, reporting, flour, and transport. Morocco's most recent domestic support notification to the WTO is [G/AG/N/MAR/37](#) for the years 2003-2007. Morocco's fixed external reference price is 957 Dhs/MT (95.7 Dhs / Q1).

KINGDOM OF MOROCCO

NATIONAL INTERPROFESSIONAL OFFICE FOR CEREALS AND PULSES

ONICL

CIRCULAR

RELATING

INTERNAL MARKETING OF CEREALS AND PULSES OF THE 2017 HARVEST

1. REGULATORY BASIS

- [Law No. 12-94](#) on ONICL and the organization of the cereals and pulses market, promulgated by the Dahir No. 1-95-8 of Ramadan 22, 1415 (February 22, 1995), especially his article 11;
- The Joint Order of the Minister of the Interior, the Minister of Economy and Finance and the Minister of Agriculture and Maritime Fisheries fixing the terms and conditions for the purchase of common wheat the manufacture of subsidized flours, as well as the conditions of manufacture, packaging and putting on sale of said flours;
- The Circular of the Minister of Agriculture and Maritime Fisheries, Rural Development and Water and Forestry bearing the No. 01 / ONICL of May 9, 2017 on the marketing of cereals of the 2017 harvest;
- The Joint Decision of the Minister of Agriculture and Maritime Fisheries, Development Rural and Water Resources and the Minister of Economy and Finance, of May 19, 2017, relating to the lump sum subsidy and the storage premium allocated to the common wheat national production of the harvest 2017.

2. SCHEME OF THE MARKETING OF THE COMMON WHEAT

2.1. The reference price of the national production

The reference price for purchase of common wheat of the national production of the 2017 harvest is **280.00 dirhams per quintal (dh / ql)**. This price is for standard quality (as defined in Appendix I attached) and includes all charges, taxes and margins inherent in the purchase from producers and delivery to the mill. It may be where appropriate, more or fewer reductions whose rates are freely negotiable between the parties concerned.

2.2. Primary collect period

The primary collect period is fixed between May 15 and October 15, 2017. This period may be reduced or extended, depending on the progress of collect and supply.

2.3. Storage premium

Storage agencies (merchants of cereals as well as Moroccan Agricultural Cooperatives and their Union) as defined in article 11 of the aforementioned law n ° 12-94 will benefit from a purchase premium of **two (2.00) dirhams per quintal per fortnight** for the storage of common wheat of the national production 2017.

The storage premium is served only on the stocks from the purchases made during the period of primary collect, declared and validated by the services of liquidation of the ONICL.

The storage premium is allocated to the storage agencies under the following conditions:

- It is served for the quantities of common wheat held by the storage agency in its depots for a fortnight. It should be pointed out that the premium is calculated on the basis of two fortnights per month and that it is granted for stocks held on the 1st and 16th of each month, knowing that the outflows are deducted from stocks declared for the previous fortnight and that any entry is considered to have taken place on the last day of the fortnight;
- The first storage premium is served on the stocks declared on June 1, 2017 and still held on June 16, 2017 and the last premium is served for the second fortnight of December 2017;
- The quantities of common wheat of national production of the harvest 2017 retained in the framework of an organized call for tenders for manufacture of subsidized flours will not cease to benefit from the storage premium until at least two weeks (a fortnight) after the date of notification of the successful contractors of the results of the calls for tenders;
- The stock of the end of the primary collect period eligible for the storage premium is stopped as being the one held by the operator, declared by him and recorded by the ONICL at that date. After that date, the eligible stock is reduced every fortnight, of either an equivalent quantity to seven per cent (7%) of the storage of the primary collect period stock or quantities actually sold during the fortnight, whichever is greater. When a storage agency has stocks at several depots, the said reduction is made on the basis of the global stock held by the said Agency;
- The Storage mode in the open air is not eligible for the storage premium;

In addition, it should be noted that:

- The batches consisting of bulk or bag must have placards bearing in visible figures, the quantities stored and their main average physical characteristics, particularly the mass per hectoliter (specific weight). For the particular case of the batches being created, a derogation concerning the obligation regarding marking the main physical characteristics is granted until October 16, 2017;
- Operators are required to arrange their batches of wheat so they can easily be counted and assessed. The ONICL reserves the right to require the beneficiary operator a good organization of its batches in order to facilitate the census of quantities under the load and the full responsibility of the operator. In case of refusal of the operator, the ONICL reserves the right to not grant the storage premium since June 1, 2017 on the quantities that its agents cannot easily identify.

- In the event of finding, among a trader pretending to the storage premium, missing quantities, they will be deducted effective the last inspection carried out by the ONICL and this without prejudice to the other provisions in force.

3. LUMP SUM SUBSIDY

The quantities of common wheat of the 2017 harvest, acquired and declared to the ONICL during the period from May 15 to October 15, 2017, will receive a lump sum subsidy of **ten (10.00) dirhams per quintal** in the conditions below:

- For flour mills, the subsidy is served on the basis of an individual commitment (model in Annex II) duly signed by the authorized representative of the flour mills and deposited at the ONICL External Service at the beginning of the collect. This commitment must be attached:
 - **For purchases made from the producers:** a monthly recapitulative statement of receipts (according to model in annex III) prepared by his care. The first state must be accompanied by a declaration on honor (according to model in annex IV);
 - **For free purchases (excluding those of the ONICL (A.O) carried out by storage agencies:** a monthly summary statement of purchases (according to model in annex V) prepared by its care and accompanied by related contracts (according to model in annex VI).
- For the storage agencies, the lump sum subsidy is served on the eligible stocks of common wheat of the 2017 harvest held on October 16, 2017, not engaged in the tenders submitted at that date and delivered to the flour mills before June 1, 2018. This stock is, if necessary, adjusts to the quantities actually encountered by the ONICL.

The payment of the lump sum subsidy to the storage agencies will be as follows:

- A first 60 percent of the subsidy amount is served on the basis of the maximum eligible stock declared at the end of the primary collect period not engaged in the calls for tenders on that date.

The stock eligible for the lump sum subsidy on October 16, 2017 must be declared in accordance with the model in Annex VII. The declaration must be filed under the same conditions as the fortnight's declarations.

Storage agencies are required to attach a declaration of honor to their stock declaration at the end of the primary collect period (model in Annex VIII).
- A regularization between the ONICL and the storage agency is carried out on the basis of the quantities of the eligible stock not entered in the calls for tenders and actually delivered to the flour mills, justified by recapitulative statements signed jointly by the storage agency and the beneficiary mills (model in Annex IX) and accompanied by a request of regularization (model in annex X).

The quantities for which the records are deposited on the ONICL beyond December 31, 2018 are no longer eligible for payment of the lump sum subsidy. If the storage agency does not submit the documents required in this period, the ONICL would conduct the immediate resumption of the lump-sum subsidy on the quantities for which the delivery to the mill has not been justified, the storage agency concerned can no longer claim the lump sum subsidy after the regularization.

After the period of primary collect, the quantities declared by the storage agencies not engaged in tenders that delivered to other than the flour mills, during a given fortnight are deducted in total of the eligible stock at the hands of the operator has declared that it has made purchases during the previous

fortnight, in which case the stock eligible for the lump sum subsidy is reduced by the only surplus of the quantities delivered to other than the flour mills in relation to those purchases.

In addition, regional commissions, composed of representatives of ONICL and possibly representatives of the Ministry of Agriculture, Maritime Fisheries, Rural Development and Water and Forests, will make a census of the stocks held by the storage agencies at the time of beginning and end of the primary collect period. If the counted quantities are less than 5% of the declared quantities, the operator's declaration as a basis for payment shall be adjusted accordingly.

Under penalty of non-grant of the lump sum subsidy, a Register of Daily Movements (Purchases and exits / milling) of the common wheat of the 2017 harvest must be held:

- By storage agencies, **by depot** (or group of depots under the same External Service of ONICL);
- By the flour mills, **by unit** including its stocks among others.

The operator must declare daily the entries and exits of the 2017 common wheat on the page of the ONICL portal dedicated for this purpose. The daily declarations on the ONICL portal are proof of the Daily Movement Register.

In the absence of daily declarations on the portal, the operator must inform the ONICL of the beginning of the purchases and must:

- 1) Keep up to date a physical register whose pages are numbered, connected and not detachable. This register must include information on local wheat movements 2017 (according to the agreed format with the ONICL)

Transmit daily to the External Service of the ONICL, the movements by fax or email OR any other means, with acknowledgment of receipt (according to the agreed format with the ONICL).

The first daily declaration is to be issued on May 16, 2017, is for the current purchases of the 2017 harvest, and still held in stock on that date.

The cumulative quantities declared daily by the operators must be consistent with the bi-monthly declarations, the monthly statements and, where applicable, the declarations of the end of the eligible collect period. In case of a discrepancy, discrepancies that are not validly justified to the ONICL will not be eligible for lump sum subsidy.

In the event where the ONICL requests the operator to provide all the parts, purchase, receipt, delivery, identification of suppliers and / or customers and payments. If valid documents are not presented, the quantities concerned would be considered ineligible for the lump sum subsidy.

4. TREATMENT OF TENDER WHEAT REPORT STOCKS

During the first period, the quantities constituting the stock of postponement to May 15, 2017 must be delivered exclusively to the operators declared to the ONICL. To this effect:

- The quantities not engaged in tenders held by storage agencies on the date of May 15, 2017 and delivered during the primary period, other than declared operators to ONICL will be deducted from the eligible stock for the lump sum subsidy;
- The quantities held by the storage agencies on the date of May 15, 2017, and delivered in a fortnight given during the primary period to other than the operators declared to ONICL, will also be deducted

from the stock eligible for the storage premium corresponding fortnight of delivery than those of the following fortnights.. The reduction will be made up to the eligible stocks.

In this title, the storage agencies with carry-in stocks of common wheat to May 15, 2017 (import or local) are required to attach to the first declaration of May 16, 2017, the procedure specific to the management and disposal of those stocks (annex XI) duly signed and legalized.

5. COMMON WHEAT INTENDED TO THE MANUFACTURE OF SUBSIDIZED FLOURS

In accordance with Article 2 of the Joint Order of the Minister of the Interior, the Minister of Economy and Finance and the Minister of Agriculture and Maritime Fisheries fixing the conditions for the purchase of common wheat for the manufacture of subsidized flours, as well as the conditions for the manufacture, packaging and sale of the said flours, the mobilization of the said wheat during the 2017-2018 marketing year may be carried out by means of calls for tenders organized by the ONICL with other storage agencies for delivering it to the mills.

The procedures of organization of these calls for tenders will be defined in the special conditions (CPS) provided for this purpose.

The common wheat intended for the manufacture of the subsidized flours retained in the framework of calls for tenders, is delivered to the flour mill, in accordance to the program established by the ONICL, to the uniform transfer price of **258.80 DH/QL** for a standard quality, as defined in Annex I. The price may be the subject, possibly, of bonuses or reductions depending on the scale laid down in Annex XII. The goods may be refused beyond the accepted tolerances listed in Annex XIII.

6. QUALITY OF COMMON WHEAT PLACED IN STOCK

The common wheat that benefiting from the premium storage is understood to be healthy, fair and merchantable quality, free from smell, toxic substances and live predators regardless the stage of their development. The ONICL reserves the right to ensure that the eligible stored quantities for the storage premium meet these conditions.

The conditions of delivery and recognition of quality in the framework of the call for tenders will be made in accordance with the specific provisions within the framework of the special conditions which will be established for this purpose.

7. TRANSPORT FOR THE BENEFIT OF NATIONAL FREE COMMON WHEAT

The transport costs of the common wheat of national production to the destination of outlying beneficiary areas (Ouarzazate and Errachidia) are supported by the State on the basis of special rates adopted in Annex XIV; it is reproduced by the ONICL to the party having supported (storage agency or a flour mill) in the light of a monthly statement jointly signed by both parties (Annex XV). The quantities for which the payment documents deposited after the sixth month following the month of delivery are no longer eligible for the transport support.

8. TAX OF MARKETING AND CONTRIBUTION WARRANTY

The quantities of commercialized cereals and pulses are subject to the marketing tax for cereals and

pulses and to the guarantee contribution (**0.01 dh / ql**) as provided for and respectively in the [Decree No. 2-00-363 of June 28, 2000](#) and by the [Joint Order no. 673-14 of March 4, 2014](#). The rates of the marketing tax are as follows:

Product	Dirham per quintal
Common wheat and durum wheat	1.90
Barley, corn and rice	0.80
Other cereals	0.80
Pulses	1.00

The procedures for the collection of the tax of marketing of cereals and pulses and the contribution of the warranty are defined by the [Circular No 6/ONICL/DCML of December 31, 2014](#).

9. ESTABLISHMENT OF DECLARATIONS

9.1. Bi-monthly and monthly declarations

In accordance with articles 11 and 13 of the above-mentioned [Law 12-94](#) and the [Circular No. 05 ONICL / DCML of December 17, 2014](#), the storage agencies as well as the industrial users of cereals (industrial flour mills, fodder operators, rice operators and others) are obliged to draw up and send to the ONICL External Service on which they depend, the bimonthly and monthly declarations according to the models which are fixed there,

For the free common wheat of the national production of the 2017 harvest, the storage agencies must establish two biweekly slips:

- A slip of a fortnight for the free common wheat (Annex XVI)
- A slip of fortnight for common wheat issued under calls for tenders organized by the ONICL (common wheat A.O) (Annex XVII).

The quantities of common wheat held in stock, retained in the framework of calls for tenders, must be registered on the slips of the fortnight during which the notification took place:

- At output "tender" on the slip of the free common wheat fortnight;
- At input "tender" on the slip of the common wheat (A.O) 2017 harvest.

For the common wheat of the national production of the 2016 harvest, the storage agencies are required to draw up a slip of specific fortnight (model in annex XVIII) until the corresponding stocks are liquidated.

9.2. Monitoring the collection of common wheat

During the intense collect period, the declarations of the collect will be made daily by each operator by seizing inputs and outputs on the ONICL portal. The operators' access to individual accounts is granted to them on the basis of a written request (see model on the ONICL website www.onicl.org.ma) to be deposit at the ONICL external services.

10. COMPLIANCE WITH PROVISIONS AND MODELS

The provisions and the different models envisaged by the present circular must be obligatorily respected by the operators, in default; the ONICL reserves the right to take the necessary measures.

ANNEX II

Individual Commitment of industrial mills

(to attach to the bimonthly declaration of May 16, 2017)

I undersigned Mr. ⁽¹⁾ in quality of
..... of the mill ⁽²⁾ patent number and
trade register number acting under the powers which vested in me and whose head office
is domiciled.....

I undertake, in addition to the obligations arising from Law 12-94 relating to the ONICL and the
organization of the cereals and pulses market, to:

1. Manufacture and sell flour free of common wheat at prices comparable to those practices currently on the market, to local rungs and regional;
2. Prohibit all exports of products and by-products of common wheat that have benefited from a state subsidy;
3. To send to the ONICL, in the form and within the time established by it, the existing reporting requirements;
4. Declaring daily, via the ONICL portal and during the primary collect period, all the movements of common wheat from harvest 2017.

In the absence of daily declarations on the portal, I undertake to inform the ONICL since the beginning of my purchases and to:

1. Keep up to date a physical register whose pages are numbered, connected and not detachable. This register must include information on the movements of local common wheat of 2017 (according to the format agreed with the ONICL)
2. Transmit daily, to the ONICL External Service, the movements by fax or e-mail or any other means with acknowledgment of receipt.
5. Sign a contract with each cereals merchant for any tender order specifying the commitments of each one of the two parties; a copy of the contract must be sent to the ONICL's external service in which the operator reports since its establishment;
6. Provide to the ONICL Services, if they require it, any documents, records, or information justifying the crashes referred to in my declarations (records of electrical consumption, scales records, etc.)
7. If the ONICL requests it, to make the entries of wheat eligible for the lump sum subsidy and the outputs of their products only in the conditions specified by the ONICL. Failing that, the quantities of wheat put in question by the ONICL will not benefit from the lump sum subsidy.

ANNEX XI
SPECIFIC MANAGEMENT AND DISPOSAL PROCEDURE
OF COMMON WHEAT AVAILABLE AS OF MAY 2017
(IMPORT AND INTERNAL HARVEST)

To be submitted by the storage agencies which have storage standard
of common wheat as of May 15, 2017

I undersignedcommitted to:

- Individualize the stocks from among those identified by report to other stocks committed in the framework of calls for tender or from purchases made after the date of the May 15, 2017. These stocks must include signs bearing the apparent mention "carry in stocks of May 15, 2017" as well as the quantities stored and their specific weight;
- During the primary period, deliver the quantities constituting the stock of report exclusively to the operators declared to the ONICL. Any quantity of this stock delivered, during a fortnight, other than to these operators will be deducted as well from the stock eligible for the corresponding storage premium of that fortnight than those of the following fortnights. The deduction will be made up to eligible stocks.
In this title, if the ONICL requires it, inform by writing the External Services of the ONICL at the latest two working days before any modification or output of carry in stocks.
Similarly, any quantity of this stock delivered to other than the operators declared to the ONICL will be deducted from the quantities eligible for the lump sum subsidy.
- To put at the disposal to the ONICL agents, at the time of each inspection, the justifying documents of delivery, in particular:
 - The commercial invoice, which must indicate, among other things, the mention of "BT carry in stocks of May 15, 2017 ";
 - Copy of the check and the credit note or, where applicable, the transfer notice;
 - Weighing tickets;
 - Delivery vouchers clearly indicating the consignee, the quantity, the delivery date, the registration number of the truck, the stamps and the signatures of the authorized officials of the delivery agency and the flour mill;
- Hold separate material accounts of carry in stocks;

I declare to have taken knowledge of the provisions of the regulations and organizational relating to the marketing of the common wheat of national production, and the conditions for the allocation of the storage premium and the lump sum subsidy laid down by the Circular of the ONICL relating to the internal marketing of the harvest 2017, and accept them entirely and without reservation.
