Report Name: Food and Agricultural Import Regulations and Standards Export Certificate Report

Country: Egypt

Post: Cairo

Prepared By: Shaza Omar, Senior Agriculture Specialist and Tayo Akingbee, Agriculture Attaché

Approved By: Ali Abdi, Minister-Counselor for Agricultural Affairs

Report Highlights:

This FAIRS report lists the export certificates required for food and agricultural products shipped to Egypt. An export certificate matrix is included in this report. The requirements listed here are specific for consignments coming directly from the United States to Egypt, or transshipped in a sealed container with invoices stating that Egypt is the final destination. The report provides guidance regarding the Egypt's National Food Safety Authority regulatory import requirements.

DISCLAIMER: This report is prepared by the USDA/Foreign Agricultural Service, Office of Agricultural Affairs Cairo (Post) for U.S. exporters of food and agricultural commodities. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies/regulations/directives have changed since its preparation, or because clear and consistent information was not available. Post highly recommends that U.S. exporters verify the full set of import requirements with their foreign customers, who are usually best equipped to research such matters with local authorities, before any products are shipped.
Executive Summary

Egyptian import regulation and system continue to reflect changes as the National Food Safety Authority (NFSA) continue to expand its regulatory reach. The NFSA is reshaping the import control system in Egypt. Currently the NFSA took the full mandate of imports. The authority issued regulations of special food registration, third party certification, and risk-based import system introducing a new approach to handle imports according to risk categorization. The NFSA has revised policy related to veterinary drugs residue in beef and beef products. On November 4, 2020, the NFSA board convened and agreed on Decision No. 13/2020, setting new maximum residue limits (MRL) for veterinary drugs – including ractopamine – that are more closely aligned with Codex standards.

NOTE: (*) Any processed products containing meat or poultry must meet the same requirements listed under Meat, Poultry, and Products. For additional requirements of meat, poultry, and products see the FSIS Export Library: http://www.fsis.usda.gov/wps/portal/fsis/topics/international-affairs/exporting-products/export-library-requirements-by-country/Egypt. SOURCE: FAS Cairo office research.
Section II – Purpose of Specific Export Certificates

See Section I, Table 1: List of Export Certificates Required by the Government of Egypt (MATRIX) for clarification of the specific purposes of certifications currently required by Egypt.

Section III – Special Attestation Required on Export Certificates

**Export Certificate:** The export certificates will vary according to the product. The certificate must indicate that the product is produced under a recognized process, ensuring its freedom from public health hazards. The certificate should also indicate that the product is sold for human consumption in the country of origin without restrictions. If questions arise regarding a certificate or attestation needed, exporters should contact FAS Cairo (Post) or the Egyptian importing firm prior to shipping.

**Certificate of Origin:** The certificate of origin is required by the Egypt Customs Authority. The General Organization for Export and Import Control (GOEIC) is no longer responsible for most imports of food and food products. The role of GOIEC in Agriculture products is limited to soybean for crushing, corn for feed use and private sector wheat imports The National Food Safety Authority (NFSA) is responsible for imports as of November 15, 2019. (See: GAIN Report Number:EG-19010 - Egypt, Establishment of the National Food Safety Authority)

The certificate of origin must indicate the manufacturing location for the product being imported. State and/or local authorities, including local chambers of commerce in the same jurisdiction as the manufacturing facility may issue the document. Should the product be packed/processed in the exporting country (i.e., the United States) but originate in another, the product’s certificate of origin must indicate the initial production area information.

**Grain and Oilseeds:** A certificate attesting that aflatoxin testing has been completed must accompany all grain and oilseed shipments. The NFSA mandates aflatoxin levels be less than two parts-per-million (ppm) on any imported grain shipment. Egyptian authorities require that grain shipments be accompanied by paperwork indicating the crop year and/or production date of the imported goods. All grain imports must adhere to the Egyptian standard 1601 (2005). The standard specifies the quality/grading characteristics, as well the permissible tolerances of contaminate.

**Meat and Meat Products, Poultry and Poultry Products:** Exporters of animal products must work closely with their Egyptian importers, as well as to check the U.S. Department of Agriculture (USDA) – Food Safety and Federal Inspection (FSIS) Export Library frequently for the latest updates – these requirements are subject to change and are strictly scrutinized by customs authorities.

In addition to the Certificate of Wholesomeness (FSIS 9060-5) a letterhead certificate must accompany each shipment. For meat and meat products the accompanying letterhead must attest that:
• Foot-and-mouth disease (FMD) and rinderpest have not occurred in the United States during the previous 12-months.
• The product was derived from animals born in the United States and/or from animals legally imported into the United States.
• The United States is recognized by the World Organization for Animal Health (OIE) as being a negligible bovine spongiform encephalopathy (BSE) risk country.
• The product was not derived from animals that were slaughtered in an official disease eradication program.
• The product does not contain or is not contaminated with specified risk materials as defined by the USDA Food Safety and Inspection Service in U.S. regulations, 9 CFR 310.22(a). (see https://www.law.cornell.edu/cfr/text/9/310.22)

For whole frozen poultry, chicken leg quarters, drumsticks and thighs, a letterhead certificate attesting the following must accompany the shipment:

• That the poultry meat is derived from birds that were not under official quarantine for serious epizootic diseases affecting poultry including highly pathogenic notifiable avian influenza (HPNAI), as defined by the World Organization for Animal Health.
• The meat is obtained from poultry found to be free of any clinical signs of systemic infectious or contagious diseases to which the species is susceptible as determined by ante- and post-mortem inspection.
• The poultry meat was handled under hygienic conditions under federal veterinary inspection and has not been treated with and does not contain any preservatives, coloring matter, hormones or other substances harmful to human health.
• The poultry meat is wholesome and fit for human consumption.
• The means of transport, handling, and loading conditions meet the hygienic requirements of the United States.

Specific packaging, labeling, and shipping requirements exist for meat, poultry, and their products (see GAIN-EGYPT (2019-0025) Food and Agricultural Import Regulations and Standards Country Report – FAIRS Narrative Egypt 2020) and the FSIS Export Library.

Islamic Slaughter Certification: Halal certification is required for export to Egypt. Halal certificates are issued by ISEG Halal, Egypt’s sole entity for halal certification, certifying that the shipment of meat beef, mutton, poultry, and their derivatives have been slaughtered according to Islamic rites and sharia laws. Certifying statements should note that all adequate precautions were taken to prevent contamination with non-halal products, and accordingly, the product is suitable for consumption by Muslims in any part of the world.

On January 5, 2020, the Government of Egypt issued Prime Ministerial Decree No. 35/2020, establishing a new state entity in the form of a joint-stock company integrated by the Ministries of Islamic Affairs, Agriculture and Land Reclamation, and the General Organization for Export and Import Control (an agency of the Ministry of Trade and Industry). This joint-stock company ISEGHALAL, is the
sole official Egyptian entity responsible for granting halal certification. (see GAIN-EGYPT (EG2020-0002)Egypt's Halal Certification and Policy)

**Hormone-Free Certification, Beef and Dairy Products:** Egypt’s National Food Safety Authority on November 15, 2019, assumed responsibility for handling food imports. However, NFSA continues to rely on import requirements issued by other agencies such as the General Organization for Veterinary Services (GOVS). GOVS, through a memorandum-of-understanding, continues to issue import permits, as well as sample and test beef and dairy product imports on the behalf the National Food Safety Authority.

Previously in 2012, GOVS started requiring the submission of hormone-free certificates for beef and dairy products as part of its import permit licensing requirements. Egypt’s GOVS, however, did not enforce the submission of hormone-free certificates; opting instead to test product upon arrival for synthetic hormones.

To resolve the issue of detentions and rejections at port, GOVS stopped requiring hormone-free certificates as of December 2019, and opted instead to test imports at destination for the presence of synthetic hormones.

**Fish and Fish Products:** Export certificates accompanying fish and fish products shipped to Egypt must attest to the fishing method, potential level of contamination, as well as dates of fishing, packaging and freezing. Attestations must indicate that the fish and their products were not harvested using explosives. Similarly, the certificates must confirm that the fish were not caught in areas contaminated by radiation, fertilizers, or pesticides. Dates of fishing, packaging and freezing (below -18 degrees centigrade) must be indicated on accompanying documents.

**Section IV – Government Certificate Legal Entry Requirements**

**General Requirements**

- Original certificate must accompany shipment at time of entry.
- Certificates are used for only the accompanying shipment since it carries the details of the shipment.
- Modification to any certificate is not permitted once issued and shipped with the accompanying the product.
## Section V – Other Certification/Accreditation Requirements to Ensure Market Entry

</tr>
<tr>
<td>Dairy Products</td>
<td>Certificate of Analysis</td>
<td>Analysis demonstrating fat, moisture, plate count, antibiotic presence, and potential pathogen presence must be included.</td>
</tr>
</tbody>
</table>
Additives: On September 2020, the Egyptian Food Safety Authority issued Decision 4 (2020) regarding food additives accepted for use by industry (see: EG2020-0060: Report Name: Egypt National Food Safety Authority Issues Food Additive Regulation). The decision replaces Decree 204 (2015) of Ministry of Health regulated food additives. U.S. exporters of food additives should note that pre-registration with Egypt’s Ministry of Health required prior to shipment is no longer valid, as NFSA’s decision replaced this decree. Moreover, NFSA did not notify any parallel procedure, that it would apply. Also, NFSA did not issue import requirements for the import and use of food additives. Thus, it is not mandatory to include batch numbers packaging and packing lists for added traceability. However, it is important to maintain complete record-keeping until clear guidelines are published. This would also include, documentation accompanying food additives describing products using both their scientific and common names. Exporters of these products are urged to work closely with NFSA and local importers.

Bio-Fortified Foods: Bio-fortified foods is now covered by NFSA according to NFSA a definition of special dietary foods. Imports of bio-fortified foods will follow the same procedures of special dietary foods. Exporters of bio-fortified foods should note that these products require pre-registration with NFSA prior to shipment. Exporters of these products should contact local importers to stay updated on the registration process and if NFSA commenced handling these products.

Canned Foods: U.S. exporters of canned foods are advised to include batch numbers in packing lists and packaging. Egyptian authorities depend on batch numbers for traceability in case of a rejected shipment or in the eventuality of product recalls. Failure to include these numbers will delay customs clearance.

Planting Seeds: Prior approval is required from the Ministry of Agriculture’s Central Administration of Seed Certification and Testing (CASC) for the import of seeds for planting. Once an approval is granted, the Central Administration for Plant Quarantine will issue a seed import license. Firms wishing to export seeds for planting will be required to provide an international seed testing certificate or a testing certificate issued from an official inspection station abroad including the variety, the degree of purity and the germination percentage, prior to applying for an import permit from the Ministry of Agriculture.

Upon issuance of an import permit, subsequent shipments must be accompanied by the Egyptian import permit, a U.S. seed testing certificate, and the applicable phytosanitary certificate. Since requirements for import of these products is complex and time-consuming, exporters are urged to work with Egyptian importers and Ministry of Agriculture officials well in advance of shipping.

**TABLE 2: EGYPT, List of Other Certification/Accreditation Requirements**

SOURCE: FAS Cairo office research.
Oils – Atypical: Oils considered non-standard must be accompanied by a certificate of analysis describing their chemical composition. Non-standard oils are not clearly defined, but generally considered by Egypt to be blended or essential oils, not typically shipped for human consumption. U.S. exporters of these products are urged to work with Egyptian importers to ensure compliance with Egypt’s customs regulations.

**CERTIFICATE**

I certify that I am licensed or authorized under the United States Grain Standards Act (7 U.S.C. 71 et seq.), to inspect the kind of grain covered by this certificate.

**QUANTITY (This is NOT a Weight Certificate)**

32,388,250 Pounds

**LOCATION**

Terminal 1 Elevator

**IDENTIFICATION OF CARRIER**

M/V OCEAN VOYAGER

**GRADE AND KIND** (in accordance with the Official United States Standards for Grain)

U.S. No. 2 or better Hard Red Winter wheat, Dockage 0.7%

- Test weight per bushel: 62.5 lbs.
- Moisture: 9.9%
- Heat-damaged kernels: 0.0%
- Damaged kernels (total): 0.0%
- Foreign material: 0.6%
- Shrunk and broken kernels: 1.4%
- Defects (total): 2.0%
- Contrasting classes: 0.3%
- Wheat of other classes: 0.6%

**STOWAGE**

Holds Nos. 1, 3, and 6.

**REMARKS**

Protein 12.0%, 12.0% moisture basis.

**APPEAL TO THE BOARD OF APPEAL INSPECTION**

This certificate is issued under the authority of the United States Grain Standards Act, as amended (7 U.S.C. 71 et seq.), and the regulations thereunder (CFR 600.0 et seq.). It is issued to show the kind, class, grade, quality, condition, or quantity of grain or the condition of a carrier or container for the storage or transportation of grain, or other facts relating to grain as determined by official personnel. The statements on the certificate are considered true at the time and place the inspection or weighing service was performed. The certificate shall not be considered representative of the lot if the grain is transferred or otherwise transferred from the identified elevator or container of feed, or other material is added to or removed from the total lot. If this certificate is not canceled by a superseding certificate, it is receivable by all offices and all courts of the United States as prima facie evidence of the truth of the facts stated therein. This certificate does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal law.

**WARNING**

Any person who shall knowingly falsify, make, issue, alter, file, or counterfeiting this certificate, or participate in any such actions, or otherwise violate provisions in the U.S. Grain Standards Act, the U.S. Warehouse Act, or related Federal laws, is subject to criminal, civil, and administrative penalties.

The conduct of all services and the licensing of inspecting/grading/sample personnel under the regulations governing such services shall be accomplished without discrimination as to race, color, religion, sex, national origin, age, or handicap.
# FGIS Stowage Examination Certificate

**FORM FGIS-915**  
(1-91)  
Previous edition of 1-89 may be used.

**UNIFIED STATES DEPARTMENT OF AGRICULTURE**  
FEDERAL GRAIN INSPECTION SERVICE

**OFFICIAL STOWAGE EXAMINATION CERTIFICATE**

**PORTLAND, OREGON**  
**DATE OF SERVICE** 4/7/XX

I certify that on the above date the following identified service was performed with the following results:

<table>
<thead>
<tr>
<th>Identification of Carrier</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>M/V OCEAN VOYAGER</td>
<td>Portland at anchor</td>

<tbody>
<tr>
<td>Hold Nos. 1, 3, and 6.</td>
</tr>
</tbody>
</table>

**Results**

- [X] Stowage area examined on the above date and found to be substantially clean, dry, free of insect infestation, and suitable to store or carry grain or commodity.
- [ ] Stowage area examined on the above date and found not suitable to store or carry grain or commodity (see remarks for reason).

**Remarks**

**Applicant**  
Maritime International, Ltd.

**Inspector**  
Jerry Marsh

---

This certificate is issued under the authority of the United States Standards Act, as amended (7 U.S.C. 71 et seq.), and the regulations thereunder (7 CFR Part 11) or the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 et seq.), and regulations thereunder (7 CFR Part 11) as appropriate. It is issued to show the condition of a carrier or container for the storage or transportation of grain or commodity. The statements on the certificate are considered true at the time and place the inspection service was performed.

If this certificate is not canceled by a superseding certificate, it is renewable by all officers and all courts of the United States as prime face evidence of the truth of the facts stated therein. This certificate does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal law.

**Warning:** Any person who shall knowingly falsify, issue, alter, forger, or counterfeit this certificate, or participate in any such actions, or otherwise violate provisions in the U.S. Grain Standards Act, the Agricultural Marketing Act of 1946, or related Federal laws, is subject to criminal, civil, and administrative penalties.

The conduct of all services and licensing of inspecting/gdining/vamping personnel under the regulations governing such services shall be accomplished without discrimination as to race, color, religion, sex, national origin, age, or handicap.

This certificate is issued under the authority of the United States Grain Standards Act, as amended (7 U.S.C. 71 et seq.), and the regulations thereunder (7 CFR 200-30). It is issued to show the kind, grade, quality, condition, or quantity of grain, or the condition of a carrier or container for the storage or transportation of grain when there is no change in the grain as determined by official personnel. The statements on the certificate are considered true at the time and place the inspection of the weighing service was performed. The certificate shall not be considered a representation of the kind, grade, quality, or quantity of grain as shipped or otherwise transferred from the identified carrier or container or of grain shipped or otherwise transferred from the terminal or facility. If this certificate is not canceled by a superseding certificate it shall be held in evidence in all courts of the United States as prima facie evidence of the truth of the facts stated therein. This certificate does not compel anyone to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or other Federal law.

WARNING: Any person who shall knowingly falsely make, alter, forge, or counterfeit this certificate, or participate in any such writings, or otherwise violate provisions in the U.S. Grain Standards Act, the U.S. Warehouse Act, or related Federal laws, is subject to criminal, civil, and administrative penalties.

The conduct of all services and the licensing of personnel under the regulations governing such services shall be accomplished without discrimination as to race, color, religion, sex, or national origin.

**FSIS Fish and Fish Products Export Certificate form 9060-5S**

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0205-0153. This time requirement to complete this information collection is estimated to average 33 minutes per response, including the time for reviewing instruction, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

## Product Information:

1. **PRODUCT NAME 1**
   - Production Date: 1/01/2018
   - Type of Packaging: Box
   - Expiration Date: 1/01/2019
   - Quantity: 100

**Total number of products:** 1

## Additional Information:

(e.g., consignee/importer, lot number)

## Attestation:

The U.S. Food and Drug Administration certifies that the product(s) described above is subject to its jurisdiction under the U.S. Federal Food, Drug, and Cosmetic Act (the Act). The product(s) described above may not be sold or offered for sale in the United States. The company has certified to the U.S. Food and Drug Administration that:

- the product(s) accords to the specifications of the foreign purchaser;
- the product(s) is not in conflict with the laws of the country to which it is intended for export;
- the shipping package for the product(s) is labeled on the outside that it is intended for export; and
- the product(s) is not sold or offered for sale in the United States.

Based on the information above, the product(s) listed above may be exported pursuant to Section 801(e)(1) of the Act.

**Exporter Name and Address:**
Export LLC
123 Main Street
Washington, DC 20001

**Product Information:**

| 1. PRODUCT NAME 1 | Production Date: 1/01/2018 | Expiration Date: 1/01/2019 | Type of Packaging: Box | Quantity: 100 |

**Total number of products:** 1

**Additional Information:**
(e.g., consignee/importer, lot number)

**Attestation:**
The product(s) described above and the manufacturing/processing facility where it is produced are subject to the jurisdiction of the Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act. It is certified that the above product(s) may be marketed in, and legally exported from, the United States of America at this time. The manufacturing/processing facility in which the product(s) is produced is subject to periodic inspections. The last such inspection showed that the facility, at that time, appeared to be in substantial compliance with applicable U.S. requirements for the product(s) listed above.
