Report Name: Food and Agricultural Import Regulations and Standards Export Certificate Report

Country: Singapore
Post: Singapore

Prepared By: Ira Sugita
Approved By: Megan Francic

Report Highlights:
This report discusses food and agricultural export product certificates currently required by the Singapore Government.
Executive Summary

This report provides information on the food and agricultural export product certificates required by the Singapore Food Agency, the national body that oversees food safety and food security in Singapore. It covers the certificate purpose, attestations, and entry requirements.

Section I. List of All Export Certificates Required by Singapore Government:

| in beef cuts, processed beef and offal are allowed provided the establishments are in the AMS Beef Export Verification program for Singapore. | 9435-1 Letterhead Certificate (FSIS Form 2630-9) | Dates | Safety
| Frozen oysters, frozen blood cockle meat, frozen cooked prawns, and frozen raw/cooked crab meat | Any State Export Health Certificate | Each consignment must be accompanied by a health certificate issued by the competent authority of the exporting country, certifying that Singapore’s animal health and food safety requirements have been complied with. | Food Safety
| Live oysters | Any State Export Health Certificate | Each consignment must be accompanied by a health certificate issued by the relevant authority of the exporting country, certifying that Singapore’s animal health and food safety requirements have been complied with. | Food Safety
| Imported fresh fruits and vegetables (unprocessed and raw fruits and vegetables) | N/A | According to the Control of Plants (Import & Transshipment of Fresh Fruits & Vegetables) Rules, imported fresh fruits and vegetables should not contain any prohibited pesticide, or levels of pesticide residue or toxic chemical residue exceeding the | Food Safety

**SFA**
| Processed foods | Health certificates and laboratory analytical reports may be required for specific food products. Examples include certificate of Hazard Analysis Critical Control Point (HACCP), Good Manufacturing Process (GMP), attestation of export and factory license. Documentary proof is required for specific foods to confirm that the imported products are produced under sanitary conditions in regulated establishments; including infant cereal and formulas, pasteurized liquid milk, minimally processed fruits and vegetables, and traditional cakes. | Varies according to specific food products. Generally, importers should ensure that the processed food products are produced in an establishment under proper supervision of the competent food authority of the exporting country or which has a quality assurance program acceptable to SFA. | Food Safety | SFA |
| Natural Mineral Water & Spring Water | Authentication certification issued by authority of country of origin to certify that the mineral water is genuine. A site plan showing water source. Export health certification including microbiological analysis | Microbiological tests and chemical tests to confirm that microbe level and chemical residue level do not exceed those established in the Food Regulations Act. | Food Safety | SFA |
| Packaged drinking water (including distilled water, drinking water, and mineralized water) | Copy of the factory license where the water was processed and packaged. | Microbiological tests and chemical tests to confirm that microbe level and chemical residue level not to exceed those established in the Food Regulations Act | Food Safety | SFA |
| Soy sauces, oyster sauces and sauces containing soy or oyster sauce as an ingredient | Analysis report and 3-MCPD laboratory | Analysis report that confirms ingredients do not have more than 0.02 ppm of 3-monochloropropane-1,2-diol (3-MCPD) | Food Safety | SFA |
| Further processed egg products, such as cooked omelets, frozen egg patties, crepes, hard-boiled eggs, mayonnaise, and foods containing egg extracts. | AMS Processed Egg and Egg Products Export Certificate | HPAI/LPAI free at least 3 months prior to export or heat treated as per OIE guidelines, and free from harmful levels of contaminants. | Food Safety | SFA |
| Table eggs | AMS Shell Egg Grading Egg Certificate | Grading of shell eggs and disease-free statements. | Food Safety | SFA |
| Processed eggs and foods containing eggs, such as liquid, frozen, or dried eggs, with or without added ingredients. | FSIS Form 9060-5EP (Egg Product Export Certificate of Wholesomeness) | Eggs should meet FSIS requirements and eligible for commerce. | Food Safety | SFA |
|  | FSIS Letterhead Certificate | Products are fit for human consumption, in compliance with SFA’s veterinary import conditions. | Food | SFA |
Complete details on required U.S. food and agricultural export certificates for Singapore can be found on the [FSIS Export Library (Singapore)](https://www.fsis.usda.gov/).

**Section II. Purpose of Specific Export Certificate(s)**

Please refer to the “Purpose” column in the chart in Section I.

**Section III. Specific Attestations Required on Export Certificate(s)**

Please refer to the “Attestation Required on Certificate” column in the chart in Section I.

**Section IV. Government Certificate’s Legal Entry Requirements**

The Singapore Food Agency (SFA), a statutory board under the Ministry of the Environment and Water Resources, took over all food-related regulatory responsibilities from the defunct Agri-Food and Veterinary Authority (AVA) in April 2019. At the same time, a National Center for Food Science (NCFS) was established under SFA to consolidate the food laboratory capabilities of AVA. All of AVA’s animal related functions (including animal and wildlife management) transferred to the Animal and Veterinary Service (AVS) of the National Parks Board (NParks), under the Ministry of National Development (MND). Trade contacts report that, to date, SFA has adopted AVA’s science-based risk analysis and management approach based on international standards such as Codex and OIE.

Several food/food products entering Singapore must originate from establishments approved by SFA. Also, multiple food/food products, including meat and meat products, processed eggs, fresh table eggs and live poultry, require proper accreditation and approved procedures with SFA. Overseas establishments that supply these products are required to apply for accreditation with SFA through the supplying country’s competent authorities. While other imported foods such as processed food products and fresh fruit/vegetables do not require facility registration, they are required to be sourced from suppliers that are under proper supervision of approved overseas regulatory authorities.

After complying with all export prerequisites, the importer can then apply for an import permit through the [Networked Trade Platform](https://www.ntp.gov.sg) (NTP). SFA requires import permits for all food and food products brought into Singapore, regardless of the mode of transport.

**Meat and Poultry Products:**
Every consignment of imported meat product must be accompanied by a health certificate issued by a veterinary authority of the exporting country, certifying that Singapore’s animal health and food safety requirements are met. Every consignment of meat product will be inspected by SFA and sampling for laboratory analysis may be required. Some consignments may be placed on “hold and test” pending the outcome of the laboratory analysis. For the United States, relevant FSIS certificates include Form 9060-5 (Meat and Poultry Certificate of Wholesomeness), FSIS Form 9435-1 and Letter of Certificate (FSIS Form 2630-9).

In 2020, SFA simplified the procedures and conditions for U.S. suppliers intending to export processed beef and offal to Singapore. U.S. suppliers are no longer required to go through a registration and approval process with SFA, provided they are already under the AMS Export Verification program for Singapore. As with other imported beef products, all U.S. processed beef and offal product suppliers must still continue to be in compliance with SFA’s veterinary import conditions.

U.S. suppliers intending to export eviscerated poultry with head and feet on are required to use FSIS Form 9060-5. Suppliers must enter in the certificate statement area that poultry with head and feet on is in compliance with SFA’s import conditions for poultry, and processed under a USDA’s specific religious exemption permit. For details on the statement, please refer to the FSIS Export Library, under “Documentation Requirements”.

**Fish Products:**

Imported fish is regulated under the Wholesome Meat and Fish Act and its subsidiary legislation. Fish products refer to any of the varieties of marine, fresh water, crustacean, aquatic mollusca, marine sponge, trepang and other form of aquatic life, but excluding ornamental varieties. An import permit issued by SFA is required for every consignment of fish product.

Imported fish products are subject to mandatory inspection by SFA before sale is permitted. Sampling for laboratory analysis may be required. Some consignments may be placed on “hold and test” pending the outcome of the laboratory analysis before sale is permitted.

Generally, fish may be imported from any country without obtaining a health certificate. However, restrictions and conditions apply to fish classified as “high risk” products and fish specified under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

**Fruits and Vegetables:**

In general, fresh fruits and vegetables imported from the United States do not require export health or phytosanitary certification, but usually must undergo routine checks on arrival and are tested for pesticide residues. Exporters must ensure that produce containers (baskets, cartons, etc.) are labelled properly, including name and address of the producers, product description and date of export/packing. For fresh fruits/vegetables, no application for SFA accreditation is required.

For preserved fruits and vegetables, exporters are required to comply with the labeling requirements stipulated in the Food Regulations, including microbiological standards, restrictions on the use of food
additives (e.g. chemical preservatives, sweetening agents, colors, etc.) and the maximum limits for various pesticide residues. For minimally processed (MP) peeled fruits and vegetables, microbiological and chemical tests are carried out. For certain commodities, such as groundnuts, pistachios, cashew nuts and corn, inspection and chemical analysis is carried out for the detection of aflatoxins or other mycotoxins.

**Processed Foods:**

For certain types of processed food products, exporters have to produce documentary proof that the imported products are produced under sanitary conditions in a regulated establishment. The regulated source documents that SFA accepts as documentary proof include:

- Certificate of HACCP (Hazard Analysis Critical Control Point)
- Certificate of GMP (Good Manufacturing Practices)
- Health Certificate (issued by competent food or veterinary authority of exporting country)
- Attestation of export (issued by competent food or veterinary authority of exporting country)
- Factory license (issued by regulatory authority of the exporting country)

All imported processed food products are subjected to inspection. Samples may be taken for laboratory analysis.

**Specific Food Products:**

For the import of specific food products, additional documents such as laboratory reports and health certificates may be required in the import permit application. Examples of specific food products include mineral water, soy sauce and oyster sauce.

For additional SFA information on specific food products and their requirements, please click [here](#) (updated as of April 23, 2020).

**Fresh Eggs:**

Fresh eggs must come from SFA-approved layer farms and only from the following countries: United States, Australia, Denmark, Finland, Japan, West Malaysia, Netherlands, New Zealand, Poland, Spain, Sweden, Korea, Thailand, and Ukraine. Each consignment of fresh eggs must be derived from a single farm. Every imported consignment must be accompanied by a veterinary health certificate issued by the relevant veterinary authority of the exporting country, and the certificate must be dated within seven days of import.

**Processed Eggs:**

Processed eggs must be imported from SFA-approved sources. Please use SFA’s database to search for [approved overseas food establishments](#). Accreditation is done at three levels: Exporting country level; individual establishment in the approved country level; and the products from the approved establishment level.
Each consignment of processed eggs must be accompanied by a health certificate issued by the competent authority of the exporting country. This is to certify that the imported products comply with Singapore’s animal health and food safety requirements.

Section V. Other Certification/Accreditation Requirements

For further details on food export requirements in the Singapore market, please refer to the FAS/Singapore website.
Appendix I. Electronic Copy or Outline of Each Export Certificate

FSIS Form 9060-5

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0583-0153. The time required to complete this information collection is estimated to average 35 minutes per response, including the time for reviewing instruction, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

**CERTIFICATION**

The undersigned certifies herewith:

a. The United States was free of foot-and-mouth disease and rinderpest for 6 months immediately prior to the date of export.

b. The products are fit for human consumption and every precaution has been taken to prevent contamination prior to export.

c. The United States has been free of swine vesicular disease and Classical Swine Fever during the last 6 months. (This requirement applies only to pork and pork products.)

d. The pork and pork products were derived from carcasses that were tested negative for trichinosis, or were subject to a freezing process or other mitigation process that guarantees the destruction of the parasite Trichinella spiralis. (This requirement applies to pork meat and pork tongues. It should be deleted for pork byproducts and meat of other species.)

e. The poultry and/or poultry products are free from evidence of Newcastle Disease and fowl cholera. (This requirement applies only to poultry and poultry products.)

f. The canned products have been manufactured and inspected in accordance with Section 431.1 through 431.12 of the USDA Regulations. (This requirement applies only to canned products.)

g. The meat was not treated with chemical substances or preservatives that are injurious to health.

h. The meat was derived from animals which were slaughtered, processed, packed and stored under sanitary conditions under official veterinary supervision in federally inspected establishments. The Director-General, Agri-Food and Veterinary Services recognize all federally inspected establishments as eligible to export to Singapore.

PREVIOUS EDITIONS ARE OBSOLETE
Letterhead Certificate: Beef (on or after May 5, 2015)

United States
Department of Agriculture

Food Safety and Inspection Service
Washington, D.C. 20250

Letterhead Certificate for Beef and Beef Products produced on
or after May 5, 2015 for Export to Singapore

Date Issued: ___________________________ Certificate Number: ___________________________

1. The United States is recognized by the World Organization for Animal Health (OIE) as
having negligible BSE risk, satisfying the conditions in Chapter 11.5 of the 2013 Terrestrial

2. The product was derived from cattle that were born, raised and slaughtered in the United
States or imported from countries approved by the government of Singapore. Note: Shipments
destined for US military consumption only are exempt from this requirement.

3. The product was not derived from suspect or confirmed BSE cases, or suspect or
confirmed progeny or cohorts of BSE cases, as described in the Terrestrial Animal Health
Code adopted by the OIE.

4. The product was derived from cattle that were slaughtered in the United States and were not
subjected to a stunning process with a device injecting compressed air or gas into the cranial
cavity, or to a pithing process.

5. The product was derived from cattle that were subject to ante-mortem and post-mortem
inspection.

6. Specified risk materials¹ have been cleanly removed from products shipped to Singapore
without contamination of the meat.

7. In the case of processed beef, the meat is not derived from mechanically separated/recovered
meat.

Signature of FSIS Veterinarian: ______________________________________________________

Printed Name: ________________________________________________________________

Title/ Professional Degree: ______________________________________________________

__________________________________________

¹ Specified Risk Materials refer to the brain, skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the
vertebrae of the tail), the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum) and dorsal
root ganglia from cattle 30 months of age and older, and the distal ileum of the small intestine and the tonsils from all cattle.

FSIS Form 2630-4 (8/96) EQUAL OPPORTUNITY IN EMPLOYMENT AND SERVICES
Letterhead Certificate: Poultry (did not originate from areas under “Ineligible Products” section)

FSIS Letterhead Certificate for Poultry and Poultry Products for Exports to Singapore

Date Issued: _______________  Certificate Number: _______________

1. Highly pathogenic avian influenza (HPAI) and H5 and H7 low pathogenicity avian influenza (LPAI) are notifiable diseases in the country of export.

2. The birds from which the meat was sourced were not vaccinated against Notifiable (H5 and H7) subtypes of Avian Influenza as defined by the World Organization for Animal Health (OIE).

3. The poultry meat and meat products were not derived from birds originating from the 10 km radius restricted area around the affected premises in Webster County, MO.

4. The poultry from which the meat was derived were born, raised, and slaughtered in the United States, or were legally imported as day old chicks from countries with equivalent poultry health status.

Signature of FSIS Veterinarian: ________________________________

Letterhead Certificate for Hog Casings to Singapore

Date Issued __________________________ Certification Number __________________________

1. The hog casings originated in the United States of America
2. The hog from which the casings were derived from were slaughtered on __________________
3. The establishment control number of the U.S. slaughterhouse _______________________
4. The establishment control number where the casings were prepared and stored _______________________
5. The casings were processed between (date of slaughter) and (date of packing on the package) _______________________
6. The USA is free from the foot-and-mouth disease, African swine fever, classical swine fever, swine vesicular disease and Teschen disease
7. Casings were packed
   a. So that each package containers products derived from a single species of animal only
   b. They were not exposed to contamination before export, they are packed in clean new or disinfected packaging containers
   c. Each barrel is numerically marked and contains establishment numbers
   d. Hog casings were stored for not less than 30 days after the slaughter of the animals from which they were derived

Letterhead Certificate: Ovine Casing

United States Department of Agriculture
Food Safety and Inspection Service
Washington, D.C. 20250

Letterhead Certificate for Ovine Casings Imported from New Zealand or Australia for Export to Singapore

Date Issued: ____________________ Certificate Number: ____________________

1. The ovine casings in this consignment were derived from animals originating and slaughtered in New Zealand or Australia at establishment number(s) ____________________, on (date or date range) ____________________.

2. The casings were processed and/or stored at U.S. establishment number(s) ____________________.

3. The animals from which the casings were derived received ante mortem and post mortem inspection and were free from disease at the time of slaughter.

4. New Zealand and Australia is recognized by the OIE as free of foot-and-mouth disease (FMD)

5. Casings were packed:
   a) so that each packaging container contains casings derived from a single species of animal only.
   b) so that the casings are not exposed to contamination before export;
   c) in clean, new or disinfected packing containers and
   d) so that the official establishment number of the establishment were the casings were packed is readily visible on the outer wrapping or package.
