

Required Report: Required - Public Distribution

Date: April 26, 2023

Report Number: HA2023-0002

Report Name: FAIRS Export Certificate Report Annual

Country: Haiti

Post: Port-au-Prince

Report Category: FAIRS Export Certificate Report

Prepared By: Fritzner Cledo

Approved By: Eric Baylor

Report Highlights:

This report describes the major export certificates required by the Government of Haiti for imports of food and agricultural products. The following sections of this report indicate the certificates required for each category of products, including their purpose, the requesting ministry, and their outlines.

Executive Summary

This report addresses the certificates required by the Government of Haiti to authorize the entry of food and other agricultural products to Haiti. There are no major changes in the requirements for imported food to Haiti.

Section I: List of all Export Certificates Required by Haiti and the Products They Cover

Haiti has several documentation requirements for imported food and agricultural products. Such requirements include those related to quality, quarantine, origin, and import control and can vary between products and product categories. However, it is highly recommended that U.S. exporters ensure that all necessary customs clearance requirements have been verified with local authorities and to work closely with Haitian importers to be informed of changes.

Export Certification Requirement Examples

The following provides a sample of products and certification requirements. Please note that not all sample copies of attestations are available, as they differ for each product and are subject to change.

Table A: List of All Export Certificates Required by the Government of Haiti

Product	Title of Certificate	Attestation Required on Certificate	Purpose	Requesting Ministry
All food products	Certificate of Origin	The origin country	NA	Ministry of Economy and Finance
Plant and plant products exempt plant products in cans	Phytosanitary Certificate	The plant and plant products are from areas free of infectious diseases or highly harmful parasites	Sanitary	Ministry of Agriculture, Natural Resources and Rural Development; and Ministry of Economy and Finance
Bulk products including but not limited to rice, wheat flour and sugar	Certificate of weight and quality	The weight of the product The quality of the product	Food quality and tax collection	Ministry of Economy and Finance
	Insurance certificate	Information on the insured product	Tax collection	
Seedlings, seeds, fruits, vegetables, and	Phytosanitary Certificate	Product is recognized as coming from a certified facility for export and is free of infectious disease	Sanitary	Ministry of Agriculture, Natural Resources

ornamental plants		and highly harmful organisms.		and Rural Development; and Ministry of Economy and Finance
Processed foods	Laboratory certificate	Product is recognized by the competent authorities as safe for human consumption.	Food quality	Ministry of Economy and Finance
Animal products including fresh and frozen meat	Zoo Sanitary Certificate	<p>Product is recognized by the competent authorities as coming from a country free of Foot-and-Mouth Disease, Vesicular Stomatitis, Porcine Vesicular Disease, Rinderpest, Blue Tongue Disease, Classic Swine Fever, African Swine Fever, Highly Pathogenic Avian Influenza, Sheep and Goat Pox, and Bovine Spongiform Encephalopathy.</p> <p>Product was prepared in the best hygienic conditions.</p> <p>Product is recognized as coming from inspected animals free of infectious disease.</p> <p>Product has been certified by the competent authorities for human consumption.</p> <p>Product has not been contaminated by aflatoxin, dioxin, or other radioactive products.</p>	Food safety and sanitary	Ministry of Agriculture, Natural Resources and Rural Development; and Ministry of Economy and Finance

		<p>Product was prepared and packaged in officially certified facilities for export and stored at recommended temperature.</p> <p>Confirm that cold chain has never been broken.</p>

Section II: Purpose of Specific Export Certificate

To import food and agricultural products into Haiti, the importer must supply a different set of documents depending upon the category of the product being imported. Those documents include a certificate of origin, phytosanitary certificate, zoo sanitary certificate, certificate of weight and quality, insurance certificate, and laboratory certificate. The purpose and the requesting ministry for each document are listed in Table A above by category, including all food products, plant and plant products, bulk products, seeds, seedlings, ornamental plants, processed food, animal and animal products, fresh and frozen meat, table eggs and fertile egg, fishery products, and dairy products.

Section III: Specific Attestation Required on Export Certificate

Each category of products requires specific attestation related to Haitian health and quarantine measures applied by the government of Haiti. Controlled agricultural products can be imported if the sanitary certificate testifies to the absence of pest, disease, and banned treatment processes related to the category of product. The specific attestation of each document is listed above by category. For additional information, review Post's 2023 FAIRS narrative report.

Section IV: Government Certificate Legal Entry Requirements

The original certificate must accompany each shipment at the port of entry for all categories of products. Haiti does not require a certificate of free sale. All certificates listed above are applied to one shipment. Sanitary certificates for plant/plant products and animal/animal products are valid for three months and are part of the documentation required to export those products into Haiti. A supplier's or manufacturer's export declaration or a U.S. state-issued export certificate are accepted as additional documents but cannot substitute official documents.

Table B: Government Certificate Legal Entry Requirements

Title of Certificate	Does the original certificate need to accompany the product at the time of entry?	How long is the certificate valid? Can certificate be applied to multiple shipments?	Will the country accept a Supplier’s or Manufacturer’s Export Declaration as proof of compliance?	Will the foreign country accept a U.S. state- issued export certificate?	Will the country derogate export certificates? Which certificates? How do you apply?
Certificate of origin	Yes	3 months, but are valid only once to facilitate one shipment entry	Yes, this is required in addition to other required certificates listed in Table A	Yes, this is required in addition to other required certificates listed in Table A	Yes, the country may derogate a certificate that does not comply with the requirements on a case by case basis
Phytosanitary certificate	Yes	”	”	”	”
Certificate of weight and quality	Yes	”	”	”	”
Insurance certificate	Yes	”	”	”	”
Laboratory certificate	Yes	”	”	”	”
Sanitary certificate	Yes	”	”	”	”

Section V: Other Certification/Accreditation Requirements

Apart from Export Certificates, products being exported into Haiti must also meet other requirements, which are covered in Post’s 2023 FAIRS narrative report.

Appendix I

A detailed outline of each certificate has been provided for each category of products in Table A. The U.S. Government is the official authority to issue a phytosanitary or zoo sanitary certificate. A laboratory must be authorized by the U.S. Government to be able to issue a laboratory certificate. An insurance company must be legally registered internationally to be able to issue an insurance certificate.
