

Required Report: Required - Public Distribution

Date: October 03, 2022

Report Number: EG2022-0024

Report Name: Food and Agricultural Import Regulations and Standards
Export Certificate Report

Country: Egypt

Post: Cairo

Report Category: FAIRS Export Certificate Report

Prepared By: Shaza Omar and Tayo Akingbe

Approved By: Kurt Seifarth

Report Highlights:

In June 2022, Egypt launched a trial phase of the Advanced Clearance Information system (ACI) on airfreight. The government is expected to fully apply the electronic ACI system in October 2022. This comes after the October 1, 2021, launch of the ACI in sea ports. Traders must register within the designated platforms (CargoX for exporters and ACI for importers). The Egyptian government will no longer require Egyptian embassy authentication on certificates of origin. Egypt notified of new halal requirements and procedures for food products. On August 15, 2022, the government of Egypt issued a WTO/TBT addendum highlighting products requiring halal certification and procedures for obtaining a certificate. The notification sets out product lists identified by HS codes. This was disclosed via a Technical Barriers to Trade (TBT) third addendum notification to the World Trade Organization (WTO). Neither the notification's commitment to the commenting period nor its entry into force date are specified.

Executive Summary

In June 2022, Egypt launched a trial phase of the Advanced Clearance Information system (ACI) on airfreight. The government is expected to fully apply the electronic ACI system in October 2022. In October 1, 2021, Egypt launched the Advanced Clearance Information system (ACI). The newly developed customs system was initially launched in a trial mode on April 1, 2021, and was officially launched in October. Traders must register within the designated platforms (CargoX for exporters and ACI for importers). The Egyptian government will no longer require Egyptian embassy authentication on certificates of origin as noted by the general manager of Misr Technology Services (MTS). It is expected that successful implementation of the new customs systems will reduce the average clearance time from the current 28 days to one day as indicated by Minister of Finance.

The ID number developed through the upload of the shipment's documents on the platform called ACID and is required on all shipment documents. However, control agencies such as plant quarantine, veterinary quarantine, and food safety authority, agreed not to include the ACID on the phytosanitary/sanitary and health certificates.

On December 1, 2021, Egypt published a WTO technical barrier to trade (TBT) notification to notify the expansion of products requiring halal certificates. The products notified included milk and dairy products, along with meat, poultry, and their products. Egypt still has not issued any official standard, technical regulation, or requirements on guidance with this new requirement. Accordingly, there is no clear guidance or any decision regarding the labelling of the current or newly added products.

On December 1, 2021, Egypt published a WTO/TBT notification on the expansion of products requiring halal certificates. The products notified included milk and dairy products, along with meat, poultry, and their products.

On April 4, the government of Egypt issued a WTO/TBT addendum waiving the requirement of halal certificates until September 30, 2022. This comes after two communications issued in March by the General Organization for Veterinary Services (GOVS). Both communications included instructions for exporters that certificates were required but without fees (see GAIN EG2022-0008 Egypt's Prime Minister Waives Halal Certification Fees for Milk and Dairy Products Until October 1 22 - Halal Certification Requirement Still in Question). Conversely, this WTO notification completely removes the requirement of both the halal certificates on milk and dairy products, as well as the fees for issuing the certificates, until September 30, 2022. (see: [GAIN EG2022-002 Egypt Notifies New Halal Requirements and Procedures for Food Products](#)) It is unclear what the requirements will be after October 1, 2022. The draft halal standard that has been developed by the Egyptian Organization for Standardization (EOS) has yet to be approved or notified.

In June 2, 2021, the National Food Safety Authority (NFSA) Board of Directors approved mandatory technical regulations on the permissible residue levels of pesticides for food of plant and animal origin (See [GAIN EG2021-0022 Egypt's National Food Safety Authority Issues Pesticides Technical Regulation](#)).

Section I – Required Export Certificates

TABLE 1: List of Export Certificates Required by the Government of Egypt (MATRIX)

PRODUCT	CERTIFICATE NAME	ATTESTATION	PURPOSE	REQUESTING MINISTRY
All Products	Certificate of Origin	That the product is of U.S.-origin	Certification of country origin	Ministry of Finance/Egypt Customs Authority
All Products	Health Certificate	That the product is safe for consumption	Certification of food safety	National Food Safety Authority
Grains and Oilseeds	Phytosanitary Certificate (USDA - Animal and Plant Health Inspection Service (APHIS) (NOTE: The certificate must include the import permit number issued by the Central Authority for Plant Quarantine)	That the product complies with Egypt’s phytosanitary import requirements in accordance with the regulated pest list issued in the Ministry of Agriculture and Land Reclamation decree 562 (2019) – Most recent Plant Quarantine Regulations	Phytosanitary certification	Ministry of Agriculture/Central Administration for Plant Quarantine
Grains and Oilseeds	Grains Inspection Certificate (USDA – Federal Grain Inspection Service (FGIS) (NOTE: This is a Quality/Grading	That the product maintains a specified quality/grading conformity	Quality certification	National Food Safety Authority General Organization for Export and Import Control “Soybean or oil, corn for feed and wheat for private sector use”

	Conformity Certificate)			
Grains and Oilseeds	Stowage Examination Certificate (USDA – Federal Grain Inspection Service (FGIS))	That the product maintains a specified quality/grading conformity	Quality certification	National Food Safety Authority General Organization for Export and Import Control “Soybean or oil, corn for feed and wheat for private sector use”
Vegetable Oils	Certificate of Analysis (USDA – Federal Grain Inspection Service (FGIS) and/or by a private laboratory)	That the product maintains a specified quality/grading conformity	Certification that Laboratory results for the product matches contract terms and conditions.	National Food Safety Authority
Meat and Meat Products; Poultry, and Poultry Products (*)	Export Certificate (USDA – Food Safety and Inspection Service (FSIS)) Forms: 9060-5, 9060-5A (Continuation sheet 1), and 9060-5B (Continuation sheet 2)	That the product maintains a specified quality/grading conformity	Certification of product safety and wholesomeness	General Organization for Veterinary Services National Food Safety Authority
Meat and Meat Products; Poultry, and Poultry	Islamic Slaughter Certificate	That the meat is halal	Certification that the product derives from animals slaughtered according to the	General Organization for Veterinary Services

Products			Islamic rites	
Day-old Chicks, Hatching Eggs	Veterinary Certificate	Free of disease	Health certification	General Organization for Veterinary Services
Fish and Fish Products	Health Inspection Certificate Certificate of Origin (National Oceanic and Atmospheric Administration (NOAA))	Fish and fish products not caught utilizing explosives or in contaminated waters	Health certification	General Organization for Veterinary Services Verified by GOVS and NFSA at point entry.
Fish and Fish Products	Export Certificate (USDA – Food Safety and Inspection Service (FSIS) Form: 9060-5S)	Product safety and wholesomeness	Health certification	General Organization for Veterinary Services Verified by GOVS and NFSA at point entry.
Dairy Products	Sanitary Certificate (USDA – Agricultural Marketing Service (AMS))	Product safety and wholesomeness	Health certification	General Organization for Veterinary Services National Food Safety Authority
	Subject to Halal certification	The Dairy products are halal	Halal Certification	General Organization for Veterinary Services National Food Safety Authority

Fruits and Vegetables	Phytosanitary Certificate (USDA - Animal and Plant Health Inspection Service (APHIS))	That the product complies with Egypt's phytosanitary import requirements in accordance with the regulated pest list issued in the Ministry of Agriculture and Land Reclamation decree 562 (2019) – New Plant Quarantine Regulations	Phytosanitary certification	Ministry of Agriculture/Central Administration for Plant Quarantine
Planting Seeds	Phytosanitary Certificate (USDA - Animal and Plant Health Inspection Service (APHIS))	(NOTE: Ministry of Agriculture and Land Reclamation authorization is required for the import of seeds for planting)	Phytosanitary certification	Ministry of Agriculture/Central Authority for Plant Quarantine

NOTE: (*) Any processed products containing meat or poultry must meet the same requirements listed under Meat, Poultry, and Products. For additional requirements of meat, poultry, and products see the FSIS Export Library:
<http://www.fsis.usda.gov/wps/portal/fsis/topics/international-affairs/exporting-products/export-library-requirements-by-country/Egypt>.
 SOURCE: FAS Cairo office research.

Section II – Purpose of Specific Export Certificates

See Section I, Table 1: List of Export Certificates Required by the Government of Egypt (MATRIX) for clarification of the specific purposes of certifications currently required by Egypt.

Section III – Special Attestation Required on Export Certificates

Export Certificate: The export certificates will vary according to the product. The certificate must indicate that the product is produced under a recognized process, ensuring its freedom from public health hazards. The certificate should also indicate that the product is sold for human consumption in the country of origin without restrictions. Egypt accepts the state certificate of free sale. For more information on the entities that issue a state level certificate of free sale, please visit <https://www.fas.usda.gov/certificate-free-sale-point-contact-list>. If questions arise regarding a certificate or attestation needed, exporters should contact FAS Cairo (Post) or the Egyptian importing firm prior to shipping.

Certificate of Origin: The certificate of origin is required by the Egypt Customs Authority. The General Organization for Export and Import Control (GOEIC) is no longer responsible for most imports of food and food products. The role of GOIEC in Agriculture products is limited to soybean for crushing, corn for feed use and private sector wheat imports. The National Food Safety Authority (NFSA) is responsible for imports as of November 15, 2019. (See: [GAIN Report Number:EG-19010 - Egypt, Establishment of the National Food Safety Authority](#))

The certificate of origin must indicate the manufacturing location for the product being imported. State and/or local authorities, including local chambers of commerce in the same jurisdiction as the manufacturing facility may issue the document. Should the product be packed/processed in the exporting country (i.e., the United States) but originate in another, the product's certificate of origin must indicate the initial production area information.

Grain and Oilseeds: A certificate attesting that aflatoxin testing has been completed must accompany all grain and oilseed shipments. The NFSA mandates aflatoxin levels be less than two parts-per-million (ppm) on any imported grain shipment. Egyptian authorities require that grain shipments be accompanied by paperwork indicating the crop year and/or production date of the imported goods. All grain imports must adhere to the Egyptian standard 1601 (2005). The standard specifies the quality/grading characteristics, as well the permissible tolerances of contaminants.

Meat and Meat Products, Poultry and Poultry Products: Exporters of animal products must work closely with their Egyptian importers, as well as to check the U.S. Department of Agriculture (USDA) – [Food Safety and Federal Inspection \(FSIS\) Export Library](#) frequently for the latest updates – these requirements are subject to change and are strictly scrutinized by customs authorities.

In addition to the Certificate of Wholesomeness (FSIS 9060-5) a letterhead certificate must accompany each shipment. For meat and meat products the accompanying letterhead must attest that:

- Foot-and-mouth disease (FMD) and rinderpest have not occurred in the United States during the previous 12-months.
- The product was derived from animals born in the United States and/or from animals legally imported into the United States.
- The United States is recognized by the World Organization for Animal Health (OIE) as being a negligible bovine spongiform encephalopathy (BSE) risk country.
- The product was not derived from animals that were slaughtered in an official disease eradication program.
- The product does not contain or is not contaminated with specified risk materials as defined by the USDA Food Safety and Inspection Service in U.S. regulations, 9 CFR 310.22(a). (see <https://www.law.cornell.edu/cfr/text/9/310.22>)

For whole frozen poultry, chicken leg quarters, drumsticks and thighs, a letterhead certificate attesting the following must accompany the shipment:

- That the poultry meat is derived from birds that were not under official quarantine for serious epizootic diseases affecting poultry including highly pathogenic notifiable avian influenza (HPNAI), as defined by the World Organization for Animal Health.
- The meat is obtained from poultry found to be free of any clinical signs of systemic infectious or contagious diseases to which the species is susceptible as determined by ante- and post-mortem inspection.
- The poultry meat was handled under hygienic conditions under federal veterinary inspection and has not been treated with and does not contain any preservatives, coloring matter, hormones or other substances harmful to human health.
- The poultry meat is wholesome and fit for human consumption.
- The means of transport, handling, and loading conditions meet the hygienic requirements of the United States.

Specific packaging, labeling, and shipping requirements exist for meat, poultry, and their products (see [GAIN-EGYPT \(2019-0025\) Food and Agricultural Import Regulations and Standards Country Report – FAIRS Narrative Egypt 2020](#)) and the FSIS Export Library.

Islamic Slaughter Certification:

On December 1, 2021, Egypt published a WTO technical barrier to trade (TBT) notification to notify the expansion of products requiring halal certificates. The products notified included milk and dairy products, along with meat, poultry, and their products. Egypt still has not issued any official standard, technical regulation, or requirements on guidance with this new requirement. Accordingly, there is no clear guidance or any decision regarding the labelling of the current or newly added products.

On April 4, 2022, the government of Egypt issued a WTO/TBT addendum waiving the requirement of halal certificates until September 30, 2022. This comes after two communications issued in March by the General Organization for Veterinary Services (GOVS). Both communications included instructions for exporters that certificates were required but without fees (see [GAIN EG2022-0008 Egypt's Prime Minister Waives Halal Certification Fees for Milk and Dairy Products Until October 1 22 - Halal Certification Requirement Still in Question](#)). Conversely, this WTO notification completely removes the

requirement of both the halal certificates on milk and dairy products, as well as the fees for issuing the certificates, until September 30, 2022.

On August 15, 2022, the government of Egypt issued a WTO/TBT addendum highlighting products requiring halal certification and procedures for obtaining a certificate. The notification sets out product lists identified by HS codes (see: [GAIN EG2022-002 Egypt Notifies New Halal Requirements and Procedures for Food Products](#))

Halal certification is required for export to Egypt. Halal certificates are issued by ISEG Halal, Egypt's sole entity for halal certification, certifying that the shipment of meat beef, mutton, poultry, and their derivatives have been slaughtered according to Islamic rites and *sharia* laws. Certifying statements should note that all adequate precautions were taken to prevent contamination with non-halal products, and accordingly, the product is suitable for consumption by Muslims in any part of the world.

On January 5, 2020, the Government of Egypt issued Prime Ministerial Decree No. 35/2020, establishing a new state entity in the form of a joint-stock company integrated by the Ministries of Islamic Affairs, Agriculture and Land Reclamation, and the General Organization for Export and Import Control (an agency of the Ministry of Trade and Industry). This joint-stock company ISEGHALAL, is the sole official Egyptian entity responsible for granting halal certification.

Hormone-Free Certification, Beef and Dairy Products: Egypt's National Food Safety Authority on November 15, 2019, assumed responsibility for handling food imports. However, NFSA continues to rely on import requirements issued by other agencies such as the General Organization for Veterinary Services (GOVS). GOVS, through a memorandum-of-understanding, continues to issue import permits, as well as sample and test beef and dairy product imports on the behalf the National Food Safety Authority.

Previously in 2012, GOVS started requiring the submission of hormone-free certificates for beef and dairy products as part of its import permit licensing requirements. Egypt's GOVS, however, did not enforce the submission of hormone-free certificates, opting instead to test product upon arrival for synthetic hormones.

To resolve the issue of detentions and rejections at port, GOVS stopped requiring hormone-free certificates as of December 2019 and opted instead to test imports at destination for the presence of synthetic hormones.

Fish and Fish Products: Export certificates accompanying fish and fish products shipped to Egypt must attest to the fishing method, potential level of contamination, as well as dates of fishing, packaging and freezing. Attestations must indicate that the fish and their products were not harvested using explosives. Similarly, the certificates must confirm that the fish were not caught in areas contaminated by radiation, fertilizers, or pesticides. Dates of fishing, packaging and freezing (below -18 degrees centigrade) must be indicated on accompanying documents.

Pre-Clearance – Advanced Cargo Information (ACI) System: Egypt's Ministry of Finance issued Decree 38/2021 on pre-shipment registration - Advanced Caro Information (ACI) - under a new single window system that seeks to modernize and automate customs administration, simplify procedures, and

reduce clearance times. It is a custom procedure whose steps take place during the pre-shipment stages from the country of export up to arrival at the Egyptian ports. The procedure is complementary to be integrated with the Nafeza platform - applying the single window system. The pre-shipment process generates an ACID that should be added to all documents of the shipment including certificates. However, control agencies such as plant quarantine, veterinary quarantine and food safety authority, agreed not to include the ACID on the phytosanitary/ sanitary and health certificates.

Section IV – Government Certificate Legal Entry Requirements

General Requirements

For U.S. agricultural producers planning to ship their products to Egypt, exporters need to consider the following certificate legal entry requirements:

- Original certificate must accompany shipment at time of entry.
- Certificates are used for only the accompanying shipment since it carries the details of the shipment.
- Modification to any certificate is not permitted once issued and shipped with the accompanying the product.

Section V – Other Certification/Accreditation Requirements to Ensure Market Entry

PRODUCT	DOCUMENTATION	REQUIREMENTS
All Products	Commercial Invoice	Must include country of origin, applicable HS codes, number of units, price per unit, and total value for customs valuation.
All Products	Bill of Lading	Should include names and addresses of the shipper (consigner) and receiver (consignee), shipment date, quantity, exact weight, value, and freight classification.
All Products	Packing List	Must list specific products and batches per container. Weight certificates may be used for bulk commodities.
All Products	Batch Number Certificate	Certain chemicals /food additives will require that batch numbers be tracked for added traceability.
All Products	Certificate of Insurance	In the case of discrepancies, Egyptian officials may request product details as listed to insurers of those goods.
Food Additives	Registration Requirement	Must be pre-registered with the Egyptian Ministry of Health prior to shipment.
Grain and Oilseeds	Certificate of Fumigation	Certification of fumigation must be provided. These services may be provided by the servicing firm or by FGIS.
Grain and Oilseeds	Aflatoxin Analysis	Aflatoxin rates may not exceed 2 ppm. Certification of testing in a public or private lab must be included.
Grain and Oilseeds	Crop Year	Documentation must list the crop year applicable to the shipment.
Vegetable Oils	FOSFA International Regulation Certificate	Evidence must be provided that the loading vessel conforms to FOSFA international regulations.
Vegetable Oils	Exporter statement noting specification of oil/fat	Chemical specifications must be provided for any new or atypical oils.
Meat and Meat Products, Poultry and Poultry	Packaging Requirement	Egyptian regulations require that products be packed in sealed plastic bags/cartons, with labeling inside of packaging. See the FSIS Export Library for other requirements. Exporters of meat and poultry are strongly encouraged to work closely with Egyptian importers, as import regulations are subject to change.

Products		
Fish	Freezing Certificate	Documentation must be provided demonstrating that the products were stored and shipped at -18 degrees centigrade.
Dairy Products	Production Date	Paperwork and/or label must indicate the production date for computation of expiry date.
Dairy Products	Dioxin Analysis	Products must be tested for dioxins.
Dairy Products	Certificate of Analysis	Analysis demonstrating fat, moisture, plate count, antibiotic presence, and potential pathogen presence must be included.
Margarine	Manufacturer Declaration	A certificate indicating the type of oil used in the product must be included
Planting Seeds	Seed Analysis Certificate	Note that prior approval is required from the Egyptian Ministry of Agriculture prior to the importation of any seeds for planting. Exporters are strongly encouraged to work closely with importers and Egyptian officials prior to shipping these products.

TABLE 2: EGYPT, List of Other Certification/Accreditation Requirements

SOURCE: FAS Cairo office research.

Additives: On September 2020, the Egyptian Food Safety Authority issued Decision 4 (2020) regarding food additives accepted for use by industry (see: [EG2020-0060: Report Name: Egypt National Food Safety Authority Issues Food Additive Regulation.](#)) The decision replaces Decree 204 (2015) of Ministry of Health regulated food additives. U.S. exporters of food additives should note that pre-registration with Egypt’s Ministry of Health required prior to shipment is no longer valid, as NFSA’s decision replaced this decree. Moreover, NFSA did not notify any parallel procedure, that it would apply. Also, NFSA did not issue import requirements for the import and use of food additives. Thus, it is not mandatory to include batch numbers packaging and packing lists for added traceability. However, it is important to maintain complete record-keeping until clear guidelines are published. This would also include, documentation accompanying food additives describing products using both their scientific and common names. Exporters of these products are urged to work closely with NFSA and local importers.

Bio-Fortified Foods: Bio- fortified foods are now covered by NFSA, according to NFSA a definition of special dietary foods. **Imports of bio-fortified foods will follow the same procedures of special dietary foods.** Exporters of bio-fortified foods should note that these products require pre-registration with NFSA prior to shipment. Exporters of these products should contact local importers to stay updated on the registration process and if NFSA commenced handling these products.

Canned Foods: U.S. exporters of canned foods are advised to include batch numbers in packing lists and packaging. Egyptian authorities depend on batch numbers for traceability in case of a rejected shipment or in the eventuality of product recalls. Failure to include these numbers will delay customs clearance.

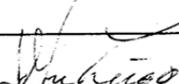

Planting Seeds: Prior approval is required from the Ministry of Agriculture’s Central Administration of Seed Certification and Testing (CASC) for the import of seeds for planting. Once an approval is granted, the Central Administration for Plant Quarantine will issue a seed import license. Firms wishing to export seeds for planting will be required to provide an international seed testing certificate or a testing certificate issued from an official inspection station abroad including the variety, the degree of purity and the germination percentage, prior to applying for an import permit from the Ministry of Agriculture.

Upon issuance of an import permit, subsequent shipments must be accompanied by the Egyptian import permit, a U.S. seed testing certificate, and the applicable phytosanitary certificate. Since requirements for import of these products is complex and time-consuming, exporters are urged to work with Egyptian importers and Ministry of Agriculture officials well in advance of shipping.

Oils – Atypical: Oils considered non-standard must be accompanied by a certificate of analysis describing their chemical composition. Non-standard oils are not clearly defined, but generally considered by Egypt to be blended or essential oils, not typically shipped for human consumption. U.S. exporters of these products are urged to work with Egyptian importers to ensure compliance with Egypt’s customs regulations.
