

Required Report: Required - Public Distribution

Date: November 15, 2022

Report Number: AO2022-0006

Report Name: Food and Agricultural Import Regulations and Standards
Export Certificate Report

Country: Angola

Post: Luanda

Report Category: FAIRS Export Certificate Report

Prepared By: Ricardo Dias and Katie Woody

Approved By: Ali Abdi

Report Highlights:

This report lists major certificates and permits required to export food and agricultural products from the United States to Angola. It is recommended that this report be read with the FAIRS – Narrative Report for a comprehensive understanding of the Angola regulations, standards, and import requirements.

This report was prepared by the office of the Foreign Agricultural Service in Luanda, Angola, for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their customers, who are normally best equipped to research such matters with local authorities before any products are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Table of Contents

Executive Summary:	4
Section I: List all the Export Certificates required by Angola	5
Section II: Purpose of Specific Export Certificate	6
Section III: Specific Attestations Required on Export Certificate	6
Section IV: Government Certificate Legal Entry Requirements	6
Section V: Other Certification/Accreditation Requirements to ensure market entry	7
Appendix I: Direct hyperlink, Electronic Copy, Scanned Copy, or Outline of Each Export Certificate	9

EXECUTIVE SUMMARY

Angolan import permits are specific to the type of product and the country of origin. It is recommended that exporters contact the listed Angolan certifying authorities in the tables below to receive the latest information regarding obtaining a permit.

Animals and Animal Products

In Angola, the Ministry of Agriculture and Forestry, through the Veterinary Services Institute (ISV), is responsible for issuing import permits and veterinary health certificates for the importation of animals and animal products.

Animal Health Law No. 04/04 establishes the general rules governing the production, sanitation, trafficking, import, and export of animals, their products and by-products, and veterinary public health policies throughout Angola.

The animal health law is implemented through Decree No. 70/08, which is not available online. Post can provide the law upon request. The decree establishes the detailed aspects that the law does not specify. It defines the ISV as the body directly responsible for the application of sanitary measures under the Ministry of Agriculture and Forestry. The ISV is responsible for the issuance of several certificates, namely: the hygiene and sanitary certificate; the livestock exploitation license; the sanitary license to import products and by-products of animal origin; and the zoosanitary license to import pets.

Plant and Plant Products

Plant Health Law No. 05/21 establishes the general rules that guarantee the phytosanitary protection of agricultural and forestry production, as well as the transport, trade, import, and export of plants, parts of plants, and plant derivatives intended for sale and consumption.

The National Directorate of Agriculture (DNA) within the Ministry of Agriculture and Forestry is responsible for issuing import permits for plants. To request an import permit, it is necessary send a letter to the DNA National Director, with photocopies of the commercial invoice, the commercial license, and the phytosanitary certificate from the country of origin. DNA accepts health certificates that meet standards set by the UN Food and Agriculture Organization (FAO).

Genetically Engineered (GE) Products

At present, Angola does not allow the use of agricultural biotechnology in production, and imports containing GE components are limited to food aid. In December 2014, the Council of Ministers approved Decree No. 92/04 as a provisional measure pending the establishment of a comprehensive national biosafety system capable of properly controlling the importation, entry, use, and eventual production of GE organisms in the country, but no framework was ever established. Post can share a copy of the decree upon request.

SECTION I: LIST ALL EXPORT CERTIFICATES REQUIRED BY ANGOLA

Table 1: List of Required Export Certificates for Animals and Animal Products

Product	Title of Certificate	Attestation Required on Certificate	Purpose	Requesting Ministry
Animals and animal products	Veterinary Health Certificate	Country of origin; country/zone is free from prescribed or notifiable diseases (e.g. BSE, FMD, Anthrax, etc.); required inspections, isolations, treatments, and tests that have been carried out as prescribed; prescribed bedding, fodder, feedstuffs, transportation, and supervision by official veterinary authority	Confirm that the prescribed regulations and conditions have been met Prevent the introduction of animal diseases into Angola and protect human health	ISV accepts health certificates issued by APHIS.

SECTION V: OTHER CERTIFICATION/ACCREDITATION REQUIREMENTS

Boarding Certificate

The Boarding Certificate is the document that allows the shipment of the goods from the country of origin. According to the regulation on the management of sea freight distribution, ship-owners or maritime operators that are registered with the National Shippers Council (CNC) must oblige exporters to obtain shipment certificates at the origin whenever they hold cargoes to or from Angola.
