

THIS REPORT CONTAINS ASSESSMENTS OF COMMODITY AND TRADE ISSUES MADE BY USDA STAFF AND NOT NECESSARILY STATEMENTS OF OFFICIAL U.S. GOVERNMENT POLICY

Required Report - public distribution

**Date:** 12/14/2017

**GAIN Report Number:** HK1740

## **Hong Kong**

### **Food and Agricultural Import Regulations and Standards - Certification**

#### **FAIRS Export Certificate Report**

**Approved By:**

Alicia Hernandez

**Prepared By:**

Caroline Yuen

**Report Highlights:**

In 2017, the Hong Kong Government (HKG) confirmed that U.S. bison meat can be exported to Hong Kong with a Food Safety and Inspection Service (FSIS) health certificate (FSIS 9060-5). No other changes since the last report.

This report lists the certificates required by the HKG for U.S. agricultural and food exports to Hong Kong. Certificate samples for various product categories are included in the appendix.

**This report was prepared by the Agricultural Trade Office of the Foreign Agricultural Service in Hong Kong for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of certificate requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS.**

(For a general guideline on agricultural and food import regulations, please refer to GAIN Report- [FAIRS Narrative](#))

### **Section I. List of All Export Certificates Required By Government (Matrix):**

Note: APHIS - Animal and Plant Health Inspection Service  
 FSIS - Food Safety and Inspection Service  
 FEHD - Food and Environmental Hygiene Department  
 CITES - Convention on International Trade in Endangered Species of Wild Fauna and Flora  
 AFCD - Agriculture, Fisheries and Conservation Department  
 AMS - Agricultural Marketing Service

Samples Certificates See Appendix

<b>Products</b>	<b>U.S. Issuing Authority</b>	<b>Attestation Required on Certificate</b>	<b>Purpose</b>	<b>Requesting Ministry</b>

	<p>50,000 bacteria per gram and no more than 100 coliform organisms per gram.)</p> <p>Composition analysis has to show percentage of fat, sugar, and milk solids other than milk fat -applies to those frozen confections described as ice cream only. (The frozen confection contains no less than 5% fat, 10% sugar and 7.5% milk solids other than milk fat. This condition applies to those frozen confections described as ice cream only.)</p> <p>The Certificate of Analysis has to include the certificate number of the Certificate of Free Sale or AMS certificate, as appropriate, for cross reference.</p> <p>The Certificate of Analysis must be officially endorsed by a Notary Public.</p>			
Plants	APHIS PPQ Form (A14)		Phytosanitary Certificate	AFCD
(For CITES listed Plants, e.g. ginseng)	CITES certificate		To observe the	

	issued by U.S. Fish and Wildlife Service Required (A15) & (A16)		Protection of Endangered Species of Animals and Plants Ordinance which gives effect to CITES	
Because of risk of animal diseases such as Bovine Spongiform Encephalopathy (BSE) and Avian Influenza cases, the HKG recommends HK importers provide sanitary certificates for the following products: -preserved/stuffed animal specimen -biological products of animal origin -hides and skins of cattle origin -feathers -pet food/animal feed	APHIS certificates	See circulars by Hong Kong government circulars (A17–21)	Sanitary certificates	AFCD
Table Eggs	AMS	Date of production; name and address of processing plant; products fit for human consumption; Disease free certification statements as stated in appendix A22.1 – A22.3	Health certificates	FEHD
Other Egg Products, including powdered eggs and liquid eggs	FSIS	A23	Health certificates	FEHD

## **Section II. Purpose of Specific Export Certificate(s)**

Please refer to the Matrix under Section I.

## **Section III. Specific Attestations Required on Export Certificate(s)**

Please refer to the Matrix under Section I.

## **Section IV. Government Certificate's Legal Entry Requirements**

For meats, egg products, milk, frozen confections, and plant imports to Hong Kong, the relevant Hong Kong laws require that each shipment must be accompanied by a valid health/phytosanitary certificate issued by government authorities. Suppliers or Manufacturers Export Declaration are not regarded as valid certificates.

### **Poultry, Red Meats and Game Meats**

A certificate from FSIS is compulsory. Species should be given as part of product description on FSIS certificates.

If the species is not covered by an FSIS inspection, a certificate issued by APHIS or a state government may be acceptable.

If the shipment is of a game meat product, the certificate must show the scientific name and the origin.

If the game meat comes from a CITES listed species, the shipment needs to be accompanied by a CITES export permit.

U.S. exporters are advised to contact the Food Safety and Inspection Service or ATO Hong Kong to check if any trade protocol has established between the United States and Hong Kong government with regard to the export of a particular exotic meat to Hong Kong.

In 2017, the HKG confirmed that U.S. bison meat can be exported to Hong Kong with a FSIS health certificate.

### **Eggs**

Mandatory certification for table eggs and other egg products including pasteurized egg, liquid egg, and powdered egg products became effective December 5, 2015. U.S. table eggs have to be accompanied by a health certificate issued by AMS together with a "Disease Free Certification Statements for Hong Kong" in order to have access to the Hong Kong market. For other U.S. egg products including pasteurized egg, powdered egg, and liquid egg to be exported to Hong Kong, a health certificate issued by FSIS is required.

## **Seafood Products**

The HKG has shelved its legislative plan to introduce mandatory certification for seafood products.

While no specific Hong Kong laws requires health certificates for marine products, the FEHD strongly encourages importers to obtain certificates issued by U.S. health authorities to accompany imports certifying that the marine products concerned are fit for human consumption. Valid certificates expedite customs clearance. Virtually, all raw-consumed seafood products, for example, oysters, are exported to Hong Kong with a health certificate.

## **Milk and Frozen Confections**

Hong Kong importers are required to obtain prior approval from the Center for Food Safety for bringing in shipments of milk and frozen confections. In addition, each consignment must be accompanied by a valid certificate. For products from the United States, the Hong Kong government accepts certificates issued by a State government.

## **Plants**

The Hong Kong government requires plant shipments from the United States be accompanied by phytosanitary certificates issued by APHIS. If the specie is listed on CITES, a CITES export permit is required as well.

## **Products Containing Living Modified Organisms**

Hong Kong passed a Genetically Modified Organisms (Control of Release) Ordinance and the Genetically Modified Organisms (Documentation for Import and Export) Regulation in March 2010, and November 2010, respectively. There are documentation requirements for shipments containing genetically modified organisms (GMOs) since the commencement of the Ordinance and the Regulation in March 2011. GMOs in the Ordinance are referred to as LMOs or living modified organisms. Shipments containing GMOs for food or feed or for processing must be accompanied by documentation containing the following information:

- If the identity of the GMO is known, the shipment contains such a GMO; if the identity of the GMO is not known, the shipment may contain such a GMO;
- The GMO is not intended for release into the environment;
- The common name, scientific name and, where available, commercial name of the GMO;
- The Internet address of the Biosafety Clearing House;
- The transformation event code of the GMO or, where available, its unique identifier code; and,
- The details of the importer or exporter (such as name, address and contact information) for

further information.

There is no specific requirement regarding the form of documentation accompanying GMO shipments. The use of a commercial invoice or other documents required by existing documentation systems is sufficient.

The HKG uploaded a document sample listing required information for traders' reference at the AFCD's website. ([http://www.afcd.gov.hk/english/conservation/con\\_gmo/con\\_gmo.html](http://www.afcd.gov.hk/english/conservation/con_gmo/con_gmo.html))

Products containing GMO ingredients for release into the environment or for contained use are required to provide different attestations on documents. Also, importers are required to seek prior approval from AFCD before the importation of products containing GMOs, which are intended to be released to the environment.

## **Horses**

USDA APHIS has a bilateral agreement with Hong Kong on U.S. horse exports. Three certificates were developed for the: (1) permanent importation, (2) temporary importation, and (3) transit of U.S.-origin equines based on revised Hong Kong requirements that went into effect on September 20, 2011. The bilateral agreements relax the veterinary examination and animal disease testing requirements and timelines for equines from the United States. For details, please contact APHIS Beijing at 86-10-8531-3033 (fax) or [Connie.L.Bacon@aphis.usda.gov](mailto:Connie.L.Bacon@aphis.usda.gov).

### Letterhead Certificate for Raw Poultry Meat Exported to Hong Kong

Date Issued \_\_\_\_\_ Certificate Number 130405

1. The meat was derived from birds found clinically free from generalized contagious, infectious and parasitic diseases.
2. The meat was derived from birds that were free from clinical signs of avian influenza (AI) and Newcastle disease (ND). The birds have been kept on farms free from AI and ND and not situated in an AI or ND infected zone, as defined by OIE. The birds were slaughtered in an establishment not situated in an AI or ND infected zone and were found to be healthy upon ante- and postmortem inspection.
3. The birds, from which the meat was derived, were subject to ante- and postmortem veterinary inspection by an official veterinarian and the meat was found to be sound, wholesome and fit for human consumption.
4. The birds were slaughtered, processed, cut and stored in establishments approved by USDA/FSIS and are eligible to produce and store poultry meat for domestic and international commerce.
5. The birds have been slaughtered and processed hygienically and the meat complies with all current USDA laws and regulations.
6. The poultry meat was packed and transported under hygienic conditions.
7. The poultry meat has been produced subject to the U.S. National Residue Program. The results of the tests have not provided any evidence of the presence of chemical/drug residues or toxic substances which could be harmful to human health.
8. The consignment of poultry meat was derived from live poultry which had been subjected to ante- and postmortem inspection and were found free of highly pathogenic avian influenza.

Department of  
Agriculture

Food Safety  
and Inspection  
Service

Washington, D.C.  
20250

##### **Letterhead Certificate for the Export of Beef and Beef Products to Hong Kong Slaughtered on or after June 17, 2014**

Date Issued: \_\_\_\_\_ Certificate Number: \_\_\_\_\_

1. The beef or beef products exclude mechanically separated beef, products from advanced recovery system, lean finely textured beef, scrap meat, trimmings or other pieces (whether with or without bone) indistinguishable from trimmings.
2. The feeding of ruminants with meat and bone meal and greaves derived from ruminants has been banned and the ban has been effectively enforced.
3. The beef or beef products were neither derived from nor contaminated with the following specified risk materials: the brain, skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), and dorsal root ganglia of cattle 30 months of age and older, and the tonsils and distal ileum of any cattle regardless of age.
4. The cattle from which beef or beef products were derived were not subjected to a stunning process, prior to slaughter, with a device injecting compressed air or gas into the cranial cavity or to a pithing process.
5. The beef or beef products were derived from cattle that passed ante-mortem and post-mortem inspection. The beef or beef products were derived from cattle that were slaughtered under official supervision in FSIS-inspected establishments. The beef or beef products were derived from cattle free from systemic contagious, infectious and parasitic disease at the time of slaughter.
6. The beef or beef products were produced in accordance with the FSIS National Residue Program, which ensures that the product is free of harmful residues.
7. The United States has been evaluated and classified by the World Organization for Animal Health (OIE) as a country with a negligible-risk status for bovine spongiform encephalopathy (BSE).

To Whom It May Concern:

RE: Certificate of Free Sale and Sanitation

The Dairy Section of the Vermont Agency of Agriculture, Food & Markets, a governmental agency responsible for the licensing and inspection of all dairy operations in the State of Vermont, hereby certifies that

operates a dairy manufacturing establishment, producing both dairy and non-dairy frozen confections, which is licensed by the Vermont Agency of Agriculture, Food & Markets and is inspected by inspectors employed by the State of Vermont.

We certify that the facilities, equipment and raw materials and the processing and packaging procedures meet with all of the sanitary requirements of the State of Vermont and that the operations are in good standing in every respect.

We further certify that the products manufactured by

at their manufacturing plants in

are fit for human consumption and are freely and without qualification sold in the State of Vermont and the United States.

Sincerely,

  
Byron D. Moyer, Chief  
Dairy Section

### HEALTH CERTIFICATE

No: 31010051 (2 of 2)

Re: \* Brand Product from U.S.A.

We certify that:

- (A) Illinois, is designed, equipped and operated in such a way as to produce ice cream, frozen yogurt and other frozen confections of wholesome and salable quality.
- (B) The ice cream, frozen yogurt and other frozen confections are handled, processed, and packed under hygienic conditions and have been pasteurized in accordance with frozen confections pasteurization regulations of the State of Illinois, Department of Public Health, Division of Food, Drugs, and Dairies, USA.
- (C) The ice cream and other frozen confection products are inspected to fulfill the Illinois state regulations which are: maximum 50,000 bacteria per gram and maximum 20 coliform organisms per gram.
- (D) The ice cream products will contain not less than 5% fat, 10% sugar, 7.5% milk-solids-not-fat. (This condition applies only to frozen confections named ice cream.)
- (E) The frozen yogurt has been subjected to heat treatment properly and afterwards fermented by *Streptococcus thermophilus*, *Lactobacillus delbrueckii* subsp. *bulgaricus*, *Lactobacillus acidophilus*, and *Bifidobacterium longum*.
- (F) The titratable acidity of the frozen yogurt and the bacterial quality of it conform to the relevant U.S.A. Code of Federal Regulations, incorporated by reference in State of Illinois Manufactured Dairy Products Rules.
- (G) The product is fit for human consumption.

Quantity  
30 cwt/2 Vanilla Ice Cream Base - 946 ml.  
20 cwt/2 Cappuccino Frozen Cocktail Mix - 946 ml.  
15 cwt/2 Non-Fat Frozen Yogurt - 946 ml.

## A17. Preserved/Stuffed Animal Specimen

### **IMPORTATION/TRANSSHIPMENT OF PRESERVED/STUFFED ANIMAL SPECIMEN TO/VIA HONG KONG**

Hong Kong has no objection to the importation/transshipment of preserved/stuffed animal specimen to/via Hong Kong. No import permit is required for such importation. However, it is recommended that the consignment is accompanied by a veterinary certificate certifying the following, issued/endorsed by the relevant official veterinary authority of the Government in the country of export.

1. The animal carcass(es) was/were derived from animals free from infectious diseases and in accordance with the standards as laid down by the World Organization for Animal Health (OIE).
2. The animal carcass(es) was/were properly treated or processed to kill any infectious or contagious organisms in the carcass(es).
3. For transshipments, prior approval is obtained from the veterinary authority in the country of import for the importation of preserved/stuffed animal specimen.
4. The preserved/stuffed animal specimen(s) was/were packed and sealed to prevent leakage in accordance with the International Air Transport Association (IATA) requirements.

If the specimen(s) was/were derived from endangered species, the specimen(s) must be accompanied by a valid CITES permit issued by the CITES Management Authority of the exporting country/place. For more information, please visit our website at <http://www.cites.org.hk> or contact the Endangered Species Protection Division at 2150 6973.

You are also reminded to seek the approval of the Port Health Office, Department of Health, Hong Kong for the importation of preserved/stuffed animal specimen. (Tel.: 3904 9333; email: [port-ho@dh.gov.hk](mailto:port-ho@dh.gov.hk))

## A18. Biological Products of Animal Origin

### **Importation/transshipment of biological products of animal origin into/via Hong Kong**

Hong Kong has no objection to the importation/transshipments of biological products into/via Hong Kong. No import permit will be issued by this Department for such purpose. However, it is recommended that the following requirements can be complied with.

1. The biological products were derived from animals free from infectious diseases and in accordance with the standards as laid down by the World Organization for Animal Health (OIE).
2. The consignment is accompanied by a veterinary certificate issued/endorsed by the relevant government veterinary authority in the country of export.
3. For transshipments, prior approval is obtained from the veterinary authority in the country of import for the importation of biological products.
4. The biological products were packed and sealed to prevent leakage in accordance with the International Air Transport Association (IATA) requirements.

The veterinary certificate should be sent to this Department at the following address either in person or by post within two weeks after the products arrived in Hong Kong. Should the original copy of the certificate wish to be retained by the importer, please present the original certificate in person to the following address during office hours so that the certified copy can be recorded.

*5th Floor (Counter 9)  
Permit and Certification Unit  
Agriculture, Fisheries and Conservation Department  
Cheung Sha Wan Government Offices,  
303 Cheung Sha Wan Road, Kowloon  
Hong Kong*

You are also reminded to seek the approval of the Port Health Office, Department of Health, Hong Kong for the importation of biological products. (Tel.: 3904 9333; email: port-ho@dh.gov.hk)

#### A19. Hides and Skins of Cattle Origin to Hong Kong

### **IMPORTATION OF ANIMAL PRODUCTS FOR NON-FOOD PURPOSES (EXCEPT PRODUCTS FROM DOGS, CATS, AND ENDANGERED SPECIES) TO HONG KONG**

At present Agriculture, Fisheries and Conservation Department does not have any specific requirements for the importation of animal products for non-food purposes except for animal products from dogs, cats, and endangered species animals. Thus **NO** import permit is required for the importation of animal products for non-food purposes, **this includes hides and skins of animals**, besides those exceptions already mentioned.

In order to facilitate the re-export of these products out of Hong Kong in future, we suggest a sanitary certificate accompanied with **the consignment containing hides and skins of animals** upon arriving in Hong Kong. It is recommended that this sanitary certificate is issued/endorsed by the relevant official veterinary authority of the exporting country's government and should certify the information below.

***“The hides or skins originated from animals that were slaughtered at licensed slaughterhouses and underwent ante-mortem and post-mortem inspection. The animals were found to be free of clinical signs of infectious diseases (transmissible through hides or skins) to humans or animals, and were not killed in order to eradicate a disease epidemic.”***

Regarding the importation of animal products for food purposes, you may call the Centre of Food Safety (CFS) of Food and Environmental Hygiene Department (FEHD) at (+852)1823 or visit its website <http://www.cfs.gov.hk> for details.

#### A20. Feathers

### **IMPORTATION OF FEATHERS TO HONG KONG**

It is recommended that sanitary certificate issued by the competent government veterinary authority of the country of export certifying the following is to be accompanied with feathers importing to Hong Kong.

1. The feathers were derived from birds that were not within an area that was under any restrictions imposed by the national veterinary authority for the control of avian influenza;
2. The feathers were treated by one of the following methods:
  - a. *washed thoroughly in detergent followed by boiling or steam sterilization at a core temperature of at least 100 °C for a minimum of 30 minutes; or*
  - b. *washed thoroughly in detergent followed by formaldehyde fumigation (10% formalin) for 4 hours; and*
3. *Assurance that the treated feathers could not be contaminated by raw materials or by equipment or personnel in contact with raw materials between processing and export.*

A 21. Pet Food

**Importation/transshipment of pet food/animal feed to/via Hong Kong**

Hong Kong has no objection to the importation/transshipment of pet food/animal feed to/via Hong Kong. No import permit will be issued by this Department for such purpose. However, if the products contain materials derived from ruminant and/or poultry origin, it is recommended that a veterinary certificate issued/endorsed by the relevant official veterinary authority of the Government in the country of export is required to accompany with the pet food/animal feed importing into Hong Kong to facilitate trade and re-export. Please find below some relevant certifications for the veterinary certificate for your information.

1. The ruminant animals from which the certified materials were derived were subjected to anti-mortem examination (inspected prior to slaughter), and were not found to show any evidence or clinical signs of any disease transmissible by the certified materials. These animals did not show any clinical signs of generalized central nervous system disease.
2. The feeding of ruminants with meat-and-bone meal and greaves derived from ruminants is banned in the country of production, and this ban is effectively enforced.
3. The products of ruminant origin were derived from animals slaughtered at licensed premises.
4. The certified materials of ruminant origin were not derived from downer animals.
5. Any component of the certified material of bovine origin were not derived from the following Specified Risk Materials from any cattle in any Bovine Spongiform Encephalitis (BSE) affected country; the brain skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), and dorsal root ganglia (DRG) of cattle 30 months of age and older, and the tonsils and distal ileum of the small intestine of any cattle regardless of age.
6. The certified materials of ruminant origin do not include any components of any carcass that was rejected during post-mortem examination as unfit for human consumption.
7. If the product includes materials derived from poultry origin, the product has been treated to ensure the destruction of Avian Influenza virus by one of the following methods.
  - 70° C for at least 30 minutes
  - 75° C for at least 5 minutes
  - 80° C for at least 1 minute
8. The packages have been clearly labeled as “for pet food only” or “dog food” or “cat food” or “not for human consumption”.
9. The product does not contain any prohibited chemical. In the case of the product contains with any specified agricultural and veterinary chemical, it is by law that all information must be clearly displayed on the package, such as the amount of each chemical, instruction for use, the withholding period and the name and address of the importer. (For details, please visit <http://www.legislation.gov.hk/eng/home.htm> and refer to Sections 12 and 13 of Cap 139 sub. Leg.

### Disease Free Certification Statements for Hong Kong

Shell Egg Grading Certificate No. SEA - 1054453 Dated: Dec. 10, 2007

"The U. S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services certifies that:

No cases of notifiable avian influenza (NAI), including the highly pathogenic subtype H5N1, and no cases of velogenic Newcastle disease (VND) have been reported in commercial laying chicken flocks in the county(ies) of origin where the eggs originated for the 3 months preceding departure of this consignment. These eggs were produced in the county(ies) in the state of Arkansas identified below:

Pulaski County

\_\_\_\_\_  
\_\_\_\_\_

The shell eggs covered by this certificate were produced by birds originating from Salmonella enteritidis (SE)-certified breeding flocks which have not been identified within 90 days before shipment by the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, as being infected with SE, including SE phage type 4."
