## Indonesia

## Food and Agricultural Import Regulations and Standards Report

# **FAIRS Export Certificate Report**

Approved By: Garrett McDonald Prepared By: Titi Rahayu

#### **Report Highlights:**

This report updates the 2017 Indonesian FAIRS Export Certificate Report, which lists the major export certificates and other requirements expected by the Government of Indonesia (GOI) from U.S. exporters of food and agricultural products. Information has been renewed in Section III on meat and meat products, and fresh fruit and vegetables; Section V on the halal certificate; and Appendix I list of example meat and poultry export certificate. This report supplements information provided in the 2018 Indonesia FAIRS Country Report.

#### **Disclaimer:**

This report was prepared by the USDA/Foreign Agricultural Service in Jakarta, Indonesia for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate because policies have changed since its preparation, or clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their Indonesian customers (importer), who are normally best equipped to research such matters with local authorities, before any goods are shipped. Final import approval of any product is subject to the importing country's rules and regulations as interpreted by border officials at the time of product entry.

## SECTION II. PURPOSE OF SPECIFIC EXPORT CERTIFICATES

Please refer to the "Purpose" column in the matrix under Section I.

## SECTION III. SPECIFIC ATTESTATION REQUIRED ON THE EXPORT CERTIFICATE

Details of required export certificate attestations for the following products are available in GAIN

#### Report ID1046:

- Bovine genetics (frozen embryos; frozen semen);
- Live animals (horses; day old chicks; breeding pigs; breeding cattle/buffalo/goats/sheep, and wild animals (bovidae family));
- Animal products (pet food; meat & bone meal, blood products of bovine, ovine, or caprine origin, poultry by product meal/feather meal of avian origin; poultry by product meal/feather meal of avian origin; wool, hair, bristles; duck down/duck feather/goose feather intended for industrial use; raw hide, skin of animal origin (bovine, ovine, caprine, swine, horse, rabbit, reptile, wild animal, fish); poultry hatching eggs; bovine bone derived gelatin, bovine hide derived gelatin);
- Meat and meat products (beef, beef offal and beef products; poultry meat; poultry products; milk, milk powder, milk products and cream).

FSIS export certificates for meat and meat products should contain the following information in the remarks section:

- The number from the Ministry of Agriculture's (MOA) import recommendation (see MOA regulation 34/2016)
- The full sixteen-digit number from the Ministry of Trade's import permit (see Ministry of Trade regulation 24/2011)
- The issuance date of the import permit.

For more info on documentation requirements of exporting meat and meat products to Indonesia please refer to FSIS Export Library.

#### **Fresh Fruit and Vegetables**

- The plant quarantine service from the country of origin and transit country must issue phytosanitary certificates.
- Fresh fruit and vegetables from California do not need pre-treatment. However, the additional declaration of the phytosanitary certificate for California horticultural products must state that the imported fruits/vegetables have been produced within a pest infestation free area.
- To date only production areas in the State of California have been declared by the GOI to be free from *Ceratitis capitata, Anastrepha fraterculus, Anastrepha ludens, Anastrepha obligua, Anastrepha serpentine, Anastrepha suspense, Rhagoletis cingulate, Rhagoletis fausta, and Rhagoletis pamonella* infestation. Fruits and vegetables from other states shall be treated prior to shipment (including fumigation, vapor heat treatment (VHT), and irradiation) or in-transit cold treatment with temperatures appropriate for fresh fruit and vegetables, whenever the commodities are originating from the production area where the regulated quarantine fruit flies are known to have occurred. The approved treatment shall be explained in the Phytosanitary Certificate under the Treatment Information column. For in-transit cold treatment, a temperature record must be attached to the Phytosanitary Certificate. A list of fresh fruits and vegetables, fruit fly names, and treatments can be viewed in the appendix of MOA regulation 42/2012.
- Fruit and vegetables must be packed in carton boxes and transported as a containerized cargo.

On January 5, 2018 the GOI extended the recognition of the U.S. food safety control system of fresh foods of plant origin (FFPO) through MOA decree No. 35/2018, which will expire in January 2021. FFPO recognition simplifies the export process, eliminating the need for laboratory testing for exports of 89 U.S. fruits, vegetables, soybeans, wheat, and other plant origin products. In addition, only FFPO products that originate in countries that have food safety systems recognition or registered labs by

Indonesia can enter the country through the port of Jakarta. A full list of these commodities, as described in MOA decree No. 35/2018, can be seen in the appendix below.

#### **Fish and Fishery Products**

Under the Ministry of Marine Affairs and Fisheries (MMAF)'s regulation No. 46/2014, the GOI has reduced the number of certificates required for the import of fish and fisheries products. A health certificate for fish and fisheries products and a certificate of origin are now required. The new format health certificate is required as of September 2015. Appendix 1 shows a GOI approved sample health certificate for U.S. fish and fishery products. Previously, the GOI required several export certificates for fish and fishery products, including a health certificate for fish quarantine and/or health certificate of origin, certificate of analysis, and certificate of good aquaculture practices.

Please also see Appendix I in GAIN Report <u>ID1456</u> for samples covering the requirements for the following products:

Sample "Certificate of Poultry Meal and Feather Meal of Avian Origin" Sample "Certificate of Origin for Dairy Products" Sample "Certificate of Quality of Poultry by Product Meal" Sample "Sanitary Certificate for Dairy Products" Sample "Health Certificate of Pet Food" Sample "Health Certificate of Egg Products" Sample "Statement Letter of Ineligible Phytosanitary Certificate" Sample "Export Certificate of Processed Plant Products" Sample "Halal Export Certificate" Example of Prior Notice Sample "Declaration of Conformity and Table of Product List" Sample "State Apostle" Sample "Letter of Authorization" Sample "Fish Certificate of Origin"

Appendix I in this report shows samples for the following products: Sample "Meat and Poultry Export Certificate of Wholesomeness"

Sample "Phytosanitary Certificate for California Horticultural Products" Sample "Phytosanitary Certificate of Horticultural Products from States other than California" Sample "New Health Certificate of Fish and Fishery Products" Table 1. Indonesia: List of Recognized U.S. Fresh Foods of Plant Origin

#### SECTION IV. GOVERNMENT CERTIFICATE LEGAL ENTRY REQUIREMENTS

1. Health certificates of animal origin:

- must accompany the commodities at the time of entry. If the commodities are transported by vessel, the certificate should be sent earlier to the quarantine officer at the port of entry;
- must be issued by a veterinarian authorized by the U.S. Department of Agriculture and endorsed

by an APHIS/Veterinary Services (VS) veterinarian;

- can be applied to only one shipment;
- must include the full sixteen digits of the GOI's import license number and the issuance date of this import license, as well as the import recommendation number;
- State-issued certificates will be accepted by the Indonesian government (GOI). However, GOI requires that a standard certificate form be used, including institution logo/symbol, health certificate number, consistency on whether handwritten or typed, and consistent size and weight paper. If possible, GOI would like to have the certificate electronically to make it easier for checking certificate validity and releasing the commodity faster; and
- Export declarations by suppliers or manufacturers as proof of compliance are acceptable.
- 2. Phytosanitary certificates should be in accordance with recommendations of the International Plant Protection Convention (IPPC). Additionally, fumigation certificates are required for products that are considered as a vector of disease, such as soybeans and corn.
- 3. Certificates of Free Sale for processed food products are required. Certificates may be issued from the state where the company is headquartered or by the state or locality where a product is produced.
- 4. Pet food products must be accompanied by a document that says the products certified herein are officially authorized for sale and use as pet foods in the United States.
- 5. Meat and meat products
  - a) The imported meat should be shipped directly from the country of origin to the port of entry in Indonesia unless prior approval is obtained from the Ministry of Agriculture.
  - b) The packing of meat shall be originally from the country of origin, has a label, and made from special material, food grade, as well as non-toxic.
  - c) During transportation, meat and meat products with halal certificate should be separate with non-halal products.
  - d) During transportation, the temperature in the container shall be kept stable (between  $-18^{\circ}$  to  $-22^{\circ}$  C).
- 6. Fresh fruit and vegetables

Phytosanitary certificates must be issued by the plant quarantine service from the country of origin and in-transit country.

- 7. The GOI requires phytosanitary certificates for processed plant products. However, if the authority institution in the exporter country was not able to issue the certificate (shown by a statement letter from the authority in the country of origin), the GOI can accept the export certificate for processed plant products with explanation on the treatment of the products in the certificate. In addition, the statement letter should also include the address of the authorization office.
- 8. ased on the Law 33/2014 on Halal, all products that are distributed and traded in Indonesia must have halal certificate by October 17, 2019. However, as of to date the government is still in the process of establishing new procedures to obtain the halal certificate, including for imported products.

#### SECTION V. OTHER CERTIFICATION/ACCREDITATION REQUIREMENTS

- 1. Any entry of animals, materials of animal origin, or products made of materials of animal origin are subject to the following conditions:
  - a) Importers must obtain an import permit from the Ministry of Trade. The permit is valid for 6 months from the issuance of an import recommendation.
  - b) The permit for import of live animals, animal products, and processed animal products that possess risk of zoonosis spread will be released after obtaining an import recommendation (SRP) from the Ministry of Agriculture. The Minister of Agriculture delegates authority on the issuance of SRP to the Directorate General of Livestock and Animal Health Services. Import recommendations can be applied for at any time, but must be used to apply for an import permit to the Ministry of Trade within 3 months.
  - c) The permit for import of processed animal products will be released after obtaining recommendation from Head of the National Agency of Drug and Food Control.
  - d) Must be accompanied by a certificate of origin stating that the animals, materials of animal origin or their products came from an area known to be free from quarantine disease in category I and acknowledged by a GOI authorized official if originating from abroad.
  - e) Importation must be made through designated points of entry.
- 2. Certificate of origin country can be issued by a chamber of commerce or a notary public.
- 3. Materials of animal origin or products made of materials of animal origin intended for human consumption, except pork but including dairy products, must also be accompanied by a halal certificate from an accredited overseas halal certifying body. The Indonesian halal authority (the Indonesian Council of Ulama) only requires a copy of the halal certificate. Regulations do not require separate certificates with each shipment, although port quarantine officers encourage exporters and importers to submit the original halal certificate to quarantine headquarters and to attach a copy with each shipment. Post recommends that exporters contact their halal certifying body directly to determine if they require certification for each shipment.
- 4. Prior to importing, seed importers must request an import permit from the Ministry of Agriculture (DG of Ornaments Plant, DG of Food Crops, or DG of Estate Crops) through the MOA's Center for Plant Variety Protection and Agriculture Licensing. The permit is valid for 6 months.
- 5. Imported processed products must complete a product registration with BPOM. Product registration requires a letter of appointment from the processed food producer. This letter can be submitted to BPOM directly by an Indonesian distributor. These documents shall be properly notarized and accompanied by a document which verifies that the company is a legal entity in the United States (e.g. a certificate origin from the Chamber of Commerce).
- 6. In addition, to prove that the Good Processed Food Production Method (CPPOB) has been applied to the processed food product, a certificate of Good Manufacturing Practice (GMP) or Hazard Analysis and Critical Control Points (HACCP) or ISO 22000 or Risk Management Program (PMR)

or a similar certificate, which is issued by the authorized or accredited institution and/or from the local government audit result, is required.

- 7. Other certificates needed for certain food products, including raw materials and food additives, are as follows:
  - a) Composition analysis certificates from producers (per batch) or from accredited laboratories. The certificate must be original and valid for maximum 12 months.
  - b) A Genetically Modified Organism (GMO) or non-GMO statement for food containing potatoes, soybeans, corn, tomatoes and their derivative products (including food additives). However, if the derivatives have undergone further refining processes to the point where the GE material cannot be identified (such as: oils, fats, sucrose, and starch), they do not require any GMO or non-GMO statements.
  - c) Aflatoxin analysis result for nuts and peanut products
  - d) Halal certificate from the Indonesian Council of Ulama for products that indicate Halal logo in the label.
  - e) Indonesian National Standard (SNI) certificate and Potassium Bromate (KBrO<sub>3</sub>) Free Certificate for wheat flour.
  - f) Radiation free certificate for products originating from Japan and dairy products originating from Europe.
  - g) Results of residue analysis 3-Monochloro Propandiol (3-MCPD) from accredited government laboratories for isolated soy protein, soy sauce, and hydrolyzed vegetable protein.
  - h) Original document listing production date and expiration date, as well as batch number/lot number//production code.
  - i) Products with short shelf life, such as: milk and milk products, and other high-risk foods, should have at least 2/3 of shelf life remaining at time of export.
  - j) The SNI certificate for bottled water, cocoa powder, refined sugar, and salt.
  - k) Melamine analysis result for raw material that is suspected contains melamine, such as: milk, flour, protein vegetable, egg and its processed, and for food additives (ammonium bicarbonate).
  - 1) Chloramphenicol analysis result for honey products.
  - m) Formalin analysis result for products that is suspected contains formalin.
  - n) Analysis certificate of Sudan Red for Oleoresin Capsicum products.
- 8. In addition to submitting a phytosanitary certificate, the commodities that are imported from FFPO recognized countries must submit prior notice. Prior notice is a statement letter regarding the identity of FFPO that must be completed by the producer or exporter in the country of origin. Prior notice, which must be submitted <u>online</u>, should be issued prior to FFPO arrives in Indonesia. Prior notice, which accompany the consignments, must indicate the date and place of loading, date and place of arrival/destination, type of transportation, product name, quantity imported, country of origin, packing unit, import purpose and container's identification number. Additional information regarding FFPO import procedures can be found at GAIN Report<u>ID1637</u>.
- Imports of certain fresh horticultural products (as listed in <u>Attachment I of Ministry of Agriculture</u> <u>Regulation No. 38/2017</u>) require a Good Agricultural Practices (GAP) certificate or other internationally recognized equivalent certificate, farm registration, and packing house registration. All documents must be translated to Indonesian language.

- 10. According to Ministry of Trade (MOT) regulation 71/2015, MOT requires horticulture products entering Indonesia to be verified by Indonesian surveyors and/or their authorized agents in the country of origin. This verification is not a food safety and/or quarantine inspection, but rather a way for the MOT to oversee the completeness and correctness of import documents, product accountability, and the physical condition of the products.
- 11. In addition to a health certificate and certificate of origin, imported fishery products must also be labeled (for packaged form) or accompanied by an invoice/packing list (for bulk form).
