

Voluntary Report – Voluntary - Public Distribution

Date: January 23, 2024

Report Number: CH2024-0006

Report Name: WTO Notified Quality Grading Standard for Gramineous Seeds

Country: China - People's Republic of

Post: Beijing

Report Category: FAIRS Subject Report, WTO Notifications, Sanitary/Phytosanitary/Food Safety, Planting Seeds

Prepared By: FAS China Staff

Approved By: Adam Branson

Report Highlights:

On January 5, 2024, the People's Republic of China (PRC) notified the National Standard for Quality Grading for Gramineous Seeds (Draft for Comments) to the World Trade Organization (WTO) under G/TBT/N/CHN/1786. This report provides an unofficial translation of the notified standard and a comparison with the current standard. The comment period is open for 60 days from the date of notification. Comments may be submitted to the PRC TBT National Notification and Enquiry Center at tbt@customs.gov.cn.

Summary:

On January 5, 2024, the PRC notified [National Standard for Quality Grading of Gramineous Seed](#) (link in Chinese) to the WTO under [G/TBT/N/CHN/1786](#). According to the notification, the updated draft national standard applies to products covered by HS codes 100310 (Barley seed for sowing), 100410 (Oat seed for sowing), 120923 (Fescue seed for sowing), 120924 (Kentucky blue grass seed for sowing), and 120925 (Rye grass seed for sowing), among other forage/turf and related gramineous plant seeds. The current standard, [GB 6142—2008](#) (link in Chinese), was released on June 27, 2008 and came into effect on January 1, 2009.

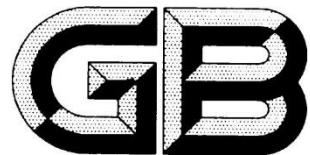

Notable changes in the notified draft standard include:

- (1) Maximum moisture content for all listed seeds is set at 13 percent (see Table 1 below for comparison);
- (2) Added grading indicators for 27 forage and/or turf grasses and deleted grading indicator for one species (*Achnatherum sibiricum* (Linn.) Keng);
- (3) Modified indicators include germination rate and pure live seed (PLS) values of some grasses.

This report provides an unofficial translation of the notified standard. Changes to the current standard are highlighted in the comparison table. Exporters should conduct their own review.

Please note that the table at the end of this report includes technical specifications and requirements for gramineous and non-gramineous (i.e. cereal and oilcrop) seeds. Moreover, the bulk of the report text fits standard 8.5 inch by 11-inch paper while the table is sized for A4 paper.

**Issued by State Administration for Market Regulation and
Standardization Administration of China**

Foreword

This document is drafted in accordance with the rules provided in GB/T 1.1-2020 *Directives for Standardization – Part 1: Rules for the Structure and Drafting of Standardizing Documents*.

This document supersedes GB 6142-2008 *Quality Grading of Gramineous Seed*, and in addition to structural adjustment and editorial changes, differs from GB 6142-2008 in the following technical aspects:

- The content in the “Scope” has been changed;
- The definition of “pure live seed value” has been changed (see 3.1, 3.1 of 2008 edition);
- The "quality grading" has been changed to "technical requirements" (see Chapter IV, Chapter IV of 2008 edition);
- The "moisture content" has been changed to 13 percent, and the column of "moisture content" has been deleted (see Table 1, Table 1 in 2008 edition);
- A quality grading index has been added for the seeds including *Agropyron cristatum* (L.) Gaertn × *A. desertorum* (Fisch.) Schult., *Agrostis capillaris* L. syn. *Agrostis tenuis* Sibth., *Brachiaria decumbens* Stapf., *Cleistogenes songorica* (Roshev.) Ohwi, *Echinochloa frumentacea* (Roxb.) Link, *Hort. Berol.*, *Elymus breviaristatus* (Keng) Keng f., *Elymus trachycaulus* (Link) Gould ex Shinners, *Elytrigia in termedia* (Host) Nevski, *Festuca sinensis* Keng, *Helictochloa hookeri* (Scribn.) Romero Zarco, *Leymus secalinus* (Georgi) Tzvel., *LoliumX hybridum* Hausskn. (*L. mul tiflorum* XL. *perenne*), *Melinis minutiflora* Beauv, *Nassella vrdula* (Trin.) Barkworth Stpa vrdula Inn., *Neyraudia reynaudiana* (Kunth) Keng., *Oryzopsis hymenoides* (Roem. et Schult.) Ricker ex Pipe, *Panicum virgatum* L., *Paspal um vagina tum* Sw., *Pennisetum americanum* X *P. purpureum*, *Poa annua* L., *Poa compressa* L, *Poa cymophila* Keng ex C. Ling, *Poa nemoralis* L., *Roegneria turczaninovii* (Drob.) Nevski, *Roegneria nutans* (Keng) Keng, *Sorghum bicolor* (L.) Moench., and *Stipa tenuissima* (Trin.) (see Table 1, Table 1 in 2008 edition);
- One species of the “*Achnatherum sibiricum* (Linn.) Keng” has been deleted, and a “Note” has been added (see Table 1, Table 1 in 2008 edition);
- The purity rate has been changed for the seeds including *Eremochloa ophiuroides* (Munro) Hack., *Festuca arundinacea* Schreb., *Festuca ovina* L., *Festuca pratensis* Huds., *Festuca rubra* L., *Lolium spp.* X *Festuca arundinacea*/*F. pratensis*, *Leymus chinensis* (Trin.) Tzvel., *Lolium multiflorum*

Lamk., *Lolium perenne L.*, *Paspalum notatum FlUgge*, *Phleum pratense L.*, *Poa pratensis L.*, *Poa trivialis L.*, *Puccinellia ch inampoensis Onwi*, *Puccinellia distans (L.) Parl.*, *Puccinellia tenuiflora (Turcz.) Scribn. & Merr.*, *Setaria i talica (L.) Beauv. var. germanica (Mill.) Schred.*, and *Zea mays L.* (see Table 1, Table 1 in 2008 edition);

- The germination rate has been changed for the seeds including *Agropyron cristatum (L.) Gaertn.*, *Agropyron desertorum(Fisch.)Schult.*, *Agropyron mongolicum Keng*, *Agrostis gigantea Roth.*, *Agrostis stolonifera L.*, *Alopecurus pratensis L.*, *Anthoxanthum odoratum L.*, *Arrhenath erum elatius (L.) Presl*, *Avena sativa L.*, *Axonopus compressus (Sw.) Beauv.*, *Bromus catharticus Vahl*, *Bromus inermis Leyss.*, *Bouteloua dactyloides (Nutt.) Columbus* syn. *Buchloe dactyloides (Nutt.) Engelm.*, *Cynodon dactylon (L.)Pers.*, *Dactylis glomerata L.*, *Echinochloa crusgalli (L.) Beauv.*, *Elymus dahuricus Turcz.*, *Elymus nutans Griseb.*, *Elymus sibiricus L.*, *Elytrigia elongata (Host) Nevski*, *Eragrostis curvula (Schrad.) Nees*, *Eremochloa ophiuroides (Munro) Hack.*, *Euchlaena Mexicana Schrad.*, *Festuca arundinacea Schreb.*, *Festuca ovina L.*, *Festuca pratensis Huds.*, *Festuca rubra L.*, *Lolium spp. X Festuca arundinacea/F. pratensis*, *Holcus lanatus L.*, *Hordeum bogdanii Wilensky*, *Hordeum brevisubulatum (Trin.) Link*, *Hordeum vulgare L.*, *Leymus chinensis (Trin.)Tzvel.*, *Lolium multiflorum Lamk.*, *Lolium perenne L.*, *Panicum maximum Jacq.*, *Paspalum dilatatum Poir.*, *Paspalum notatum FlUgge*, *Paspalum urvillei Steud.*, *Paspalum wettsteinii Hack.* (*Paspalum virgatuml.*), *Pennisetum americanum (L.) Leeke.*, *Phalaris arundinacea L.*, *Phleum pratense L.*, *Poa pratensis L.*, *Poa trivialis L.*, *Psathyrostachys juncea (Fisch.) Nevski*, *Puccinellia ch inampoensis Onwi*, *Puccinellia distans (L.) Parl.*, *Puccinellia tenuiflora (Turcz.) Scribn. & Merr.*, *Roegneria kokonorica Keng*, *Roegneria mutica Keng*, *Secale cereale L.*, *Setaria anceps Stapf ex Massey Sphacelata Stapf*, *Setaria i talica (L.) Beauv. var. germanica (Mill.) Schred.*, *Sorghum bicolor(L.) Moench. × S. sudanense (Piper) Stapf*, *Sorghum sudanense (Piper) Stapf*, *Stipa krylovii Roshev.*, *×Triticosecale Wittmack (Triticum spp. × Secale spp.)*, and *Zoysia japonica Steud.* (Table 1, Table 1 in 2008 edition);
- Th index of other seeds by number has been changed for seeds including *Agropyron cristatum (L.) Gaertn.*, *Agropyron desertorum(Fisch.)Schult.*, *Agropyron mongolicum Keng*, *Agrostis gigantea Roth.*, *Agrostis stolonifera L.*, *Alopecurus pratensis L.*, *Anthoxanthum odoratum L.*, *Arrhenath erum elatius (L.) Presl*, *Avena sativa L.*, *Axonopus compressus (Sw.) Beauv.*, *Bromus catharticus Vahl*, *Bromus inermis Leyss.*, *Bouteloua dactyloides (Nutt.) Columbus* syn. *Buchloe dactyloides (Nutt.) Engelm.*, *Chloris gayana Kunth*, *Chloris virga ta Swartz*, *Cynodon dactylon (L.) Pers.*, *Dactylis glomerata L.*, *Echinochloa crusgalli (L.) Beauv.*, *Elymus dahuricus Turcz.*, *Elymus nutans*

Griseb., *Elymus sibiricus* L., *Elytrigia elongata* (Host) Nevski, *Eragrostis curvula* (Schrad.) Nees, *Eremochloa ophiuroides* (Munro) Hack., *Euchlaena Mexicana* Schrad., *Festuca arundinacea* Schreb., *Festuca ovina* L., *Festuca pratensis* Huds., *Festuca rubra* L., *Lolium spp.* X *Festuca arundinacea*/F. *pratensis*, *Holcus lanatus* L., *Hordeum bogdanii* Wilensky, *Hordeum brevisubulatum* (Trin.) Link, *Hordeum vulgare* L., *Leymus chinensis* (Trin.) Tzvel., *Lolium multiflorum* Lamk., *Lolium perenne* L., *Paspalum dilatatum* Poir., *Paspalum notatum* FlUgge, *Paspalum urvillei* Steud., *Paspalum wettsteinii* Hack. (*Paspalum virgatum*l.), *Phalaris arundinacea* L., *Phleum pratense* L., *Poa pratensis* L., *Poa trivialis* L., *Psathyrostachys juncea* (Fisch.) Nevski, *Puccinellia ch inampoensis* Onwi, *Puccinellia distans* (L.) Parl., *Puccinellia tenuiflora* (Turcz.) Scribn. & Merr., *Roegneria kokonorica* Keng, *Roegneria mutica* Keng, *Secale cereale* L., *Setaria anceps* Stapf ex Massey Sphacelata Stapf, *Sorghum bicolor* (L.) Moench. × *S. sudanense* (*Piper*) Stapf, *Sorgham sudanense* (*Piper*) Stapf, *Stipa krylovii* Roshev., ×*Triticosecale Wittmack* (*Triticum* spp. X*Secale* spp.), *Zea mays* L., and *Zoysia japonica* Steud. (Table 1, Table 1 in 2008 edition);

- The "pure live seed value" has been changed (see Table 1, Table 1 in 2008 edition);
- the Chinese name and Latin name have been changed for seeds including *Agrostis gigantea* Roth., the Latin names of *Agrostis capillaris* L. syn. *Agrostis tenuis* Sibth., *Bouteloua dactyloides* (Nutt.) Columbus syn. *Buchloe dactyloides* (Nutt.) Engelm. and *Pennisetum americanarum* (L.) Leeke., and the Chinese name of *Paspalum urvillei* Steud. has been changed (see Table 1, Table 1 in 2008 edition);
- The “sampling” has been added (see Chapter V);
- The “test method” has been added (see Chapter VI); **FAS China Note:** the current standard has a sampling and test method. **End Note.**
- The title and content of “quality assessment method” have been changed (see Chapter VII, Chapter 5 of 2008 edition); and
- The content in the “Requirement” has been deleted (see Chapter VI of 2008 edition);

Please note that some of the contents of this document may involve patents, and the issuing agency of this document is not responsible for identifying these patents.

This document is proposed by and under the jurisdiction of the Ministry of

Agriculture and Rural Affairs of the People's Republic of China.

The organizations responsible for the drafting of this document: XXXX.

The main drafters of this document: XXX.

The previous editions of this document are as follows:

- this document was first published as GB 6142-1985, and first revised in 2008; and this is the second version.

Quality Grading of Gramineous Seed

1. Scope

This document specifies the technical requirements, sampling and grading of gramineous seeds, and describes the inspection method.

This document is applicable to the quality grading of gramineous seeds produced and sold.

Note: allied species and varieties of a same genus may be used in reference to this document.

2. Normative references

The provisions in the following documents constitute indispensable provisions of this document through normative references in the text. For referenced documents with date, only the version corresponding to that date is applicable to this document; for referenced documents without date, the latest version (including all amendments) is applicable to this document.

GB/T 2930. 1 *Rules for gramineous seed testing - sampling*

GB/T 2930. 2 *Rules for gramineous seed testing - purity analysis*

GB/T 2930. 3 *Rules for gramineous seed testing - other seeds by number*

GB/T 2930. 4 *Rules for gramineous seed testing - germination test*

GB/T 2930. 8 *Rules for gramineous seed testing - determination of moisture content*

3. Terms and definitions

For the purpose of this document, the following terms and definitions apply.

3. 1 Pure live seed value, PLS

The percentage of seeds with live seed value.

4. Technical requirements

The moisture content of gramineous seed should be higher than 13 percent, and all other indexes should comply with the provisions in Table 1.

5. Sampling

The provisions of GB/T 2930. 1 are applicable.

6. Inspection method

6.1 Purity

The provisions of GB/T 2930. 2 are applicable.

6.2 Germination rate

The provisions of GB/T 2930. 4 are applicable.

6.3 Number of other seeds

The provisions of GB/T 2930.3 are applicable.

6.4 Moisture content

The provisions of GB/T 2930.8 are applicable.

6.5 Pure live seed value

The purity and germination rate are determined respectively in accordance with 6.1 and 6.2, and calculated in accordance with equation (1)

$$PLS = P \times G \quad \dots \dots \dots \quad (1)$$

Where, PLS refers to pure live seed value in percentage;

P refers to purity rate in percentage; and

G refers to germination rate in percentage.

7 Rating

7.1 Single index rating

The gramineous seeds are classified by quality according to the five indexes of purity, germination rate, pure live seed value, number of other seeds and moisture content into levels I, II and III. The gramineous seed containing a quarantine object specified by the State is not allowed to be graded by quality.

7.2 Comprehensive rating

The comprehensive rating for quality is performed by using the five indexes of purity, germination rate, number of other seeds, moisture content and pure live seed value given in Table 1, and according to the following requirements:

- a) the quality grade is directly determined when the four indexes of purity, germination rate, number of other seeds and moisture content are in the same level;
 - b) the gramineous seed is considered out-of-grade when any one of the four indexes of purity, germination rate, number of other seeds and moisture content is below level III; and
 - c) where all four indexes are at or above level III, the quality grade should be determined according to following conditions:

- 1) if the purity and germination rate are in the same level, the quality grade should be determined according to the lowest one of the four indexes; and
- 2) if the purity and germination rate are not in the same level, the purity and germination rate are replaced by the pure live seed value, and then the quality grade is determined according to the lowest one of the pure live seed value, the number of other seeds and the moisture content.

Table 1. Quality Requirements for Gramineous Seeds

SN	Chinese name	Botanical name	Level	2024				2008				
				Purity ≥ %	Germination rate ≥ %	Other seeds by number ≤ kernel/kg	Pure live seed value ≥ %	Purity ≥ %	Germination rate ≥ %	Other seeds by number ≤ kernel/kg	Pure live seed value ≥ %	Moisture/ %≤
