2018 - Principal Border Entry Points for U.S. Agricultural Exports

Report Categories:

Agriculture in the Economy

Grain and Feed

Vegetables

Sanitary/Phytosanitary/Food Safety

Approved By:

Orestes Vasquez, ATO Director

Prepared By:

Eduardo Lozano C. Agricultural Specialist

Report Highlights:

In 2017 the United States exported over \$18.6 B. of agricultural and food products to Mexico.

The following report provides an updated summary of the nine principal ports of entry (POE) through which the majority of agricultural products located along the 1,900 mile-long United States–Mexico border enter Mexico.

General Information:

This report contains updated information on Mexico’s most important inland ports of entry (POEs) ranked in terms of value of agricultural and food products based on their geographical location– from West to East. In 2017, the United States exported over \$18.6 billion of agricultural and food products to Mexico. The principal ports of entry in terms of value were: Nuevo Laredo, Tamaulipas with 30.5 percent of all imports representing or USD 5.7 billion; Piedras Negras, Coahuila with 12.3 percent USD 2.3 billion; and Colombia, Nuevo Leon with 11.5 percent or USD 2.1 billion.

Agricultural products imported into Mexico are regulated by Mexico’s Secretariat of Agriculture, Livestock, Rural Development, Fishery and Food (SAGARPA). Inspectors from SAGARPA’s National Service of Health, Food Safety, and Food Quality, or SENASICA, are responsible for inspecting imported agricultural products and ensuring documentary integrity upon entry to Mexico. SENASICA inspections take place at authorized, privately owned inspection facilities known as Verification and Inspection Points (VIPs).

The reader should be aware that live animals destined for Mexico are always inspected on the U.S. side of the border at state-owned or privately -owned livestock pens authorized by SENASICA. On the other hand, Mexico’s Animal Health Law requires that imported animal products and animal by-products, for human and animal consumption be inspected upon entry to Mexican territory at verification and inspection points located on the Mexican side of the border. As of this date, other agricultural products like fresh fruits and vegetables, propagating material, cotton and grains (not transported by rail) are normally inspected on the U.S. side of the border, but can also be inspected at approved VIPs on the Mexican side of the border. Having said that, SENASICA is working towards closing VIP’s on the US side of the border for plant and plant products. As these happen, ATO/Monterrey will be issuing periodic updates.

Fig. 1 Geographical location of the Principal Ports of Entry for US Agricultural and Food Products ranked by order of importance.

January - December 2017		
Port of Entry	\$US Billions	Percent Share
All Ports of Entry	18.89	100
Nuevo Laredo, Tamaulipas	5.75	30.46
Piedras Negras, Coahuila	2.33	12.34
Colombia, Nuevo Leon	2.17	11.5
Cd. Juarez, Chihuahua	2.09	11.11
Cd. Reynosa, Tamaulipas	1.16	6.17
Tijuana, Baja California	1.16	6.16
Nogales, Sonora	0.805	4.26
Mexicali, Baja California	0.475	2.51
Matamoros, Tamaulipas	0.13	0.69

Ports of Entry

Tijuana, Baja California

Overview

In 2017 Tijuana ranked as the sixth most important inland port of entry for imports of agricultural products from the United States with a value of USD1.16 billion. Principal products imported through Tijuana included produce 65 percent of the total or USD 754 million, meat and meat products 30 percent or \$350 million, and grains 5 percent or USD 58 million.

Ranked by volume, top products included: apples 46,684 tons, potatoes 37,997 tons, poultry 42,982 tons, bovine meat 19,347 tons, malted barley 18,298 tons, rice 18,609 tons, and beans 5,200 tons.

Verification and Inspection Points in Tijuana

At the time of this report in this port of entry there are a total of eight establishments approved by SENASICA to operate as verification and inspection points (VIPs) for imported agricultural products. Three VIPs are located on the U.S. side of the border within the county of San Diego, California, for plant and plant products.

On the Mexican side of the border in Tijuana, Baja California, there are five verification and inspection points of these three are authorized for the inspection of animal products and byproducts, and plant and plant products. Also on the Mexican side of the border SENASICA inspects grains, feed additives, and other agricultural products such as animal fat transported by rail at a railyard facility known as “Estación García”, this railyard is not listed as a VIP. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Tijuana

SENASICA officials are stationed in the SAGARPA building at the Otay Mesa Port of Entry. SAGARPA’s working hours are from 9:00 am to 6:00 pm Monday to Friday. For additional information on SENASICA’s office and inspection schedule contact SENASICA’s Inspection Office in Tijuana, Baja California at 52 (664) 624-5520.

Logistics

Products are principally transported by truck; commercial vehicles crossing from San Diego into Tijuana use the Otay Mesa Bridge. Product transported by rail crosses through San Ysidro, California, as well as the Otay Mesa Bridge, California.

Mexicali, Baja California

Overview

In 2017, Mexicali ranked eighth as the most important inland border entry point for agricultural products from the United States with a value of USD 475 million. Principal products imported through Mexicali included grains 46 percent or USD 218 million, poultry 20 percent or USD 95 million, red meat 18 percent or USD 85 million, fresh fruits and vegetables 10 percent or USD 47.5 million, and planting seeds including chili, zucchini, lettuce, onions, alfalfa at 6 percent or \$29 million.

Ranked by volume, top products included corn 214,065 tons, DDGS 55,692 tons, poultry 36,595 tons,

onions 35,268 tons, cantaloupes 15,560 tons, rice 13,441 tons, and lettuce 8,115 tons.

Verification and Inspection Points in Mexicali

There are six facilities approved by SENASICA to operate as VIPs for agricultural products. Two inspection points are located on the U.S. side of the border in Calexico, California for plant, plant products and agricultural machinery. Four VIPs are located on the Mexican side of the border. Of these VIPs, three are for animal products and byproducts, and plant and plant products. The fourth VIP on the Mexican side is Ferromex rail yard authorized for grains, dry plant products, and dry animal products and byproducts. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Mexicali

SENASICA's personnel are stationed at the SAGARPA building at the Puerto Fronterizo Nuevo Mexicali crossing point. SAGARPA's working hours at the VIPs and in the main office are from 9:30 am to 6:00 pm, Monday to Friday. For additional information on SENASICA's work schedule contact SENASICA's Inspection Office in Mexicali, Baja California at 52 (686) 567-8506.

Logistics

Product is transported by truck and rail. Commercial vehicles crossing from Calexico into Mexicali use the West Calexico Port of Entry/Puerto Nuevo International Bridge. Product transported by rail crosses through Calexico into Mexicali, Baja California through the East-Calexico Port of Entry. Union Pacific Railroad and Ferrocarril Mexicano (Ferromex) provide rail service at this port of entry.

Nogales, Sonora

Overview

Nogales is the seventh most important inland port of entry for U.S. agricultural products with USD 805 million. Principal products imported this year into Mexico through Nogales included fresh fruits 65 percent of total or USD 523 million, meat and meat products 15 percent or USD 120 million, live animals 10 percent or USD 80 million, grain meals and grains 8 percent or USD 42 million, and planting seeds 4 percent or USD 21 million.

Ranked by volume, top products included apples 151,776 tons, distilled grains 117,148 tons, malted barley 42,188 tons, grapes 37,531 tons, pears 32,110 tons, poultry 17,855 tons, peaches 12,791, pork meat 5,634 tons, rice 4,813 tons, and bovine meat 4,734 tons. Cattle for reproduction, working horses, and horses for reproduction also cross through this POE.

Verification and Inspection Points in Nogales

There are seven facilities authorized by SENASICA to function as VIPs for agricultural products. Three VIPs are located on the U.S. side of the border. Two of these VIPs are for plant, plant products, and used agricultural machinery. The remaining VIP on the U.S. side of the border is for live animal inspection. On the Mexican side of the border there are four verification and inspection points for animal products and byproducts, plant and plant products. Products such as grains and meals cross by rail from Nogales, Arizona and are inspected on the Mexican side of the border at the Ferromex railyard. Hogs for reproduction, horses, and cattle are inspected in Nogales, Arizona at a privately owned facility. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Nogales

SENASICA inspection personnel are stationed in the SAGARPA building at the Mariposa International Bridge. SAGARPA's working hours at the VIPs and at the main office are from 9:30 am to 6:00 pm Monday to Friday. For additional information on SENASICA's work schedule contact SENASICA's Inspection Office in Nogales, Sonora at 52 (631) 316-2288.

Logistics

Product is transported by truck and rail. Commercial vehicles, crossing into Mexico from Nogales, Arizona, use the Mariposa International Bridge. Product transported by rail crosses at the Dennis DeConcini Port of Entry. Union Pacific and Ferromex provide rail service at this POE.

Ciudad Juarez, Chihuahua

Overview

In 2017, Ciudad Juarez ranked fourth as the most important inland POE for U.S. agricultural products with a value of USD 2.09 billion. Principal products imported through Ciudad Juarez included grains with 48 percent or USD 1 billion, meat and meat products at 20 percent or USD 418 million, fresh produce 15 percent or USD 313 million, dairy products 12 percent or USD 240 million, and live animals at 5 percent or USD 10 million.

Ranked by volume, top products included corn 957,591 tons, wheat 484,141 tons, soybean meal 337,060 tons, poultry 84,078, pork meat 64,830 tons, potatoes 45,436 tons, whey 30,714 tons, and bovine meat 19,287. Livestock imported through this port of entry included horses for slaughter, breeding and working horses, cattle, and hogs for reproduction.

Verification and Inspection Points in Ciudad Juarez

There are eight facilities authorized by SENASICA to operate as official VIPs for agricultural products. Four VIPs are located on the U.S. side of the border. Two are for plant, plant products, and used agricultural machinery. The remaining two VIPs on the U.S. side of the border are for livestock inspection. On the Mexican side of the border in Ciudad Juarez, Chihuahua, there are three VIPs for animal products and byproducts, and plant and plant products. The fourth VIP on the Mexican side of the border corresponds to Ferromex's Estación Meseta railyard, where rail inspections are performed by SENASICA. Livestock exported to Mexico is inspected on the U.S. side of the border at the Chihuahua Cattlemen Association's pens in Santa Teresa, New Mexico and at the Texas Department of Agriculture's export pens in El Paso, Texas. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Ciudad Juarez

SENASICA's personnel are stationed at the SAGARPA building at the Puente Internacional Zaragoza in Ciudad Juárez. SAGARPA's working hours at the VIPs and in the main office are from 9:00 am to 8:00 pm Monday to Friday. For additional information on SENASICA's work schedule contact SENASICA's Inspection Office in Ciudad Juarez, Chihuahua at 52 (656) 682-2010.

Logistics

Product is transported by truck and rail. Commercial vehicles crossing from El Paso utilize the Ysleta-Zaragoza International Bridge. Product transported by rail crosses at the El Paso – Ciudad Juárez Port of Entry. Burlington Northern and Ferromex manage rail service at this POE.

Piedras Negras, Coahuila

Overview

In 2017, Piedras Negras ranked as the second most important inland POE for U.S. agricultural products with USD 2.33 billion. Principal products imported through Piedras Negras included grains and meals 78 percent of total or USD 1.78 billion, pork, poultry, variety meats, animal fat and hides 12 percent or USD 279 million, horses for slaughter 5 percent or USD 116 million, and live cattle 5 percent.

Ranked by volume, top products included corn with 3,379,378 tons, soybeans 1,091,558 tons, wheat 402,946 tons, rice 15,496 tons, hides 15,280, and poultry 5,769 tons, among other products. Working horses and cattle also crossed through this POE.

Verification and Inspection Points in Piedras Negras

There are four facilities authorized by SENASICA to function as official VIPs. Two VIPs are located on the U.S. side of the border in Eagle Pass for the inspection of cattle, horses for slaughter, and ovine for reproduction. Two inspection points are located on the Mexican side of the border. Of these, one is for animal products and byproducts, plant and plant products, and used agricultural machinery. The second VIP on the Mexican side of the border is the Ferromex railyard station in Rio Escondido for the inspection of dry plant products, and dry animal products and byproducts. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Piedras Negras

SENASICA's personnel are stationed at the SAGARPA building at the Puente Internacional II in Piedras Negras. SAGARPA's working hours at the VIPs and in the main office are from 9:00 am to 6:00 pm, Monday to Friday. For additional information on SENASICA's work schedule contact SENASICA's Inspection Office in Pedras Negras, Coahuila at 52 (878) 782-5487.

Logistics

Product is transported by truck and rail. Commercial vehicles cross from Eagle Pass, Texas at the Camino Real International Bridge. Product transported by rail crosses at the Charles Frisby International Railroad Bridge. Union Pacific and Ferromex provide rail service at this POE.

Colombia, Nuevo Leon

Overview

In 2017, Colombia ranked as the third most important POE for U.S. agricultural products at USD 2.17 billion. Principal products imported through Colombia included pork hams and mechanically deboned poultry for further processing at 68 percent or USD 1.4 billion, poultry products at 12 percent or USD 260 million, dairy products at 12 percent or USD 260.4 million, bovine meat products 5 percent or USD 108 million, and dried fruits and vegetables at 3 percent or USD 65 million.

Ranked by volume, top products included pork 297,866 tons, poultry 276,163 tons, bovine 78,872 tons, cheese 21,931 tons, ice cream 10,835 tons, and whey 6,255 tons.

Verification and Inspection Points in Colombia

There are four facilities authorized by SENASICA. All four VIPs are located on the Mexican side of the border (within the fiscal trade zone at the Colombia, Nuevo Leon POE) for animal products and byproducts, and plant and plant products. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Colombia

SENASICA's personnel are stationed in the SAGARPA building at the Colombia International Bridge. SAGARPA's working hours at the VIPs and in the main office are from 9:00 am to 7:00 pm Monday to Friday. For additional information on SENASICA's work schedule contact SENASICA's Inspection Office in Colombia, Nuevo Leon at 52 (867) 734-0054.

Logistics

All products are transported by truck. Commercial vehicles cross from Laredo, Texas to Colombia, Nuevo León at the Colombia-Solidarity International Bridge.

Nuevo Laredo, Tamaulipas

Overview

In 2017 and historically, Nuevo Laredo has been Mexico's most important inland POE for U.S. agricultural products with over USD 5.75 billion imported in 2017. Principal products imported through the Laredo-Nuevo Laredo POE included grains 48 percent or USD 2.76 billion, meat and meat products 20 percent or USD 1.1 billion, poultry products 18 percent or USD 1 billion, meals and flours 8 percent or USD 460 million, dairy products 3 percent or USD 172 million, and livestock 1 percent or USD 58 million.

Ranked by volume, top products included corn at 3,937,778 tons, soybeans 957,900 tons, wheat 734,191 tons, soybean meal 273,018 tons, DDGS 256,070 tons, pork meat 177,867 tons, poultry 97,940 tons, powdered milk and cream 78,505 tons, bovine meat 38,011 tons, and ice cream 2,254 tons. Dairy cattle, working and thoroughbred horses cross heavily through this POE.

Verification and Inspection Points in Nuevo Laredo

There are six facilities authorized by SENASICA to operate as official VIPs for agricultural products. Two inspection points are located on the U.S. side of the border. One is for plant and plant products. The second verification and inspection point are the Texas Department of Agriculture's livestock pens used for livestock inspection. Four VIPs are located on the Mexican side of the border. Of these VIPs, three are located inside the fiscal trade zone at the Puente International and are used to inspect animal products and byproducts, plant and plant products. The fourth VIP on the Mexican side of the border is located at Kansas City Southern railyard station known as "Estación Sánchez" used for the inspection of grains, DDGS, meals, and oilseeds. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Nuevo Laredo

SENASICA's personnel are stationed at the SAGARPA building located in downtown Nuevo Laredo. SAGARPA's working hours at the VIPs and in the main office are from 9:00 am to 6:00 pm Monday to Friday. For additional information on SENASICA's work schedule contact SENASICA's Inspection Office in Nuevo Laredo at 52 (867) 712-0167.

Logistics

Product is transported by truck and rail. Commercial vehicles cross at the World Trade International Bridge. Product transported by rail crosses through the Laredo-Nuevo Laredo POE. Rail service is provided by Kansas City Southern de México.

Reynosa, Tamaulipas

Overview

In 2017, Reynosa ranked as the sixth most important inland POE for U.S. food and agricultural products with a value of USD 1.16 billion. Principal products imported through the McAllen-Reynosa POE included grains 50 percent or USD 580 million, cotton 25 percent or USD 290 million, meat products 17 percent or USD 197 million, and poultry 8 percent or USD 92 million.

Ranked by volume, top products included corn 489,973 tons, pork meat 265,442 tons, sorghum 233,870 tons, cotton 136,975 tons, poultry 124,305 tons, DDGS 32,626 tons, soybeans 20,992 tons, wheat 6,897 tons, and bovine meat 6,133 tons.

Verification and Inspection Points in Reynosa

There are nine facilities authorized by SENASICA to function as VIPs for agricultural products. On the U.S. side of the border in Hidalgo, Texas, there are two verification and inspection points for plant and plant products and used agricultural machinery. On the Mexican side of the border there are seven verification and inspection points for animal products and byproducts, plant and plant products. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Reynosa

SENASICA's personnel are stationed at the SAGARPA building located at the Puente Internacional Nuevo Amanecer. SAGARPA's working hours at the VIPs and in the main office are from 9:30 am to 6:00 pm Monday to Friday. For additional information on SENASICA's work schedule contact its Inspection Office in Reynosa, Tamaulipas at 52 (899) 921-1905.

Logistics

Product is transported by commercial vehicles which cross at the Pharr-Reynosa (Nuevo Amanecer) International Bridge or at the Progreso-Nuevo Progreso International Bridge. It is expected that in 2018 commercial transport will be able to cross through the Anzalduas International Bridge that connects Mission, Texas with Reynosa. This bridge is currently open only for non-commercial vehicles.

Trade contacts at the Reynosa POE believe this additional commercial bridge will allow produce shipments to cross faster into the United States. The McAllen-Reynosa port of entry will increase its logistical importance for fruits and vegetables coming in from the Mexican Pacific Coast producing areas destined for the large markets in the Eastern United States, it has since displaced Nogales as the principal port of entry for fruits and vegetables.

This shift has been prompted by Mexico's highway infrastructure, in particular the new Puente Baluarte, a state-of-the-art bridge inaugurated in January 2012, and a key component of the super highway that runs from the state of Sinaloa to Durango. According to industry contacts in Reynosa, with this new infrastructure, producers from the Pacific Coast, targeting the Eastern U.S. market, will benefit from lower freight costs (saving approximately 1,000 USD/container) and the reduction of travel by a day.

Matamoros, Tamaulipas

Overview

In 2017, Matamoros ranked the ninth most important inland POE for U.S. agricultural products with a value of USD 130 million. Principal products imported through the Brownsville-Matamoros POE

included grains 80 percent of total or USD 104 million, breeding boars and gilts, bulls, working and breeding horses 14 percent 18.2 million, animal fat, bovine meat, poultry and bovine variety meats 5 percent or USD 6.5 million, and seafood including lobsters, shrimp and crabs at 1 percent (. Ranked by volume, specific products include distilling dregs 96,580 tons, soybeans 51,559 tons, soybean meal 12,598 tons, corn 5,310 tons, poultry 1,990 tons, bovine meat 625 tons, pork meat 165 tons, and shrimp 129 tons. Hogs for reproduction and horses are also a main crossing through this POE.

Verification and Inspection Points in Matamoros

There are five facilities authorized by SENASICA to operate as official VIPs for agricultural products. One VIP is located in Brownsville, Texas for livestock inspection. Four inspection points are located on the Mexican side of the border. Three of these are for animal and animal byproducts, and plant and plant products. The fourth VIP is the Matamoros Rail Station used for grain inspection. Hogs for reproduction and other livestock exported to México are inspected on the U.S. side of the border at the Texas Department of Agriculture export pens in Brownsville, Texas. See Annex I for more information on each of the VIPs in this POE.

SENASICA Inspection Office in Matamoros

SENASICA’s personnel are stationed in the SAGARPA building at the Puente Internacional Ignacio Zaragoza port of entry point in Matamoros, Tamaulipas. SAGARPA’s working hours at the VIPs and in the main office are from 9:00 am to 6:00 pm Monday to Friday. For additional information on SENASICA’s work schedule contact SENASICA’s Inspection Office in Matamoros, Tamaulipas at 52 (868) 814-4980.

Logistics

Product is transported by truck and rail. Commercial vehicles crossing from Brownsville, Texas, pass through the Veterans International Bridge at Los Tomates. Product transported by rail crosses through the Brownsville-Matamoros port of entry. Rail service is provided by Kansas City Southern de México.
