The animals and products listed in **Annex I** of this report shall be subjected to veterinary controls at border inspection posts in accordance with `Regulation on organization of veterinary checks on live animals entering the country` (which is harmonized with 91/496/EEC) and `Regulation on organization of veterinary checks on products entering the country` (which is harmonized with 97/78/EC).

Initial selection of products for veterinary controls made on the basis of the Combined Nomenclature in Column 1 of the **Annex I** shall be qualified by reference to the explanation cited in Column 3.

Composite products subject to veterinary controls

The following composite products shall be subject to veterinary controls;

- a) Composite products containing processed meat product.
- b) Composite products containing half or more of their substance of any one processed product of animal origin other than processed meat product.
- c) Composite products containing no processed meat product and less than half of their substance of processed milk product where the final products do not meet the requirements given the sub-title `Certain composite products and foodstuffs not subjected to veterinary controls`.

Documents to accompany composite products subject to veterinary controls

- a) Composite products containing processed meat product shall be accompanied by the relevant certificate for meat products determined by Ministry of Food, Agriculture and Livestock (MinFAL), regardless of any other animal product content.
- b) Composite products containing half or more of their substance of any one processed product of animal origin other than processed meat product and containing no processed meat product and less than half of their substance of processed milk product where the final products do not meet the requirements given the sub-title `Certain composite products and foodstuffs not subjected to veterinary controls`, containing processed milk product, shall be accompanied by the relevant certificate determined by MinFAL.

The following composite products or foodstuffs intended for human consumption, not containing any meat products, shall not be subject to veterinary controls:

- a) composite products containing less than half of their substance of any other processed product provided such products are:

b) composite products or foodstuffs listed in **Annex II**.

However, any dairy product included in any composite products shall only be derived from countries determined by MinFAL, and treated as determined by MinFAL for those countries. However, so far MinFAL has not published the authorized country list for dairy import.

Veterinary Border Inspection Posts where animal and animal products are subjected to veterinary controls

MinFAL is currently increasing their Veterinary Border Inspection Post number according to Turkey`s commitments to EU. To achieve this, MinFAL has been establishing specific control buildings at crucial points in line with EU standards. The flowing chart shows the posts and responsible province directorate to carry out veterinary controls.

If there is no veterinary border inspection post in the place where consignments are introduced to import, the border post where the consignments arrive is still required to carry out veterinary controls. Provincial directorate of MinFAL carry out veterinary controls at custom entry gates determined by Ministry of Customs and Trade in cooperation with MinFAL and veterinary controls are carried out by officials of MinFAL's Province Directorates.

Annex I

LIST OF ANIMALS AND PRODUCTS SUBJECT TO VETERINARY CONTROLS

Explanation notes for understanding the tables in this report:

Column 1: shows tariff classification. Tariff classification is determined in Turkish Custom Tariff Nomenclature. Four digit tariff classification is used. Unless otherwise specified, all products prefixed with or covered by these four digits must be introduced to the border inspection post for veterinary controls.

Where only certain products under any code with four, six or eight digits are required to be examined under veterinary controls and no specific subdivision under this code exists in the Turkish Custom Tariff Nomenclature, the code is marked Ex (for example Ex 3002: veterinary controls required only for animal derived material including hay and straw and not for the entire heading).

Column 2; This column gives definitions of the products. Definitions are as defined in Turkish Custom Tariff Nomenclature determined by Ministry of Customs and Trade.

Column 3; This column gives details of the products covered. This column gives details of scope of animals and products in order to select of consignments to be subjected to veterinary controls.
