Philippine Grain and Feed Update

Report Categories:

Grain and Feed

Approved By:

Jeffrey Albanese

Prepared By:

Perfecto Corpuz

Report Highlights:

Post concurs with the official USDA estimates for wheat and rice. For corn, production was pared down slightly from 8.0 million tons to 7.9 million tons in MY 2016/17. Some corn growing areas were negatively impacted by the lingering effects of El Niño weather patterns, which continued into 2016 and brought about unusually dry conditions.

Corn production was pared down modestly from 8.0 million tons to 7.9 million tons in MY 2016/17 to reflect weaker yields in some corn growing areas during the July-September 2016 period. According to industry contacts, output was negatively impacted by the lingering effects of El Niño weather patterns, which continued into 2016 and brought about unusually dry conditions.
