Committee on Sanitary and Phytosanitary Measures

Original: English

NOTIFICATION OF EMERGENCY MEASURES

Addendum

The following communication, received on 9 October 2025, is being circulated at the request of the Delegation of Australia.

Notification of emergency measures for khapra beetle

Registration of Controlled Atmosphere Treatment Providers under the AusTreat Scheme

Australia currently has emergency measures in place to address the risk of khapra beetle (*Trogoderma granarium*) entering the country. This includes mandatory pre-border treatment of [high-risk plant products](#) (such as rice, beans, lentils etc.) packed in [khapra beetle target-risk countries](#).

Australia is implementing a change to how Controlled Atmosphere (CA) treatments at atmospheric pressure are managed.

From **30 October 2025**, Australia will only accept CA treatments at atmospheric pressure conducted by **treatment providers approved under AusTreat**, Australia's pre-border treatment provider scheme. Approved treatment providers will be publicly listed on the [List of Treatment Providers](#) on the Department of Agriculture, Fisheries and Forestry (DAFF) website.

This change will affect a small number of treatment providers currently approved to conduct CA treatments outside the AusTreat scheme, as well as new providers seeking to undertake CA treatment at *atmospheric pressure* for Australian imports.

Australia's import permit conditions will be updated on 30 October 2025. The **additional declaration** required on the **phytosanitary certificate** will be updated as follows:

"The goods were treated with controlled atmosphere in accordance with Australia's [Controlled Atmosphere Treatment Methodology](#) by an approved provider of that treatment in Australia's [List of Treatment Providers](#), as per the attached treatment certificate [insert treatment certificate number]."

Note:

This change **does not** apply to khapra beetle treatments using *Controlled Atmosphere at altered pressure, methyl bromide fumigation, or heat treatment*. For these treatment types, use of a treatment provider registered under a pre-border treatment provider scheme is **not currently mandatory**. These treatment providers should continue to follow existing import requirements. However, we strongly encourage eligible treatment providers to register under AusTreat, as the AusTreat framework will be progressively expanded to include these treatments in the future.

Treatment provider registration

Treatment providers can **register for AusTreat now**, ahead of this requirement taking effect on 30 October 2025.

Treatment providers seeking to be approved by 30 October 2025, must submit their applications by 15 October 2025 to allow sufficient processing time by DAFF.

Treatment providers are required to submit the '*AusTreat registration application form*' and '*Controlled atmosphere (atmospheric pressure) treatment form*'. These forms are available on the following webpage: [AusTreat pre-border biosecurity treatment provider scheme - DAFF](#)

Further information

For further information, please contact Plant Import Operations team at DAFF via email at imports@aff.gov.au (Please title the subject line of the email with "Plant T2 – Khapra urgent actions").

This addendum concerns a:

- ☐ Modification of final date for comments
- ☒ Modification of content and/or scope of previously notified regulation
- ☐ Withdrawal of regulation
- ☐ Change in period of application of measure
- ☐ Other:
